Directors' Report

For the period ended 30 June, 2022

The Directors have pleasure in presenting their report on the affairs of Access Holdings Plc ("the company") and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"), the Company and the Group's Audited Financial Statements with Auditor's Report for the period ended 30 June 2022.

Legal form and principal activities

Access Holdings Plc trading as Access Corporation ('the Corporation') was incorporated as a public limited liability company on 10 February 2021. The Corporation is a Nigerian Exchange listed parent non-operating financial holding company for Access Bank ('the Bank') and the related group companies that emerged from the court-sanctioned Scheme of Arrangement between the Bank and holders of its fully paid ordinary shares of 50 Kobo each.

The Corporation's business segments include banking, consumer lending, payment services, insurance brokerage and pension funds administration. The banking business is currently in operation while the vehicles for the other business segments are at various stages of licensing, acquisition and operational readiness as at the end of the reporting period

The financial results of all operating subsidiaries and verticals have been consolidated in these financial statements.

Property and equipment

Information relating to changes in property and equipment is given in Note 28 to the financial statements. In the Directors' opinion, the fair value of the Group's property and equipment is not less than the carrying value in the financial statements.

Human resources

(i) Report on diversity in employment

The Company operates a non-discriminatory policy in the consideration of applications for employment. The Company's policy is that the most qualified and experienced persons are recruited for appropriate job levels, irrespective of an applicant's state of origin, ethnicity, religion, gender or physical condition.

We believe diversity and inclusiveness are powerful drivers of competitive advantage in developing and understanding of our customers' needs and creatively addressing them.

(a) Board Composition By Gender as at 30 June 2022

(ii) Employment of disabled persons

In the event of any employee becoming disabled in the course of employment, the Company will endeavour to arrange appropriate training to ensure the continuous employment of such a person without subjecting the employee to any disadvantage in career development.

(iii) Health, safety and welfare of employees

The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured

against occupational and other hazards. In addition, the Company retains top-class hospitals where medical facilities are provided for its employees and their immediate families at its expense. Fire prevention and fire-fighting equipment are installed in strategic locations within the Company's premises.

The Company operates a Group Personal Accident and the Workmen's Compensation Insurance covers for the benefit of its employees. It also operates a contributory pension plan in line with the Pension Reform Act 2014 as Amended and other benefit schemes for its employees.

(iv) Employee involvement and training

The Company encourages participation of employees in arriving at decisions in respect of matters affecting their wellbeing. Towards this end, the Company provides opportunities where employees deliberate on issues affecting the Company and its employees' interests, with a view to making inputs to decisions thereon. The Company places a high premium on the development of its manpower. Consequently, the Company sponsors its employees for various training courses, both locally and overseas.

(v) Statement of commitment to maintain positive work environment

The Company shall strive to maintain a positive work environment that is consistent with best practice to ensure that business is conducted in a positive and professional manner and to ensure that equal opportunity is given to all qualified members of the Group's operating environment.

Credit Ratings

The revised prudential guidelines, as released by the CBN, requires that banks should have themselves credit rated by a credit rating agency on a regular basis. It is also required that the credit rating be updated on a continuous basis from year to year.

Furthermore, it is required that banks should disclose this credit rating prominently in their published annual reports periodically.

Below are the credit ratings that Access Holdings Plc has been assigned by the various credit rating agencies that have rated the Bank, in no particular order:

Long Term Local Credit Ratings

| | Long Term | Date |
|-------------------|-----------|--------|
| Standard & Poor's | BBB | Jun-22 |
| Fitch Ratings | A+ | Jun-22 |
| Agusto & Co | AA | Jun-22 |
| Moody's | A1 | Dec-21 |
| | | |

Long Term Counterparty Credit Ratings

| | Long Term | |
|-------------------|-----------|--------|
| Standard & Poor's | B- | Jun-22 |
| Fitch Ratings | В | Jun-22 |
| Moody's | B2 | Dec-21 |

More information on the rating reports can be obtained at https://www.accessbankplc.com/credit-rating

Audit committee

Pursuant to Section 404(3) of the Companies and Allied Matters Act of Nigeria, the Company has an Audit Committee comprising two directors and three shareholders as follows:

| 1 | Mr. Henry Omatsola Aragho | - | Shareholder | Chairman |
|---|---------------------------|---|-------------|----------|
| 2 | Mr. Olutoyin Eleoramo | - | Shareholder | Member |
| 3 | Mr. Idaere Gogo-Ogan | - | Shareholder | Member |
| 4 | Mr. Abubakar Jimoh | - | Director | Member |
| 5 | Mrs. Ojinika Olaghere | - | Director | Member |

The functions of the Audit Committee are as provided in Section 404(7) of the Companies and Allied Matters Act of Nigeria.

 $The \ auditors, Price waterhouse Coopers \ have \ indicated \ their \ interest \ to \ continue \ in \ office \ and \ will \ do \ so \ pursuant \ to \ section \ 401(2) \ of \ the \ Companies \ and \ Allied \ Matters \ Act$

CUSTOMER COMPLAINTS AND FEEDBACK

Access Holdings Plc is fully committed to its core value of 'passion for customers. The Company prides itself on providing exceptional services to customers at all times. At the same time, given the number and complexity of financial transactions that take place every day, the Company recognizes that there will inevitably be occasions when mistakes and misunderstandings occur. In these situations, Access Holdings Plc encourages customers to bring their concerns to the attention of the bank for prompt resolution. In addition, deliberate efforts are made to solicit customers' feedback on its products and services.

Complaints Channels

In order to facilitate seamless complaint and feedback process, the bank has provided various channels for customers. These include:

- 24 hour contact centre with feedback through emails, telephone, SMS, Livechat, Social Media etc.
- Feedback portal on the Bank's website
- Customer service desks in over 300 branches and toll-free telephone lines to the office of the Group Managing Director in the banking halls of key branches.
- Correspondence from customers
- The Voice of Customer Solution
- The Ombudsman desk

Complaints Handling

We handle customer complaints with sensitivity and in due regard for the needs and understanding of each complainant. Efforts are made to resolve customer's complaints at first level. Where this cannot be done, they are immediately referred to the appropriate persons for resolution. All complaints are logged and tracked for resolution and feedback is provided to the customer.

Resolve or Refer command Centre

The 'Resolve or Refer' command centre serves to encourage timely service delivery and First Time Resolution (FTR) of customer issues. The 'Resolve or Refer Command Centre' which is being run by a senior management staff has the mandate to ensure that most customer issues are resolved same day. The command centre provides support to all our departments and branches on issue resolution.

Complaints Tracking and Reporting

We diligently track complaint information for continuous improvement of our processes and services. An independent review of the root cause of complaints made is carried out and lessons learnt are fed back to the relevant business units to avoid future repetition. Customer complaint metrics are analysed and reports presented to Executive Management and the Operational Risk Management committee. Reports on customer complaints are also sent to the Central bank as required.

CORPORATE GOVERNANCE REPORT FOR HALF YEAR ENDED JUNE 30, 2022

In a bid to achieve the Group aspirations and deliver enhanced value to stakeholders, Access Bank Plc ('the Bank') was restructured to a non-operating financial holding company, Access Holdings Plc, through a Scheme of Arrangement entered with holders of its fully paid ordinary shares. The restructuring was undertaken to strategically position the Group for expansion, enable it sustain its competitive advantage, as well as leverage opportunities in thriving markets. Access Holdings Plc trades as Access Corporation ('the Corporation').

In line with the provisions of the Scheme of Arrangement, 35,545,225,622 Ordinary Shares of 50 Kobo each in the issued and paid-up share capital of the Bank held by its shareholders were transferred to the Corporation in exchange for the allotment of 35,545,225,622 Ordinary shares of 50 kobo each in the share capital of the Corporation in proportion to their shareholding in the Bank.

The Board is confident that the holding company structure would enable the Corporation leverage new business opportunities in the emerging competitive landscape. The core considerations for transitioning to a holding company structure are: enhanced regulatory compliance, diversification into permissible financial services, enhanced risk management, preservation of shareholder value, effective capital allocation amongst others.

The Corporation remains committed to the Group's founding governance principles of integrity, diversity, accountability, responsibility, transparency, independence, fairness, and discipline. The Corporation's corporate governance framework is designed to align management's actions with the interest of shareholders while ensuring an appropriate balance with the interests of other stakeholders.

The Corporation's corporate governance structure also ensures compliance with the governance charters, relevant codes of corporate governance, as well as the post listing requirements of the stock exchange where our securities are listed. The Corporation is listed on the premium board of Nigerian Exchange Limited.

The Corporation's governance policies and framework will be regularly reviewed to reflect changes in the operating environment, regulation, and best practices. The core underlying verticals of the Corporation are commercial banking, payment services, micro finance banking, insurance brokerage, pension fund administration, and asset management.

The Board

The Board is led by the Chairman and sets the Corporation's strategy and risk appetite. It also approves capital and operating plans for the attainment of the Corporation's strategic objectives on the recommendation of Management.

The Central Bank of Nigeria approved the Board composition of the Corporation as highlighted below in February 2022:

In 2015, he was selected as one of the Institute of International Finance (IIF) Future Global Leaders. Mr. Ogbonna has attended Executive Management Development Programmes on diverse areas of banking and management in world leading institutions.

He has a robust corporate board experience and currently serves as a Non-Executive Director of the Bank's subsidiaries in UK and South Africa. He also represents the Bank on the Boards of its investee companies - African Finance Corporation and CSCS Plc.

He is 48 years old as at the end of the reporting period.

Mr. Oluseyi Kolawole Kumapayi, FCA Non-Executive Director

Mr. Kumapayi is a highly accomplished and result-driven professional with over twenty (20) years of progressive banking experience spanning across Finance, Strategy, Risk Management, and Treasury. He joined Access Bank in 2002 as the Head of Financial Control and Credit Risk Management. Prior to joining Access Bank, he held controller and analyst positions in First City Monument Bank Limited and Guaranty Trust Bank Plc respectively.

He was the Group Chief Financial Officer of Access Bank Plc, a position he held from 2008 till 2020. In November 2020, he was appointed as the Executive Director, African Subsidiaries in Access Bank Plc. He has played significant roles in the creation of the largest retail bank in Nigeria and specific corporate actions that have supported the Bank's growth objectives and enhanced its capacity to play in key local and international markets.

Mr. Kumapayi is a graduate of Harvard Business School. He holds a master's degree in Mechanical Engineering from the University of Lagos, and a Bachelor of Science degree in Agricultural Engineering from the University of Ibadan, Nigeria. He has also attended several Executive Management Development programmes in leading institutions including INSEAD, IMD and London Business School.

He is a Fellow of the Institute of Chartered Accountants of Nigeria (ICAN) and a member of the Global Association of Risk Professionals (GARP), the Chartered Institute of Taxation of Nigeria (CITN) and the Chartered Institution of Bankers of Nigeria (CIBN). He is also a board member of the Ogun State Security Trust Fund.

He is 50 years old as at the end of the reporting period.

Dr. Herbert Onyewumbu Wigwe, FCA Group Managing Director/Chief Executive Officer

Dr. Wigwe is a transformational leader, seasoned banker, and financial expert with over three (3) decades of professional experience. He joined Access Bank in March 2002 as Deputy Managing Director to co-lead its transformation to world class financial services provider and became its Group Managing Director/Chief Executive Officer in 2014. He resigned from the Board of the Bank in May 2022 and is currently a Non-Executive Director.

He commenced his career at Coopers & Lybrand, Lagos as a management consultant later qualifying as a Chartered Accountant. After a stint at Capital Bank, he joined Guaranty Trust Bank where he spent over a decade working in the Corporate and Institutional Banking Division, rising to become the Executive Director in charge of Institutional Banking.

As one of Nigeria's foremost corporate bankers, he has helped develop some of Africa's biggest companies in the construction, telecommunications, energy and oil and gas sectors through a unique model, which involves understanding and providing financial support and expertise.

Dr. Wigwe also served as the Chairman of Access Bank (Ghana), Access Investment & Securities Limited and a Non-Executive Director of Central Securities and Clearing System (CSCS). He is the Chairman of Access Bank (UK) Limited and Unified Payments Services Limited. He is a board member of Nigerian Mortgage Refinance Company Plc and NG Clearing Limited.

He holds a Bachelor of Science degree in Accountancy from the University of Nigeria, Nsukka; a master's degree in Banking and Finance from the University College of North Wales (now Bangor); a Master of Science degree in Financial Economics from the University of London and is an Alumnus of the Harvard Business School Executive Management Programme.

He is a Fellow of the Institute of Chartered Accountants of Nigeria, and Institute of Credit Administration, and an Honorary member of the Chartered Institute of Bankers of Nigeria.

He is 55 years old as at the end of the reporting period.

Ms. Bolaji Olaitan Agbede

Executive Director

Ms. Agbede is a versatile professional with over twenty-seven (27) years' experience in Human Resources management, customer relationship management and banking operations. She has a proven record of successful people integration during mergers and acquisitions, culture transformation and execution of corporate strategies.

She commenced her professional career in Guaranty Trust Bank and served in various capacities within the Commercial Banking and Operations functions. She diligently distinguished herself and swiftly rose from the grade of Executive Trainee in 1992 to Manager in 2001. Ms. Agbede subsequently served as the Chief Executive Officer of JKG limited in 2003 a business consulting outfit.

Ms. Agbede joined Access Bank in 2003 as an Assistant General Manager and was responsible for managing the Bank's portfolio of chemical trading companies. She has occupied the role of Head, HR for the Access Bank Group since 2010 where she oversees the human capital development of the Group.

Ms. Agbede holds a bachelor's degree in Mathematics and Statistics from the University of Lagos (1990) and subsequently obtained a Master of Business Administration degree from Cranfield University in 2002. She is a member of the Chartered Institute of Management UK and Chartered Institute of Personnel Management of Nigeria.

She has attended several renowned leadership and professional development programs including the High-Performance Leadership Programme organised by the IMD and the Strategic Talent Management Programme organised by the London Business School.

She is 52 years old as at the end of the reporting period.

Sunday Ekwochi, HCIB Company Secretary

Mr. Ekwochi was appointed the Company Secretary of the Corporation in May 2022 and Company Secretary of the Bank in May 2010.

He graduated as a top student in Law from the University of Jos with a second-class upper degree in 1996 and from the Nigerian Law School in February 1998 with a second-class upper degree. He has over 19 years' banking experience from the then African Express Bank, Fidelity Bank and Access Bank Plc.

Mr. Ekwochi qualified as a Chartered Secretary with the Institute of Chartered Secretaries and Administrators, London in 2003. He has attended Management Development Programmes at London Business School, Euromoney, Wharton Business School and IMD. He is an Honorary Senior Member of the Chartered Institute of Bankers of Nigeria.

Mr. Ekwochi serves as the Vice-Chair of the Association of Banks Legal Advisers and Company Secretaries.

Performance Monitoring and Evaluation

The Board, in the discharge of its oversight function, engages management in the planning, definition and execution of the Corporation's strategy. Management's report on the execution of defined strategic objectives is a regular feature of the Board's agenda, thus providing the Board with the opportunity to evaluate and constructively challenge management in the execution of strategy.

The Group held a Board Retreat on February 25-26, 2022 where the strategy for the financial year was rigorously debated and agreed between Management and Board. Management provides the Board with quarterly update on implementation of the strategy, affording the Board the opportunity to critique Management's performance and access significant risk issues as well as mitigating controls implemented. Management's report on the Group's actual financial performance is presented relative to the planned budget to enable the Board assess performance. Peer comparison is also a regular feature of Management reporting to the Board to benchmark performance against that of our competitors.

The Corporation's performance on Corporate Governance is monitored and reported. The Corporation carries out extensive reviews of its compliance with the CBN, SEC and FRC Codes of Corporate Governance and with appropriate reports rendered to the regulators.

Board assessment, when done effectively provides the Board the opportunity to identify and remove obstacles to better performance and to strengthen what works well. The Board has established a policy on its performance evaluation which provides for the independent annual evaluation of its performance, that of its committees and individual Directors. The evaluation is done by an independent consultant approved by the Board.

The Board believes that the use of an independent consultant promotes the objectivity and transparency of the evaluation process. An independent Consultant would be engaged to conduct the Board Performance Evaluation exercise for 2022 at the end of the financial year. Our Board and corporate governance assessment transcends box ticking and involves a rigorous process of on-line self-evaluation and 360° feedback with a heavy focus on qualitative considerations. It includes the assessment of the Corporation's corporate governance frameworks and polices, evaluation of the Board and the Committees as well as the effectiveness of the Independent Directors.

In compliance with the CBN Code of Corporate Governance, the 2022 Annual Board Performance Evaluation Report would be presented during the Q1, 2023 Board Meeting and subsequently at the Corporation's Annual General Meeting ('AGM') in 2023.

Board Composition- Guiding Principles

The Fit and Proper Person Policy is designed to ensure that the Corporation and its verticals are managed and overseen by competent, capable and trustworthy individuals. The Board Governance, Nomination and Remuneration Committee is responsible for Executive Directors' succession planning and recommends new appointments to the Board. The Committee takes cognisance of the existing range of skills, experience, background and diversity on the Board in the context of the Corporation's strategic direction before articulating the specifications for the candidate sought. The Committee also considers the need for appropriate demographic and gender balance in recommending candidates for Board appointments. Candidates who meet the criteria set by the Committee are subjected to enhanced due diligence enquiries. We are comfortable that the Board is sufficiently diversified to optimise its performance and deliver sustainable value to stakeholders.

The Board's composition subscribes to global best practice on the need for Non-Executive Directors to exceed Executive Directors. In H1, 2022, the Board had more Non-Executive Directors than Executive Directors, with three of the Non-Executive Directors being independent as against two required by the CBN Code of Corporate Governance for Banks in Nigeria. Non-Executive Directors are appointed to the Board to bring independent, specialist knowledge and impartiality to strategy development and execution monitoring. The Board is committed to improving gender diversity in its composition in line with its diversity policy. 50% of the Executive Management team is composed of females while the Board had 33% female memberships as of June 30, 2022 above Nigeria's national average of 12%.

Retirement and Re-election of Directors

In accordance with the Corporation's Articles of Association, all Directors must retire from office at the first AGM.

At subsequent AGMs, any Director who has been appointed since the last AGM or was not appointed or reappointed at one of the two preceding AGMs would retire from office and offer himself/herself for reappointment.

Board Effectiveness

Today's boards are required to be more engaged, more knowledgeable and more effective than in the past as they contend with a host of new pressures, challenges and risks. As stakeholders' expectations from the Board continue to grow, the Board must set its strategic priorities often across diverse business segments and markets and monitor the firm's risk profile. The Board must demonstrate that good corporate governance is not a box-ticking exercise by setting the right ethical tone from the top. The effectiveness of the Board is achieved through composition, induction, training and a rigorous evaluation process. The effectiveness of the Board derives from the diverse range of skills and competences of the Executive and Non-Executive Directors who have exceptional degrees in banking, financial and broader professional and entrepreneurial experiences.

Training and Induction

We recognise that being a Director is becoming increasingly more challenging, thus the Corporation has a Directors' Orientation and Continuous Education Policy which provides that Directors should be exposed to domestic and international trainings to improve their decision-making capacity, thereby contributing to the overall effectiveness of the Board.

New Directors are exposed to a personalised induction programme which includes one-on-one meetings with Executive Directors and Senior Executives responsible for the Corporation's key business areas. Such sessions focus on the challenges, opportunities and risks facing the business areas. The induction programme covers an overview of the Strategic Business Units as well as Board processes and policies. A new Director is provided with an induction pack containing charters of the various Board Committees, significant reports, important statutes and policies, minutes of previous Board meetings and a calendar of Board activities. Based on the recommendation of the Governance, Nomination and Remuneration Committee, the Board approves the annual training plan and budget for Directors while the Company Secretary ensures the implementation of the plan with regular reports to the Board.

Shareholders and Regulatory Engagement

The Board recognises the importance of free flow of complete, adequate and timely information to shareholders to enable them to make informed decisions and is committed to maintaining high standards of corporate disclosure. The implementation of our Investor Communication and Disclosure Policy helps the Board to understand shareholders views about the Corporation. The Corporation's website www.theaccesscorporation.com is regularly updated with both financial and non-financial information.

Shareholders meetings are convened and held in an open manner in line with the Corporation's Articles of Association and existing statutory and regulatory regimes, for the purpose of deliberating on issues affecting the Corporation's strategic direction. The AGM is a medium for promoting interaction between the Board, management, and shareholders. Attendance at the Annual General Meeting is open to shareholders or their proxies, while proceedings at such meetings would be monitored by members of the press, representatives of the Nigerian Exchange Limited, the Central Bank of Nigeria and the Securities and Exchange Commission.

The Group has a dedicated Investors Relations Unit that facilitates communication with shareholders and analysts on a regular basis and addresses their queries and concerns. Investors and stakeholders are frequently provided with information about the Corporation through various channels, including Quarterly Investors Conference Calls, the General Meeting, the Corporation's website, the Annual Report and Accounts, Non-Deal Road Shows, and Investors Forum at Nigerian Exchange Limited.

The Board ensures that communication with the investing public about the Corporation and its verticals is timely, factual, broadly disseminated, and accurate in accordance with all applicable legal and regulatory requirements. The Corporation's reports and communication to shareholders and other stakeholders are in plain, readable, and understandable format. The Board ensures that shareholders' statutory and general rights are always protected, particularly their right to vote at general meetings. The Board also ensures that all shareholders are treated equally regardless of the size of their shareholding and social conditions. Our shareholders are encouraged to share in the responsibility of sustaining the Corporation's corporate values by exercising their rights as protected by law.

Access to Information and Resources

Management recognises the importance of ensuring the flow of complete, adequate and timely information to the Directors on an ongoing basis to enable them to make informed decisions in discharge of their responsibilities. There is ongoing engagement between Executive Management and the Board, and the Heads of Strategic Business Units attend Board meetings to make presentations. The Corporation's External Auditors attend the meetings of the Group Board Audit Committee and the Group Statutory Audit Committee to make presentation on the audit of the Corporation's Financial Statements. Directors have unrestricted access to Management and company information in addition to the necessary resources to carry out their responsibilities including access to external professional advice at the Corporation's expense in line with policy.

Board Responsibilities

The primary function of the Board is to provide effective leadership and direction to enhance the long-term value of the Corporation to its shareholders and other stakeholders. It has the overall responsibility for reviewing the strategic plans and performance objective, financial plans and annual budget, key operational initiatives, major funding and investment proposals, financial performance review and corporate governance practices.

Term of Office

The Corporation's Non-Executive Directors are appointed for an initial term of four years, and they can be re-elected for a maximum of two subsequent terms of four years each, subject to satisfactory performance and shareholders' approval. The Independent Non-Executive Directors are subject to a maximum tenure of eight years as stipulated by the Central Bank of Nigeria's Guidelines for the Appointment of Independent Directors. Our Executive Directors are appointed for an initial term of four years and their tenure can be renewed for further terms subject to a satisfactory annual performance evaluation. Executive Directors are prohibited from holding other directorships outside the Group or investee companies.

Separation of Roles

In line with best practice, the Chairman and Chief Executive Officer's roles are assumed by different individuals; this ensures the balance of power and authority. The Board can reach impartial decisions as its Non-Executive Directors are a blend of Independent and Non-Independent Directors with no shadow or Alternate Directors, thus ensuring that their independence is brought to bear on decisions of the Board.

The Role of the Board

The principal responsibility of the Board is to promote the long-term success of the Corporation by creating and delivering sustainable shareholder value. The Board leads and provides direction for the Management by setting policy directions and strategy, and by overseeing their implementation. The Board seeks to ensure that Management delivers on both its long-term growth and short-term objectives, striking the right balance between both goals. In setting and monitoring the execution of our strategy, consideration is given to the impact that those decisions will have on the Corporation's obligations to various stakeholders, such as shareholders, employees, suppliers and the community in which the Corporation operates.

The Board is responsible for ensuring that robust systems of internal controls are maintained, and that Management maintains an effective risk management and oversight process across the Corporation so that growth is delivered in a controlled and sustainable way. In addition, the Board is responsible for determining and promoting the collective vision of the Corporation's purpose, values, culture and behaviours.

In carrying out its oversight functions, matters reserved for the Board include but are not limited to:

- Defining the Corporation's business strategy and objectives.
- Formulating risk policies.
- Approval of guarterly, half yearly and full year financial statements.
- Approval of significant changes in accounting policies and practices.
- Appointment or removal of Directors and the Company Secretary.
- Approval of major acquisitions, divestments of operating companies, disposal of capital assets or capital expenditure.
- Approval of charter and membership of Board Committees.
- Setting of annual Board objectives and goals.
- Approval of allotment of shares.
- Approval of the framework for determining the policy and specific remuneration of Executive Directors.
- Monitoring delivery of the strategy and performance against plan.
- Reviewing and monitoring the performance of the Group Managing Director and the Executive team.
- Ensuring the maintenance of ethical standard and compliance with relevant laws.
- Performance appraisal and compensation of Board members and Senior Executives.
- Ensuring effective communication with shareholders.
- Ensuring the integrity of financial reports by promoting disclosure and transparency.
- · Succession planning for key positions.

The Role of the Chairman

The principal role of the Chairman is to provide leadership and direction to the Board. The Chairman is accountable to the Board and shareholders and liaises directly with the Board and the Management of the Corporation, through the

Group Managing Director/Chief Executive Officer. The positions of the Chairman and the Group Managing Director/Chief Executive Officer are held by separate individuals.

More specifically, the duties and responsibilities of the Chairman are as follows:

- Primarily responsible for the effective operation of the Board and ensures that the Board works towards achieving the Corporation's strategic objectives.
- Setting the agenda for Board meetings in conjunction with the Group Managing Director/Chief Executive Officer and the Company Secretary.
- Approval of the Annual Board Activities Calendar.
- Playing a leading role in ensuring that the Board and its Committees have the relevant skills, competencies for their job roles.
- Ensuring that Board meetings are properly conducted and that the Board is effective and functions in a cohesive manner.
- Ensuring that the Directors receive accurate and clear information about the affairs of the Corporation in a timely manner to enable them to take sound decisions.
- Acting as the main link between the Board and the Group Managing Director/Chief Executive Officer as well as
 advising the Group Managing Director/Chief Executive Officer on the effective discharge of his duties.
- Ensuring that all Directors focus on their key responsibilities and play constructive roles in the affairs of the Corporation
- Ensuring that induction programmes are conducted for new Directors and continuing education programmes are in place for all Directors.
- Ensuring effective communication with the Corporation's institutional shareholders and strategic stakeholders.
- Taking a leading role in the assessment, improvement and development of the Board.
- Presiding over General Meetings of shareholders.

The Role of Group Managing Director/Chief Executive Officer ('GMD/CEO')

The GMD/CEO has the overall responsibility for leading the development and execution of the Corporation's long-term strategy, with a view to creating sustainable shareholder value. He manages the day-to-day operations of the Corporation and ensures that operations are consistent with the policies approved by the Board.

Specifically, the duties and responsibilities of the GMD/CEO include the following:

- · Acts as head of the Management team and is answerable to the Board.
- Responsible for ensuring that a culture of integrity and legal compliance is imbibed by personnel at all levels of the Corporation.
- Responsible for the Corporation's consistent achievement of its financial objectives and goals.
- Ensures that the Corporation's philosophy, vision, mission and values are disseminated and practised throughout the Corporation.
- Ensures that the allocation of capital reflects the Corporation's risk management philosophy.
- Ensures that the Corporation's risks are controlled and managed effectively, optimally and in line with the Corporation's strategies and objectives.
- Supervision of the Executive Directors and all verticals and affiliate companies.
- Serves as the Corporation's Chief Spokesman and ensures that it is properly presented to its various publics.
- Ensures that the Directors are provided with enough information to support their decision making.

The Role of the Company Secretary

Directors have separate and independent access to the Company Secretary. The Company Secretary is responsible for, among other things, ensuring that Board procedures are observed and that the Corporation's Memorandum and Articles of Association, plus relevant rules and regulations, are complied with. He also assists the Chairman and the Board in implementing and strengthening corporate governance practices and processes, with a view to enhancing long-term shareholder value. The Company Secretary assists the Chairman in ensuring good information flow within the Board and its Committees and between Management and Non-Executive Directors.

The Company Secretary also facilitates the orientation of new Directors and coordinates their professional development. As primary compliance officer for the Corporation's compliance with the listing rules of the Nigerian Exchange Limited,

the Company Secretary is responsible for designing and implementing a framework for the Corporation's compliance with the listing rules, including advising Management on prompt disclosure of material information. The Company Secretary attends and prepares the minutes for all Board meetings. As secretary for all Board Committees, the Company Secretary assists in ensuring coordination and liaison between the Board, the Board Committees and Management. The Company Secretary also assists in the development of the agenda for the various Board and Board Committee meetings. The appointment and the removal of the Company Secretary are the exclusive preserve of the Board.

Delegation of Authority

The ultimate responsibility for the Corporation's operations rests with the Board. The Board retains effective control through a well-developed Committee structure that provides in-depth focus on the Board's responsibilities. Each Board Committee has a written term of reference and presents regular reports to the Board on its activities. The Board delegates authority to the Group Managing Director/Chief Executive Officer to manage the affairs of the Corporation within the parameters established by the Board from time to time.

Board Meetings

The Board meets quarterly, and emergency meetings are convened as may be required. The Annual Calendar of Board and Committee meetings is approved in advance during the last quarter of the preceding year. Material decisions may be taken between meetings through written resolutions in accordance with the Corporation's Articles of Association.

All Directors are provided with notices, agenda, and meeting papers in advance of each meeting to enable Directors adequately prepare for the meeting. Where a Director is unable to attend a meeting, he/she is still provided with the relevant papers for the meeting. Such a Director also reserves the right to discuss with the Chairman any matter he/she may wish to raise at the meeting. Directors are also provided with regular updates on developments in the regulatory and business environment.

The Board in demonstration of its commitment to environmental sustainability operates a secure electronic portal-Diligent Board book- for the circulation of board documentation to members.

The Board met 4 times during the period under review.

The Board devoted considerable time and efforts on the following issues in H1, 2022.

- Regularisation of its pre-commencement activities
- Adoption of its revised Memorandum and Articles of Association
- Appointment of Statutory Auditors
- Establishment of Bank Accounts and appointment of authorised signatories
- Appointment of registrars
- Approval of investment in Pension Fund Administration sector
- Approval of Interim Financial Statements
- Approval of revised Board Calendar
- Approval of 2023-2027 Strategy
- Appointment of nominee shareholders

Board Committees

The Board exercises oversight responsibility through its standing committees, each of which has a charter that clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure and reporting lines to the Board. In line with best practice, the Chairman of the Board is not a member of any Committee.

The Board had three standing committees as at June 30, 2022 namely: the Audit and Risk Management Committee, the Board Finance and Investment Committee, and the Governance, Nomination and Remuneration Committee.

While the various Board committees have the authority to examine issues within their remit and report their decisions and/or recommendations to the Board, the ultimate responsibility for all matters lies with the Board.

Reports of Board Committees

Only the Board Governance, Nomination and Remuneration Committee met in H1, 2022.

Board Governance, Nomination and Remuneration Committee

The membership of the Committee and attendance at the meetings in H1, 2022 are as set out below.

| Name | Designation | 10/3/2022 | 10/4/2022 |
|---------------------|---------------|-----------|-----------|
| Fatimah BelloIsmail | Chairman | Р | Р |
| Abubakar Jimoh | Vice-Chairman | Р | Р |
| Ojini Olaghere | Member | Р | Р |
| Olusegun Ogbonnewo | Member | Р | Р |

The Committee advises the Board on its oversight responsibilities in relation to governance, appointment, re-election and removal of Directors. The Committee also advises the Board on issues related to Directors' induction, training as well as Board performance evaluation. The Committee is responsible for recommending appropriate remuneration for Directors and other staff to the Board for approval.

The key decisions of the Committee in the reporting period included approval of executive appointments, approval of the Committee's revised Charter, and approval of Remuneration Policy and Structure for Directors and employees.

The Committee met twice during the reporting period.

Mrs. Fatimah Bello-Ismail is the Chairman of the Committee.

Board Finance and Investment Committee

The membership of the Committee in H1, 2022 is as set out below.

| S/N | Name of Director | Designation |
|-----|---------------------|---------------|
| 1 | Mr. Segun Ogbonnewo | Chairman |
| 2 | Mrs. Ojini Olaghere | Vice-Chairman |

| 3 | Mr. Abubakar Jimoh | Member |
|---|---------------------------|--------|
| 4 | Mrs. Fatimah Bello-Ismail | Member |
| 5 | Dr. Herbert Wigwe | Member |
| 6 | Mr. Roosevelt Ogbonna | Member |
| 7 | Mr. Oluseyi Kumapayi | Member |
| 8 | Ms. Bolaji Agbede | Member |

The Committee assists in monitoring the Group's strategy formulation and implementation process. It also oversees the Group's investment planning, execution, monitoring process and periodically review the financial performance of the Group.

The Committee did not meet during the reporting period.

Board Audit and Risk Management Committee

The membership of the Committee in H1, 2022 is as set out below.

| S/N | Name of Director | Designation |
|-----|---------------------------|---------------|
| 1 | Mr. Abubakar Jimoh | Chairman |
| 2 | Mrs. Fatimah Bello-Ismail | Vice-Chairman |
| 3 | Mrs. Ojini Olaghere | Member |
| 4 | Mr. Segun Ogbonnewo | Member |

The Committee assists the Board in fulfilling its oversight responsibility relating to:

- a) The integrity of the Group's financial statements and the financial reporting process;
- b) The independence and performance of the Group's internal and external auditors;
- c) The Group's system of internal control and mechanism for receiving complaints regarding the Group's accounting and operating procedures.

The Committee did not meet during the reporting period.

DIRECTORS' INTEREST IN CONTRACTS

Disclosure on Directors' interest in contracts in contained in this report.

Statutory Audit Committee

In compliance with Section 404 of the Companies and Allied Matters Act 2020, the Corporation constituted a Standing Shareholders Audit Committee. The Committee is constituted to ensure its independence, which is fundamental to upholding stakeholders' confidence in the reliability of the Committee's report and the Group's Financial Statements. There is no Executive Director sitting on the Committee. The Chairman of the Committee is an ordinary shareholder, while the shareholders' representatives are independent and answerable to the shareholders.

The duties of the Committee are as enshrined in Section 404 (3) and (4) of CAMA 2020. The Committee is responsible for ensuring that the Corporation's financials comply with applicable financial reporting standards.

The profiles of the shareholders' representatives in the Committee are as follows:

Henry Omatsola Aragho, FCA Chairman, Statutory Audit Committee

Mr. Aragho obtained his Higher National Diploma (Accounting) from Federal Polytechnic Auchi in 1981 and a master's degree in Business Administration from Ogun State University (1999). He qualified as a Chartered Accountant with the Institute of Chartered Accountants of Nigeria (ICAN) in 1985. He was admitted as an Associate Member of Institute of Chartered Accountants of Nigeria in March 1986 and subsequently qualified as a fellow of the Institute. He joined the Nigerian Ports Authority in 1982 and retired as General Manager Audit in 2005. He is presently the Managing Consultant of Henrose Consulting Limited and Managing Director Henrose Global Resources Limited.

He was appointed the Chairman of the Committee on July 27, 2016.

Emmanuel Olutoyin Eleoramo Member, Statutory Audit Committee

Mr. Eleoramo holds a First-Class degree in Insurance and a master's degree in Business Administration (MBA), both from the University of Lagos. He is an Associate of the Chartered Insurance Institute of London and a Fellow of the Chartered Insurance Institute of Nigeria. He has over 36 years of varied experience in general insurance marketing, underwriting and employee benefits consultancy. He is a key player in the Nigerian insurance industry and a past President of the Chartered Insurance Institute of Nigeria. He was the Managing Director/Chief Executive Officer of Nigerian French Insurance Company Ltd and later Whispering Hope Insurance Company Ltd (now Sterling Assurance Nigeria Ltd) before his appointment as the Managing Director/Chief Executive Officer of Nigerian Life and Pensions Consultants Limited (now Nigerian Life and Provident Company Limited) from where he retired in 2018.

Idaere Gogo-Ogan Member, Statutory Audit Committee

Mr. Ogan is a 1987 graduate of Economics from the University of Port Harcourt and holds a master's degree in International Finance from Middlesex University, London. He joined the Corporate Banking Department of Guaranty Trust Bank Plc in 1996. He left Guaranty Trust Bank to found D' Group, incorporating Becca Petroleum Limited and Valuestream and Cordero Engineering Ltd.

He is a Non-Executive Director of Coronation Merchant Bank Limited and Chairman of United Securities Limited.

Composition

The composition of the Corporation's Statutory Audit Committee follows the Companies and Allied Matters Act 2020 and comprises 3 shareholders and 2 Non-Executives, one of whom is an Independent Non-Executive Director while the other is independent of the management of the Corporation .

Tenure of the Statutory Audit Committee

The tenure of each Committee member lasts from the date of election at an Annual General Meeting till the next. The membership may, however, be renewed through re-election at the next Annual General Meeting.

Role and Focus of the Statutory Audit Committee

The duties of the Statutory Audit Committee are as enshrined in Section 404 (3) and (4) of CAMA. The statutory provisions are supplemented by the provision for the Codes of Corporate Governance issued by the CBN and SEC and are highlighted as follows:

- Ascertaining whether the accounting and reporting policies of the Corporation are in accordance with legal requirements and agreed ethical practices.
- Reviewing the scope and planning of audit requirements.
- Reviewing the findings on management matters in conjunction with the external auditor and management's responses thereon.
- Keeping under review the effectiveness of the Corporation's system of accounting and internal control.
- Makings recommendations to the Board on the appointment, removal and remuneration of the external auditors of the Corporation, ensuring the independence and objectivity of the external auditors and that there is no conflict of interest which could impair their independent judgement.
- Authorising the internal auditor to carry out investigations into any activity of the Corporation which may be of interest or concern to the Committee.

Assisting in the oversight of the integrity of the Corporation's financial statements and establish and develop
the internal audit function.

H1, 2022 Audit Fees

The audit fees paid by the Corporation to PricewaterhouseCoopers, external auditors for the H1, 2022 statutory audit was \\$323Mn while fees for non-audit services rendered to the Corporation during the review period amounted to \\$73Mn

Going Concern

The Directors confirm that after making appropriate enquiries, they have reasonable expectation that the Corporation has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

External Auditors

Messrs PricewaterhouseCoopers ('PwC') acted as our external auditors for H1, 2022. The Board confirms that the Corporation has complied with the regulatory requirement as enshrined in the CBN and SEC Codes of Corporate Governance on the rotation of audit firm and audit partners.

Succession planning

The Board has a robust policy which is aligned to the Corporation's performance management process. The policy identifies key positions in respect of which there will be formal succession planning. The policy provides that potential candidates for positions shall be identified at the beginning of each financial year.

Code of Ethics

The Corporation's Codes of Conduct specifies expected behaviours for its employees and Directors. The Codes are designed to empower employees and Directors and enable effective decision making at all levels of the business according to defined ethical principles.

Dealing in Company Securities

The Corporation's implements a Securities Trading Policy that prohibits Directors, members of the Audit Committee, employees and all other insiders from abusing, or placing themselves under the suspicion of abusing price sensitive information in relation to the Corporation's securities. In line with the policy, affected persons are prohibited from trading on the Corporation's security during a closed period which is usually announced by the Company Secretary. The Corporation has put in place a mechanism for monitoring compliance with the policy.

Remuneration Policy

The Corporation has established a remuneration policy that seeks to attract and retain the best talent in countries that it operates. To achieve this, the Corporation seeks to position itself among the best performing and best employee rewarding companies in its industry in every market that it operates. This principle will act as a general guide for the determination of compensation in each country. The objective of the policy is to ensure that salary structures, including short- and long-term incentives, motivate sustained high performance and are linked to corporate performance. It is also designed to ensure that stakeholders can make reasonable assessment of the Corporation's reward practices. The Corporation ensures that all local tax policies are complied with in its countries of operation.

Operating within the guidelines set by the principles above, compensation for country staff is based on the conditions in the local economic environment as well as the requirements of local labour laws. The Group Office usually commissions independent annual compensation surveys in the subsidiaries to obtain independent statistics the local markets pay to arrive at specific compensation structures for each country. Compensation will be determined annually at the end of the financial year.

Total compensation provided to employees will typically include guaranteed and variable portions. The specific proportion of each will be defined at the country level. Guaranteed pay will include base pay and other guaranteed portions while variable pay may be both performance-based and discretionary.

The Corporation has put in place a performance bonus scheme which seeks to attract and retain high-performing employees. Awards to individuals are based on the job level, business unit performance and individual performance. Other determinants of the size of individual award amounts include pay levels for each skill set which may be influenced by the relative dearth of skills in an area.

The Corporation complies with the Pension Reform Act on the provision of retirement benefit to employees at all levels. The Corporation also operates an Employee Performance Share Plan for the award of units of the Corporation's shares to its employees, subject to terms and conditions determined by the Board of Directors.

Whistle-Blowing Procedure

The Corporation expects all its employees and Directors to observe the highest level of probity in their dealings with the Corporation and its stakeholders. Our Whistle-Blowing structure covers internal and external whistle-blowers and extends to the conduct of the stakeholders including employees, vendors, and customers. It provides the framework for reporting suspected breaches of the Corporation's internal policies and laws and regulations.

The is engaging KPMG Professional Services to provide consulting assistance in the implementation of the Whistle Blowing Policy.

Customer Complaints and Resolution

The Corporation in line with the rules of the Securities and Exchange Commissions has implemented Investors Enquiries and Complaints Management Policy.

Highlights of the Corporation's Clawback Policy

The objective of the Clawback policy is to recover excess and undeserved rewards such as bonuses, incentives, profit sharing and other performance-based compensation from current and former Executives and applicable Senior Management employees.

The policy would be triggered if the Corporation's financial performance on which the reward was based is discovered to be materially false, misstated, erroneous or in instances of misdemeanour, fraud, material violation of the Corporation's policy or regulatory infractions.

The Executives, Chief Financial Officer and applicable senior management employee must have served the Corporation during the 'look back period' and incentives paid to them must have been tied to a financial parameter. The policy applies to any incentive-based compensation paid during any of the three fiscal completed years immediately preceding the date the Corporation is required to restate its financial results (look back period), meaning the earlier of:

- The date that the Audit Committee concludes that the Corporation's previously issued financial statement contains a material error or
- The date on which a court, regulator or other similarly authorized body causes the Corporation to restate its financial information to correct a material error.

Highlights of Sustainability Policies

The Corporation's sustainability vision and strategy are underpinned by international principles, frameworks and standards that support the design of best-in-class local policies that enable effective mainstreaming of sustainability in the Corporation for strategic growth and long-term success. The Corporation's policies and frameworks facilitate the

achievement of its vision. The strict adherence to these policies is one of the ways to ensure the Corporation remains a responsible corporate citizen.

Statement of Compliance

We hereby confirm to the best of our knowledge the Corporation has complied with the following Codes of Corporate Governance and Listing Standards

- The Code of Corporate Governance for Public Companies in Nigeria as Issued by the Securities and Exchange Commission
- 2. The Code of Corporate Governance for Bank and Discount Houses in Nigeria and the Guidelines for Whistle Blowing in the Nigerian Banking Industry
- 3. The Financial Reporting Council's Nigerian Code of Corporate Governance
- 4. The Nigerian Exchange Limited Rules for Listing on the Premium Board
- 5. The Post-Listing Rules of the Nigerian Exchange Limited

Save that in the event of any conflict regarding the provisions of the respective Codes and Rules the Corporation will defer to the provisions of the CBN Code as its primary regulator.

Bababode Osunkoya Chairman Sunday Ekwochi Company Secretary

Statement of Directors' Responsibilities in relation to the Consolidated and separate Financial Statements for the period ended 30 June 2022

The Companies and Allied Matters Act and the Bank and Other Financial Institutions Act, require the directors to prepare financial statements for each financial period that gives a true and fair view of the state of financial affairs of the bank and Group at the end of the period and of its profit or loss. The responsibilities include ensuring that the Company and Group;

- Keep proper accounting records that disclose, with reasonable accuracy, the financial position of the Company and Group and comply with the requirements of the Companies and Allied Matters Act and the Banks and Other Financial Institutions Act;
- II. Establish adequate internal controls to safeguard its assets and to prevent and detect fraud and other irregularities; and
- **III.** Prepare financial statements using suitable accounting policies supported by reasonable and prudent judgments and estimates that are consistently applied.

The directors accept responsibility for the annual financial statements, which have been prepared using appropriate

accounting policies supported by reasonable and prudent judgements and estimates, in conformity with;

- International Financial Reporting Standards
- Prudential Guidelines for Licensed Banks in Nigeria;
- Relevant circulars issued by the Central Bank of Nigeria;
- The requirements of the Banks and Other Financial Institutions Act
- The requirements of the Companies and Allied Matters Act; and
- The Financial Reporting Council of Nigeria Act

The directors are of the opinion that the consolidated financial statements give a true and fair view of the state of the financial affairs of the Company and Group and of the financial performance and cash-flows for the period. The directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the directors to indicate that the Company and Group will not remain a going concern for at least twelve months from the date of this statement.

SIGNED ON BEHALF OF THE BOARD OF DIRECTORS BY:

Herbert Wigwe Group Managing Director

Seyi Kumapayi Non Executive Director

FRC/2013/ICAN/00000000911

Report of the statutory audit committee

To the members of Access Holdings company:

In accordance with the provisions of Section 404(7) of the Companies and Allied Matters Act of Nigeria, the members of the Audit Committee of Access Holdings Plc hereby report on the financial statements for the period ended 30 June 2022 as follows:

We have exercised our statutory functions under section 404(7) of the Companies and Allied Matters Act of Nigeria and acknowledge the co-operation of management and staff in the conduct of these responsibilities.

We are of the opinion that the accounting and reporting policies of the Company and Group are in agreement with legal requirements and agreed ethical practices and that the scope and planning of both the external and internal audits for the period ended 30 June 2022 were satisfactory and reinforce the Group's internal control systems.

We are satisfied that the Bank has complied with the provisions of Central Bank of Nigeria Circular BSD/1/2004 dated 18 February 2004 on "Disclosure of insider related credits in the financial statements of banks". We hereby confirm that an aggregate amount of N735,534,445 (December 2021: N268,207,206) was outstanding as at 30 June 2022 and was performing as at 30 June 2022 (see note 45)

We have deliberated on the findings of the external auditors who have confirmed that necessary cooperation was received from management in the course of their audit and we are satisfied with management's responses thereon and with the effectiveness of the Company's system of accounting and internal control.

FRC/2017/ICAN/00000016270 Mr. Henry Omatsola Aragho Chairman, Audit Committee 27 July 2022

Members of the Audit Committee are:

Shareholder Mr. Henry Omatsola Aragho Chairman 1 Mr. Olutoyin Eleoramo Shareholder Member 2 Mr Idaere Gogo Ogan Shareholder Member 3 Mr. Abubakar Jimoh Director Member 4 Mrs. Ojinika Olaghere Director Member 5

In attendance:

Sunday Ekwochi – Company Secretary

Statement of Corporate Responsibility for the Consolidated and separate Financial Statements for the period ended 30 June 2022

In line with the provision of S.405 of CAMA 2020 we have reviewed the audited financial statements of the Group for the period ended 30 June, 2022 and based on our knowledge confirm as follows;

- **I.** The unaudited financial statements do not contain any untrue statement of material fact or omit to state a material fact, which would make the statements misleading under the circumstances they were made
- II. The financial statements and other financial information, included in the report fairly present in all material respects, the financial condition and result of operations of the Group as of, and for the period presented in the report.
- **III.** We are responsible for maintaining internal controls
- IV We have designed such internal controls to ensure that material information relating to the company and its consolidated subsidiaries is made known to such officers by others within those entities particularly during the period in which the period reports are being prepared
- V We have evaluated the effectiveness of the company's internal controls as of date within 90 days prior to the report
- VI We have presented in the report our conclusions about the effectiveness of our internal controls based on our evaluation as of that date
- VII There were no significant deficiencies in the design or operation of internal controls which could adversely affect the Group record, process, summarize and report financial data. Furthermore, there were no identified material weaknesses in the Group Internal Control system.
- VIII We have identified in the report whether or not there were significant changes in internal controls or other factors that could significantly affect internal controls subsequent to the date of their valuation, including any corrective actions with regard to significant deficiencies and material weaknesses.

There were no fraud events involving Senior Management or other employees who have a significant role in the company's internal control.

ENTERPRISE-WIDE RISK MANAGEMENT

With our promise of being more than just a bank, our Enterprise-wide Risk Management (ERM) Policy is hinged on the establishment of a group-wide risk oversight, monitoring and reporting that fosters risk integration. This ensures that the Bank strives for sustainable financial success while strengthening its relationship with a diverse group of stakeholders.

We apply a bespoke risk management framework in identifying, assessing, monitoring, controlling and reporting the inherent and residual risks associated with the pursuit of these ambitions and ensuring they are achieved the right way.

Risk strategies and policies are set by the Board of Directors of Access Holdings. These policies, which define acceptable levels of risk for day-to-day operations as well as the willingness of Access Bank to assume risk, weighed against the expected rewards, are detailed in the Enterprise-Wide Risk Management (ERM) Policy. The ERM is a structured approach to identifying opportunities, assessing the risk inherent in these opportunities and actively managing these risks in a cost-effective manner. Specific policies are also in place for managing risks in the different core risk areas of credit, compliance, market, operational, liquidity, strategic, reputational risks, Information and Cyber Security amongst others.

The Bank's overall risk tolerance is established in the context of our earning power, capital and diversified business model. The organisational structure and business strategy, on the other hand, are aligned with our risk management philosophy.

The Bank uses regular review of risk exposure limits and risk control and self-assessment to position itself against adverse scenarios. This is an invaluable tool with which the Bank predicted and successfully managed both the local and global recessions which continued to impact the macroeconomy. Market volatilities and economic uncertainties are typically contained because the Group regularly subjects its exposures to a range of stress tests across a wide variety of products, currencies, portfolios and customer segments.

The Risk Management Division headed by the Chief Risk Officer is part of the second line of defense and supports the Bank's risk policy by constantly monitoring risk, to identify and quantify significant risk exposures and acting upon such exposures as necessary.

Access Bank approaches risk, capital and value management robustly and we believe that our initiatives and practices todate have positioned the Group at the leading edge of risk management.

RISK MANAGEMENT PHILOSOPHY, CULTURE, APPETITE AND OBJECTIVES

Our Risk Culture Statement:

At Access Bank, we embrace a moderate risk appetite, whilst delivering strategic objectives. We anticipate the risks in our activities and reward behaviour that aligns with our core values, controls and regulations. Challenges are discussed in an open environment of partnership and shared responsibility.

Access Bank's Risk Management philosophy and culture remain fundamental to the delivery of our strategic objectives and are at the core of the group's operating structure. We seek to limit adverse variations in earnings and capital by managing risk exposures within our moderate risk appetite. Our risk management approach includes minimizing undue concentrations of exposure, limiting potential losses from stress events and the prudent management of liquidity.

The Bank's risk management process has continued to achieve desired results as evidenced by improved risk ratios and independent risk ratings. In line with the Bank's core value of excellence, its Risk Management group is continuously evolving and improving, given the context that all market developments, those of extreme nature, need to be anticipated always. Executive Management has remained closely involved with important risk management initiatives, which have focused particularly on preserving appropriate levels of asset quality, liquidity and capital as well as managing the risk portfolios.

Risk management is fundamental to the Group's decision-making and management process. It is embedded in the role of

all employees via the organisational culture, thus enhancing the quality of strategic, capital allocation and day-to-day business decisions.

Access Bank considers risk management philosophy and culture as the set of shared beliefs, values, attitudes and practices that characterise how it considers risk in everything it does, from strategy development and implementation to its day-to-day activities. In this regard, the Bank's risk management philosophy is that a moderate and guarded risk attitude ensures sustainable growth in shareholder value and reputation.

The Bank believes that enterprise risk management provides superior capabilities to identify and assess the full spectrum of risks and enables staff at all levels to better understand and manage risks. This ensures that:

- Risk acceptance is done in a responsible manner
- The Executives and the Board of the Bank have adequate risk management support
- · Uncertain outcomes are better anticipated
- · Accountability is strengthened
- Stewardship is enhanced

The Bank identifies the following attributes as guiding principles for its risk culture.

- a) Management and staff:
 - Consider all forms of risk in decision-making
 - Create and evaluate business-unit and Bank-wide risk profiles to consider what is best for their individual business
 units/department and what is best for the bank as a whole
 - Adopt a portfolio view of risk in addition to understanding individual risk elements
 - Retain ownership and accountability for risk and risk management at the business unit or other points of influence level
 - Accept that enterprise-wide risk management is mandatory and not optional
 - Document and report all significant risks and enterprise-wide risk management deficiencies
 - Adopt a holistic and integrated approach to risk management and bring all risks together under one or a limited number of oversight functions
 - Empower risk officers to perform their duties professionally and independently without undue interference
 - Ensure a clearly defined risk management governance structure
 - Strive to maintain a conservative balance between risk and profit considerations
 - Continue to demonstrate appropriate standards of behaviour in the development of strategy and pursuit of objectives.
- b) Risk officers partner with other stakeholders within and outside the Bank and are guided in the exercise of their powers by a deep sense of responsibility, professionalism and respect for other parties.
- c) The Bank partners with its customers to improve their attitude to risk management and encourage them to build corporate governance culture into their business management
- d) Risk management is governed by well-defined policies, which are clearly communicated across the Bank.
- e) Equal attention is paid to both quantifiable and non-quantifiable risks.
- f) The Bank avoids products and businesses it does not understand.

GROUP RISK OVERSIGHT APPROACH

Managing risk is a fundamental part of banking. Access Bank manages risk as part of a long-term strategy of resilience. Risk management is embedded in all levels of Access Bank's organisation and is part of the daily business activities and strategic planning to have a sustainable competitive advantage.

To achieve its risk management objectives, the Bank relies on a risk management framework that comprises risk policies and procedures formulated for the assessment, measurement, monitoring and reporting of risks including limits set to manage the exposure to quantifiable risks. The Bank recognises that effective risk management is based on a sound risk culture, which is characterised, amongst others, by a high level of awareness concerning risk and risk management in the

organisation.

Our risk governance framework, of which risk appetite framework is a significant element, ensures the appropriate oversight of and accountability for the effective management of risk. Our oversight starts with the strategy setting and business planning process. These plans help us articulate our appetite for risk, which is then set as risk appetite limits for each business unit and subsidiary to work within.

We actively promote a strong risk culture where employees are encouraged to take accountability for identifying and escalating risks.

Expectations on risk culture are regularly communicated by senior management, reinforced through policies and training, and considered in the performance assessment and compensation processes.

The Risk function coordinates the process of monitoring and reporting risks across the Bank and subsidiaries.

Internal Audit has the responsibility of auditing the risk management and control function to ensure that all units charged with risk management perform their roles effectively on a continuous basis. Audit also tests the adequacy of internal control and makes appropriate recommendations where necessary.

RISK APPETITE

Taking all relevant risks and stakeholders into consideration, Access Bank's risk appetite, which is owned by the Board of Directors, expresses the aggregate level of risk that we are willing to assume in the context of achieving our strategic objectives.

Risk appetite is derived using both quantitative and qualitative criteria. Risk appetite in relation to the major risks to which the Bank is exposed is regulated by limits and thresholds. These metrics aid in reaching our financial targets and guiding the Bank's profitability profile.

In accordance with the bank's risk appetite, we are strongly committed to maintaining a moderate risk profile, which has been defined and cascaded in a measurable manner. The risk profile is managed based on an integrated risk management framework. In this framework, all types of risks are identified to provide one integrated view on the risk profile for the Bank and the Group as a whole.

RISK MANAGEMENT OBJECTIVES

The broad risk management objectives of the Bank are:

- · Achieve leading financial stability indicator metrics such as asset quality, capital, liquidity ratios
- To enhance credit ratings, as well as depositor, analyst, investor and regulator perception
- To protect against unforeseen losses and ensure stability of earnings
- Minimise adverse reputation risk issues as well as regulatory compliance issues
- To identify and manage existing and new risks in a planned and coordinated manner with minimal disruption and cost
- To maximize earnings potential and opportunities
- To maximize share price and stakeholder protection
- To develop a risk culture that encourages all staff to identify risks and associated opportunities and to respond to them with cost effective actions.

Scope of risks

Within its risk management framework, Access Bank identifies the following key risk categories among others;

- Credit risk
- Operational risk
- Market and liquidity risk
- Capital Risk Management
- Legal and compliance risk

- Information and Cyber Security risk
- Environmental and Social risk
- Reputational risk
- Strategic risk

Although the risk management framework covers the enterprise-wide risk and the management, specific risk frameworks exist for the individual risk categories.

THE BOARD AND MANAGEMENT COMMITTEES

The Board has ultimate responsibility for the Bank's risk organisation and for ensuring satisfactory internal control. It carries out its oversight function through its standing committees. Each has a charter that clearly defines its purpose, composition, structure, frequency of meetings, duties, tenure, and reporting lines to the Board.

In line with best practice, the Chairman of the Board does not sit on any of the Committees. The Board has seven standing committees: The Board Risk Management Committee, the Board Audit Committee, the Board Remuneration Committee, the Board Governance and Nomination Committee, the Board Credit Committee, the Board Digital and IT Committee and the Board Technical Committee on Retail Expansion

The management committees which exist in the Bank include: The Executive Committee (EXCO), Enterprise-wide Risk Management Committee (ERMC), Management Credit Committee (MCC), Group Asset & Liability Committee (Group ALCO), Digital Steering Committee (DSC), Information Security Council (ISC) and Operational Risk Management Committee (ORMC) among others.

Without prejudice to the roles of these committees, the full Board retains ultimate responsibility for risk management.

Independent auditor's report

To the Members of Access Holdings Plc

Report on the audit of the interim consolidated and separate financial statements

Our opinion

In our opinion, the interim consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of Access Holdings Plc ("the company") and its subsidiaries (together "the group") as at 30 June 2022, and of their consolidated and separate financial performance and their consolidated and separate cash flows for the year then ended in accordance with IAS 34 'Interim Financial Reporting' and the requirements of the Companies and Allied Matters Act and the Financial Reporting Council of Nigeria Act.

What we have audited

Access Holdings Plc's interim consolidated and separate financial statements comprise:

- the consolidated and separate statements of comprehensive income for the six months period ended 30
 June 2022;
- the consolidated and separate statements of financial position as at 30 June 2022;
- the consolidated and separate statements of changes in equity for the six months period then ended;
- · the consolidated and separate statements of cash flows for the six months period then ended; and
- the notes to the interim consolidated and separate financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the interim consolidated and separate financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards), i.e. the IESBA Code issued by the International Ethics Standards Board for Accountants. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the interim consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the interim consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter

Impairment of goodwill (refer to notes 3.13(a), 3.14, 4.0(ii) and 29)

The carrying value of goodwill as at 30 June 2022 is N 12.75 billion and is attributable to the group's acquisitions in Nigeria (N 4.55 billion), Kenya (N 6.55 billion), Rwanda (N 0.68 billion) and Botswana (N 0.97billion).

We identified the impairment assessment of goodwill arising from the acquisitions as a key audit matter due to the materiality, significant judgement and assumptions about the future performance of the cash generating unit (CGU) to which the goodwill has been allocated.

The directors have made a number of key assumptions and assertions to support their assessment of the carrying value of goodwill attributable to this CGU. These include the growth rates and the discount rate applied to forecast performance based on the directors' views of future business prospects.

This is considered a key audit matter in the interim consolidated and separate financial statements.

How our audit addressed the key audit matter

Our procedures in relation to the assessment of the carrying value of the goodwill included:

- assessing the reasonableness of the valuation methodology adopted by the directors;
- challenging the reasonableness of key assumptions around growth rate and discount rate based on our knowledge of the business and industry; and
- reconciling input data used in the cash flow forecasts to supporting evidence, such as prior and current year consolidated and separate financial statements.
- independently determined the recoverable amount of goodwill and compared to the carrying amount in the interim consolidated and separate financial statements; and
- performed a sensitivity analysis to evaluate the potential impact of reasonably possible downside changes in these key assumptions.

We checked the disclosures in the interim consolidated and separate financial statements to the requirements of the accounting standards.

Impairment on loans and advances to customers – *N117.75 billion (refer to notes 3.9, 4.0(i) and 23)*

We focused on this area because the directors exercise significant judgement, using subjective assumptions when determining both the timing and the amounts to recognise as impairment.

IFRS 9 'Financial Instruments' requires significant judgement in measuring expected credit loss

We adopted a substantive approach in assessing the allowance for impairment made by the directors. We performed the following procedures:

- checked that the Group applied a default definition that is consistent with IFRS 9 qualitative default criteria and days past due backstop indicator;
- evaluated the reasonableness of the Group's determination of significant increase in credit risk against our knowledge of the industry;
- applied a risk-based target testing approach in selecting a sample of credit facilities for detailed

(ECL). Areas where significant judgement is exercised include:

- the definition of default adopted by the Group;
- determining the criteria for assessing significant increase in credit risk (SICR);
- determination of the key inputs used in determining the lifetime exposure at default (EAD);
- methodologies adopted by the Group in modelling the probability of default (PD) used in the ECL model;
- estimation of Loss Given Default (LGD) by considering collateral values and assumptions inherent in the model; and
- incorporating forward looking information (crude oil price, inflation rate and interest rate) and the determination of multiple economic scenarios used in the ECL model.

This is considered a key audit matter in the interim consolidated and separate financial statements. reviews of related customer files and account statements.

With the assistance of our credit experts, we:

- tested the appropriateness of the exposure at default by checking whether relevant facility specific information have been incorporated in determining the EAD term structure;
- checked the reasonableness of the methodology used in modelling PD to assess for consistency with acceptable modelling techniques;
- evaluated the reasonableness of the Loss Given Default (LGD) against the methodology applied in estimating recoveries on unsecured exposures. We also assessed the appropriateness of LGD assumptions and the accuracy of the final LGD; and
- checked the reasonableness of forward-looking information (crude oil price, inflation rate and interest rate) and multiple economic scenarios considered.

We evaluated the IFRS 9 disclosures for reasonableness.

Other information

The directors are responsible for the other information. The other information comprises the Corporate Information, Directors' report, Customers' complaints and feedback, Reports to the CBN on Fraud and Forgeries, Corporate Governance Report for half year ended June 30, 2022, Statement of Directors' responsibilities in relation to the consolidated and separate financial statements for the period ended 30 June 2022, Report of the Statutory Audit Committee, Statement of Corporate Responsibility for the consolidated and separate financial statements for the period ended 30 June 2022, Enterprise-Wide Risk Management, Value Added Statement and Five-year Financial Summary, but does not include the interim consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the interim consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the interim consolidated and separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the interim consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors and those charged with governance for the interim consolidated and separate financial statements

The directors are responsible for the preparation of the interim consolidated and separate financial statements that give a true and fair view in accordance with IAS 34 'Interim Financial Reporting' and the requirements of

the Companies and Allied Matters Act, the Financial Reporting Council of Nigeria Act, and for such internal control as the directors determine is necessary to enable the preparation of interim consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the interim consolidated and separate financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the interim consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the interim consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these interim consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the interim consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the interim consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the interim consolidated and separate financial statements, including the disclosures, and whether the interim consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the interim consolidated and separate financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the interim consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

The Companies and Allied Matters Act requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- ii) the company has kept proper books of account, so far as appears from our examination of those books and returns adequate for our audit have been received from branches not visited by us;
- iii) the company's statement of financial position and statement of comprehensive income are in agreement with the books of account and returns.

1.0 General information

Access Holdings Plc ("the company") is domiciled in Nigeria. The address of the company's registered office is No 14/15, Prince Alaba Oniru Road, Oniru, Lagos (formerly Plot 999c, Danmole Street, off Adeola Odeku/Idejo Street, Victoria Island, Lagos). The consolidated and separate financial statements of the Company for the period ended 30 June 2022 comprises of the Holding Company and its subsidiaries (together referred to as "the Group" and separately referred to as "Group entities"). The Group is primarily involved in the provision of banking services and other financial services to corporate and individual customers. The Company is listed on Nigerian Exchange Limited.

These financial statements were approved and authorised for issue by the Board of Directors on 28 July 2022. The directors have the power to amend and reissue the financial statements.

As at the time of this report, only the Banking Group is in operation as a subsidiary of the Holding Company.

2.0 Statement of compliance with International Financial Reporting Standards

The consolidated and separate financial statements of the Group and Company respectively, have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). Additional information required by national regulations are included where appropriate.

3.0 Basis of preparation

This financial statement has been prepared in accordance with the guidelines set by International Financial Reporting Standards (IFRSs) and interpretations issued by the IFRS Interpretations Committee (IFRIC) applicable to companies reporting under IFRS. This consolidated and separate financial statement comprise the consolidated and separate statement of comprehensive income, the consolidated and separate statement of financial position, the consolidated and separate statements of changes in equity, the consolidated and separate cash flow statement and the notes.

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention, modified to include fair valuation of particular financial instruments: non current assets held for sale and investment properties to the extent required or permitted under IFRS as set out in the relevant accounting policies.

3.1 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated and separated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Functional and presentation currency

These consolidated and separate financial statements are presented in Naira, which is the Group's presentation and functional currency; except where indicated, financial information presented in Naira has been rounded to the nearest thousand.

(b) Basis of measurement

These consolidated and separate financial statements have been prepared on the historical cost basis except for the following:

- derivative financial instruments are measured at fair value.
- non-derivative financial instruments at fair value through profit or loss are measured at fair value.
- financial instruments at fair value through OCI are measured at fair value.
- the liability for defined benefit obligations is recognised as the present value of the defined benefit obligation and related current service cost
- non-current assets held for sale measured at lower of carrying amount and fair value less costs to sell.
- share based payment at fair value or an approximation of fair value allowed by the relevant standard.
- Investment properties are measured at fair value.

(c) Use of estimates and judgments

The preparation of the consolidated and separate financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised, if the revision affects only that year, or in the year of the revision and future years, if the revision affects both current and future years.

Information about significant areas of estimation uncertainties and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated and separate financial statements are described in note 4.

3.2 Changes in accounting policy and disclosures

(a) New standards, amendments and interpretations adopted by the Group

A number of new standards became applicable for the current reporting year and the Group had to change its accounting policies and make retrospective adjustments as a result of adopting the following standards:

(a)Forthcoming requirements

As at June 30, 2022, the following standards and interpretations have been issued but were not mandatory for annual reporting years ending on 31 December 2021.

- (i) Reference to the Conceptual Framework Amendments to IFRS 3. Effective date is 1 January 2022
- (ii) Onerous Contracts Cost of Fulfiling a Contract Amendments to IAS 37. Effective date is 1 January 2022
- (iii) Property, Plant and Equipment: Proceeds before intended use Amendments to IAS 16 Effective date is 1 January 2022

Annual Improvements to IFRS Standards 2018 - 2020. Effective date is 1 January 2022

Classification of Liabilities as Current or Non – Current – Amendments to IAS 1. Effective date is 1 January 2023 (deferred from 1 January 2022)

Disclosure of Accounting Policies – Amendments to IAS 1 and IFRS Practice Statements 2. Effective date is 1 January 2023

Disclosure of Accounting Estimates - Amendments to IAS 8. Effective date is 1 January 2023

Deferred Tax related to Assets and Liabilities arising from a Single Transaction – Amendments to IAS 12. Effective date is 1 January 2023

Sale or contribution of assets between an investor and its associate or joint venture – Amendements to IFRS 10and IAS 28. Effective date is to be decided by the International Accounting Standards Board (IASB).

(c) The finance ACT was amended to take effect from 31st December 2021 to include some changes as detailed below.

- (i) Introduction of 10% Capital Gains Tax (CGT) rate on the gains from disposal of shares in any Nigerian company where the gross proceeds from such sales in any 12 consecutive months exceed ₹100million except where the proceeds are reinvested in shares of the same or other Nigerian company within the same year of assessment.
- (ii) Provision of an extension to the period within which minimum tax reduced rate (0.25% tax rate) introduced by Finance Act, 2020 by an additional year, to end on 31 December 2021
- (iii) Capital Allowance Restriction: Capital allowance is now restricted if the tax exempt income for the year is up to 20% of total income.

3.3 Basis of consolidation

(a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group exercise control.

Control is achieved when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity:

- [i] power over the investee;
- [ii] exposure, or rights, to variable returns from its involvement with the investee; and
- [iii] the ability to use its power over the investee to affect the amount of the investor's returns

The Group reassess periodically whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed. The existence and effect of potential voting rights are considered when assessing whether the group controls another entity.

The Group assesses existence of control where it does not have more than 50% of the voting power i.e. when it holds less than a majority of the voting rights of an investee. The group considers all relevant facts and circumstances in assessing whether or not it's voting rights are sufficient to give it power, including:

- [i] a contractual arrangement between the group and other vote holders
- [ii] rights arising from other contractual arrangements
- [iii] the group's voting rights (including voting patterns at previous shareholders' meetings)
- [iv] potential voting rights

The subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

Subsidiaries are measured at cost less impairment in the separate financial statement.

(b) Business combinations

The Group applies IFRS 3 Business Combinations (revised) in accounting for business combinations.

Business combinations are accounted for using the acquisition method as at the acquisition date, which is the date on which control is transferred to the Group. Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, the Group takes into consideration potential voting rights.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; Plus
- the recognized amount of any non-controlling interests in the acquiree; plus if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets acquired and liabilities assumed.

When this total is negative, a gain from a bargain purchase is recognised immediately in statement of comprehensive income.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships. Such amounts are generally recognised in in the income statement.

Transactions costs related to the acquisition, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognised in the income statement.

When share-based payment awards (replacement awards) are required to be exchanged for awards held by the acquiree's employees (acquiree's awards) and relate to past services, then all or a portion of the amount of the acquirer's replacement awards is included in measuring the consideration transferred in the business combination. This determination is based on the market-based value of the replacement awards compared with the market-based value of the acquiree's awards and the extent to which the replacement awards relate to past and/or future service.

The Group elects on a transaction-by-transaction basis whether to measure non-controlling interest at its fair value, or at its proportionate share of the recognised amount of the identifiable net assets, at the acquisition date.

(c) Loss of control

Upon loss of control, the Group derecognises the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. Any surplus or deficit arising on the loss of control is recognised in the income statement. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently it is accounted for as an equity-accounted investee or in accordance with the Group's accounting policy for financial instruments.

(d) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in income statement. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to the income statement.

The gain/loss arising from disposal of subsidiaries is included in the profit/loss of discontinued operations in the statement of comprehensive income, if the disposal subsidiary meets the criteria specified in IFRS 5.

Foreign currency translation differences become realised when the related subsidiary is disposed.

(e) Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(f) Transactions eliminated on consolidation

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognised in assets are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

(g) Non controlling interest

The group recognises non-controlling interests in an acquired entity either at fair value or at the noncontrolling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

3.4 Segment reporting

An operating segment is a component of the Group that engages in business activities from which it can earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Group's other components, whose operating results are reviewed regularly by the Executive Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available.

3.5 Foreign currency translation

(a) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Naira', which is the group and the Company's presentation currency.

The Group in the normal course of business sets up Structured Entries (SEs) for the sole purpose of raising finance in foreign jurisdictions. The SEs raises finance in the currency of their jurisdictions and passes the proceeds to the group entity that set them up. All costs and interest on the borrowing are borne by the sponsoring group entity. These SEs are deemed to be extensions of the sponsoring entity, and hence, their functional currency is the same as that of the sponsoring entity.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the foreign exchange gain or loss in the income statement. Changes in the fair value of monetary securities denominated in foreign currency classified as Fair value through other comprehensive income are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortised cost are recognised in the income statement, and other changes in carrying amount are recognised in other comprehensive income.

Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognised in the income statement as part of the fair value gain or loss. Translation differences on non-monetary financial assets, such as equities classified as fair value through other comprehensive income, are included in other comprehensive income.

(c) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- [i] assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet:
- [ii] income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the rate on the dates of the transactions); and
- [iii] all resulting exchange differences are recognised in other comprehensive income. Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

3.6 Operating income

It is the Group's policy to recognise revenue from a contract when it has been approved by both parties, rights have been clearly identified, payment terms have been defined, the contract has commercial substance, and collectability has been ascertained as probable.

Revenue is recognised when control of goods or services have been transferred. Control of an asset refers to the ability to direct the use of and obtain substantially all of the remaining benefits (potential cash inflows or savings in cash outflows) associated with the asset.

Principal versus Agency considerations

The Group is the principal in an arrangement where it obtains control of the goods or services of another party in advance of transferring control of those goods or services to a customer. The Group is the principal in its card arrangements.

The Group is an agent where its performance obligation is to arrange for another party to provide the goods and services. The Group is the agent in its arrangement with mobile network providers, card vendors and insurance companies.

Where the group is acting as an agent, it recognises as revenue only the commission retained by the group (in other words, revenue is recognised net of the amounts paid to the principal). Where the group is the principal, it will recognise as revenue the gross amount paid and allocated to the performance obligation. It will also recognise an expense for the direct costs of satisfying the performance obligation.

(a) Interest income and expense

Interest income and expense for all interest-bearing financial instruments are recognised within "interest income" and "interest expense" in the consolidated and separate income statement using the effective interest method.

The Group calculates interest income by applying the Effective interest rate (EIR) to the gross carrying amount of financial assets other than credit-impaired assets

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Group calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets is no longer credit-impaired, the Group reverts to calculating interest income on a gross basis.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant year. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter year) to the net carrying amount of the financial asset or liability. When calculating the effective interest rate, the Group estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

The calculation of the effective interest rate includes contractual fees paid or received, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the statement of comprehensive income include:

- interest on financial assets and financial liabilities measured at amortised cost calculated on an effective interest rate basis.
- interest on fair value through other comprehensive income investment securities calculated on an effective interest Interest income on fair value through profit or loss instruments is recognised using the contractual interest rate on investment securities.

(b) Fees and commission income and expense

Fees and commission income and expenses that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Fee and commission presented in the income statement includes:

- Credit related fees: This includes advisory, penal and commitment fees. These are fees charged for administration and advisory services to the customer up to the customer's acceptance of the offer letter. The advisory and commitment fees are earned at the point in time where the customer accepts the offer letter which is when the Group recognises its income. These fees are not integral to the loan, therefore, they are not considered in determining the effective interest rate. The penal fee on default also forms part of the items warehoused in this line. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment year.
- Account maintenance fees: These are fees charged to current accounts. N1 on every N1,000 in respect of all
 customer induced debit transactions is charged on these accounts. These fees are earned by the Group at the time of
 each transaction and the Group recognises its income accordingly.
- Card maintenance fees: The Group charges these fees to customers for maintaining their cards. The fees are earned
 and recognised by the Group over the validity year of the card. The Group charges the customers for this service on a
 monthly basis.
- Other fees and commission income, includes commission on bills and letters of credit, account handling charge, commissions on other financial services, commission on foreign currency denominated transactions, channel and other e-busiess income, and retail account charges. These fees and commissions are recognised as the related services are performed.

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet banking, mobile banking and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions.

(c) Net loss/gains on financial instruments at fair value

Net loss/gains on financial instruments comprise of the following:

- Net gains/losses on financial instruments classified as fair value through profit or loss: This includes the gains and losses arising both on sale of trading instruments and from changes in fair value of derivatives instruments.
- Net gains on financial instruments held as Fair value through other comprehensive income: This relates to gains
 arising from the disposal of financial instruments held as Fair value through other comprehensive income as well as
 fair value changes reclassified from other comprehensive income upon disposal of debt instruments carried at fair
 value through other comprehensive income

(d) Net Foreign exchange gain and losses

Net foreign exchange gain and losses include realised and unrealised foreign exchange gains or losses on revaluation of the foreign currency denominated transactions

(e) Other operating income

Other operating income includes items such as dividends, gains on disposal of properties, rental income, income from asset management, brokerage and agency as well as income from other investments.

Dividend on Fair value through other comprehensive income equity securities: This is recognised when the right to receive payment is established. Dividends are reflected as a component of other operating income in the income statement.

3.7 Income tax

The tax expense for the year comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(a) Current tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities. It is recognized in the current tax liabilities caption in the sattement of financial positions

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the

(b) Minimum Tax

Based on the provisions of The Finance Act, minimum tax will be applicable at 0.25% of gross turnover less franked investment income. This is shown in note 16

(c) Deferred tax

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated statement of financial position. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

3.8 Financial assets and liabilities

Investments and other financial assets

Recognition and derecognition

Financial assets and liabilities are initially recognised on the settlement date, i.e., the date that the Group becomes a party to the contractual provisions of the instrument.

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the group commits to purchase or sell the asset.

(a) Financial assets

i Classification

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured subsequently at amortised cost.

The classification for debt financial assets depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). The group reclassifies debt investments when and only when its business model for managing those assets changes. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss. Where the fair value is different from the transaction price, the resulting gain or loss is recognized in trading gains or losses on financial instruments only when the fair value is evidenced by a quoted price in an active market for an identical asset (i.e. level 1 input) or based on a valuation technique that uses only data from observable markets"

ii Debt instruments

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the contractual cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in Net (loss)/gain on financial instruments at fair value together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.
- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other operating income. Interest income from these financial assets is included in interest income using the effective interest rate method. Foreign exchange gains and losses are presented in net gains/(loss) on financial instruments at fair value and impairment expenses are presented as separate line item in net impairment charge on financial assets
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within net gains/(loss) on financial instruments at fair value in the year in which it arises.

If in a subsequent year, the fair value of an impaired fair value through other comprehensive income debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, then the impairment loss is reversed through the income statement; otherwise, any increase in fair value is recognised through OCI.

The Group only measures cash and balances with banks, Loans and advances to banks and customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

The details of these conditions are outlined below.

iii Equity instruments

The group initially measures all equity investments at fair value through profit or loss. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established. Changes in the fair value of financial assets at FVPL are recognised in net gains/(loss) on financial instrument at fair value in the statement of profit or loss as applicable.

iv Business model assessment

The Group determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Group's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel.
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed.
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).
- The expected frequency, value and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's original expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

v The SPPI test

As a second step of its classification process, the Group assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the year for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

(b) Financial Liabilities

Financial liabilities that are not classified at fair value through profit or loss are measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR. A compound financial instrument which contains both a liability and an equity component is separated at the issue date. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Financial liabilities that are classified at fair value through profit or loss include derivatives, financial liabilities held for trading and other financial liabilities designated as such at initial recognition. Gains and losses attributable to changes in Group's credit risk are recognised in other comprehensive income and the fair value of the liability are recognised in profit or loss.

If recognition of own credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, all fair value gains/losses are recognised in profit or loss.

The table below reconciles classification of financial instruments to the respective IFRS 9 category.

| Financial assets | Financial assets at fair value through profit or loss Financial assets at amortised cost | | | | | |
|-----------------------|--|--|--|--|--|--|
| | Fair value through other comprehensive income | | | | | |
| Financial liabilities | Financial liabilities at fair value through profit or loss | | | | | |
| rmanciai napinties | Financial liabilities at amortised cost | | | | | |

(c) Classification of financial assets

[i] Fair value through profit or loss

This category comprises financial assets classified as hold to sell upon initial recognition.

A financial asset is classified as fair value through profit or loss if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorised measured at fair value through profit or loss unless they are designated and effective as hedging instruments. Financial assets held for trading consist of debt instruments, including money-market instruments, as well as financial assets with embedded derivatives. They are recognised in the consolidated statement of financial position as 'non-pledged trading assets'.

Financial assets included in this category are recognised initially at fair value; transaction costs are taken directly to the consolidated income statement. Gains and losses arising from changes in fair value are included directly in the consolidated income statement and are reported as "Net (loss)/gain on financial instruments at fair value". Interest income and expense and dividend income on financial assets held for trading are included in 'Interest income', "Interest expense' or 'Other operating income', respectively. The instruments are derecognised when the rights to receive cash flows have expired or the Group has transferred substantially all the risks and rewards of ownership and the transfer qualifies for derecognising.

The Group is mandated to classify certain financial assets upon initial recognition as at fair value through profit or loss (fair value option) when the following conditions are met:

- The asset does not meet the solely principal and interest on the principal amount outstanding (SPPI) test
- The financial asset is held within a business model whose objective is achieved by selling financial assets.

The Group may designate certain financial assets upon initial recognition as at fair value through profit or loss (fair value option). This designation cannot subsequently be changed. The fair value option is only applied when the designation eliminates or significantly reduces an accounting mismatch which would otherwise arise.

[ii] Amortized cost

Amortized cost financial assets are non-derivative assets with fixed or determinable payments and fixed maturity and which are not designated at fair value through profit or loss, or fair value through other comprehensive income.

These are initially recognised at fair value including direct and incremental transaction costs and measured subsequently at amortised cost, using the effective interest method. Any sale or reclassification of a significant amount of amortized cost investments not close to their maturity would result in a reassessment of the Group's business model for managing the assets. However, sales and reclassifications in any of the following circumstances would not trigger a reclassification:

- Sales or reclassification that are so close to maturity that changes on the market rate of interest would not have a significant effect on the financial asset's fair value.
- Sales or reclassification after the Group has collected substantially all the asset's original principal.
- Sales or reclassification attributable to non-recurring isolated events beyond the Group's control that could not have been reasonably anticipated.

Interest on amortized cost investments is included in the consolidated income statement and reported as 'Interest income'. In the case of an impairment, the impairment loss is been reported as a deduction from the carrying value of the investment and recognised in the consolidated income statement as 'net impairment loss on financial assets'. Amortised cost investments include treasury bills and bonds.

[iv] Fair value through other comprehensive income

Financial assets at fair value through other comprehensive income are non-derivative investments that are not designated as another category of financial assets. Unquoted equity securities that have been elected as fair value through other comprehensive and other fair value through other comprehensive income investments are carried at fair value.

Interest income is recognised in the income statement using the effective interest method. Dividend income is recognised in the income statement when the Group becomes entitled to the dividend. Foreign exchange gains or losses on such investments are recognised in the income statement.

Other fair value changes are recognised directly in other comprehensive income until the debt investment is sold or impaired whereupon the cumulative gains and loses previously recognised in other comprehensive income are recognised to the income statement as a reclassification adjustment.

Fair value through other comprehensive income instruments include investment securities and equity investments that are so elected.

(d) Classification of financial liabilities

The Group classifies its financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or fair value through profit or loss.

[i] Financial liabilities at amortised cost

(i) Financial liabilities at amortised cost

Financial liabilities that are not classified as at fair value through profit or loss are measured at amortised cost using the effective interest method. Interest expense is included in 'Interest expense' in the Statement of comprehensive income.

Deposits and debt securities issued are the Group's sources of debt funding. When the Group sells a financial asset and simultaneously enters into a "repo" or "stock lending" agreement to repurchase the asset (or a similar asset) at a fixed price on a future date, the arrangement is accounted for as a deposit, and the underlying asset continues to be recognised in the Group's financial statements as pledged assets.

The Group classifies debt instruments as financial liabilities in accordance with the contractual terms of the instrument.

Deposits and debt securities issued are initially measured at fair value minus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method, except where the Group designates liabilities at fair value through profit or loss.

On this statement of financial position, other financial liabilities carried at amortised cost include deposit from banks, deposit from customers, interest bearing borrowings, debt securities issued and other liabilities.

[ii] Financial liabilities at fair value

(ii) Financial liabilities at fair value

The Group may enter into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risk, including foreign exchange forward contracts, interest rate swaps and foreign currency options. Further details of derivative financial instruments are disclosed in Note 21 to the financial statements.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. Derivatives are presented as financial assets or financial liabilities.

Derivative assets and liabilities are only offset if the transactions are with the same counterparty, a legal right of offset exists and the parties intend to settle on a net basis.

Investment under management

Investment under management are funds entrusted to Asset management firms who acts as agents to the company for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Company, who is the principal.

The investment decision made by the Asset management within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.

The investments are carried as fair value through OCI and accounting policy (3.9) that relates to measurement through FVOCI applies

(e) Measurement of financial asset and liabilities

[i] Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

[ii] Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When available, the Group measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily available and represent actual and regularly occurring market transactions on an arm's length basis.

If a market for a financial instrument is not active, the Group establishes fair value using valuation techniques. Valuation techniques include using recent arm's length transactions between knowledgeable, willing parties (if available), reference to the current fair value of other instruments that are substantially the same, and discounted cash flow analysis. The chosen valuation technique makes maximum use of market inputs, relies as little as possible on estimates specific to the Group, incorporates all factors that market participants would consider in setting a price, and is consistent with accepted economic methodologies for pricing financial instruments. Inputs to valuation techniques reasonably represent market expectations and measures of the risk-return factors inherent in the financial instrument. The Group calibrates valuation techniques and tests them for validity using prices from observable current market transactions in the same instrument or based on other available observable market data.

The best evidence of the fair value of a financial instrument at initial recognition is the transaction price – i.e. the fair value of the consideration given or received. However, in some cases, the fair value of a financial instrument on initial recognition may be different to its transaction price. If such fair value is evidenced by comparison with other observable current market transactions in the same instrument (without modification or repackaging) or based on a valuation technique whose variables include only data from observable markets, then the difference is recognised in the income statement on initial recognition of the instrument.

In other cases the difference is not recognised in the income statement immediately but is recognised over the life of the instrument on an appropriate basis or when the instrument is redeemed, transferred or sold, or the fair value becomes observable.

Assets and long positions are measured at a bid price; liabilities and short positions are measured at an asking price. Where the Group has positions with offsetting risks, mid-market prices are used to measure the offsetting risk positions and a bid or asking price adjustment is applied only to the net open position as appropriate. Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the Group entity and the counterparty where appropriate. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes a third-party market participant would take them into account in pricing a transaction.

Reclassification of financial assets and liabilities

(f) Reclassification of financial assets

The Group does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Group changes its business model for managing a financial asset; the Group acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified.

The following are not changes in business model;

- a. change in intention related to particular financial assets (even in circumstances of significant changes in market conditions).
- b. the temporary disappearance of a particular market for financial assets.
- c. a transfer of financial assets between parts of the entity with different business models.

Financial assets other than loans and receivables are permitted to be reclassified out of the fair value through profit or loss category only in rare circumstances arising from a single event that is unusual and highly unlikely to recur in the near-term. In addition, the Group may choose to reclassify financial assets that would meet the definition of loans and receivables out of the fair value through profit or loss or fair value through other comprehensive income categories if the Group has the intention and ability to hold these financial assets for the foreseeable future or until maturity at the date of reclassification.

Reclassifications are made at fair value as of the reclassification date. Fair value becomes the new cost or amortised cost as applicable, and no reversals of fair value gains or losses recorded before reclassification date are subsequently made. Effective interest rates for financial assets reclassified to amortised cost categories are determined at the reclassification date. Further increases in estimates of cash flows adjust effective interest rates prospectively.

Reclassification date

The first day of the first reporting year following the change in business model that results in an entity reclassifying financial assets.

A change in the objective of the Group's business model must be effected before the reclassification date. For example, if Group decides on 15 February to shut down its Corporate & investment Banking business and hence must reclassify all affected financial assets on 1 April (i.e. the first day of the Group's next reporting year), the Group must not accept new Corporate & investment Banking business or otherwise engage in activities consistent with its former business model after 15 February.

All reclassifications are applied prospectively from the reclassification date.

When the Group reclassifies a financial asset between the amortised cost measurement category and the fair value through other comprehensive income measurement category, the recognition of interest income is not changed and it continues to use the same effective interest rate.

However, when the Group reclassifies a financial asset out of the fair value through profit or loss measurement category, the effective interest rate is determined on the basis of the fair value of the asset at the reclassification date.

(g) Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Group derecognises a financial asset or liability, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The terms and conditions have been renegotiated substantially if the discounted cash flows under the new terms are at least 10 per cent different from the discounted remaining cash flows of the original terms. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be Purchased or Originated Credit Impaired (POCI).

When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:

- · Change in currency of the loan
- · Introduction of an equity feature
- · Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

 $(i) \, Derecognition \, other \, than \, for \, substantial \, modification \, \hbox{-}\, Financial \, assets$

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Group also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Group has transferred the financial asset if, and only if, either:

- The Group has transferred its contractual rights to receive cash flows from the financial asset or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass—through' arrangement

Pass-through arrangements are transactions whereby the Group retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Group has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
- The Group cannot sell or pledge the original asset other than as security to the eventual recipients
- The Group has to remit any cash flows it collects on behalf of the eventual recipients without material delay.

In addition, the Group is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the year between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for derecognition if either:

- The Group has transferred substantially all the risks and rewards of the asset or
- The Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

The Group considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Group has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Group's continuing involvement, in which case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Group could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Group would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

$(ii)\ Derecognition\ other\ than\ for\ substantial\ modification\ -\ Financial\ Liabilities$

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms such as the beneficiary, tenor, prinicpal amount or the interest rate, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

(h) Offsetting

Financial assets and liabilities are set off and the net amount presented in the statement of financial position when, and only when, the Group has a legal enforceable right to set off the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRSs, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

Sale and repurchase agreements

Securities sold subject to repurchase agreements ('repos') remain on the statement of financial position; the counterparty liability is included in amounts due to other banks, deposits from banks, other deposits or deposits due to customers, as appropriate. Securities purchased under agreements to resell (reverse repos') are recorded as money market placement. The difference between sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in Net (loss)/gain on financial instruments at fair value.

(i) Measurement of specific financial assets

(i) Cash and balances with banks

Cash and balances with banks include notes and coins on hand, balances held with central banks and highly liquid financial assets with original maturities of less than three months, which are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments.

In the consolidated statement of cash flows, cash and cash equivalents includes cash in hand, unrestricted balances with foreign and central banks, money market placements and other short-term highly liquid investments with original maturities of three months or less.

(ii) Repossessed collateral

Repossessed collateral are equities, investment properties or other investments repossessed from a customer and used to settle the outstanding obligation. Such investments are classified in accordance with the intention of the Group in the asset class which they belong and are also separately disclosed in the financial statement.

When collaterals are repossessed in satisfaction of a loan, the receivable is written down against the allowance for losses. Repossessed collaterals are included in the financial statement based on how the Group intends to realize benefit from such collateral such as "Non current assets held for sale" and carried at the lower of cost or estimated fair value less costs to sell, if the Group intends to sell or cost less accumulated depreciation, if for use in the normal course of business.

(iii) Derivative financial instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets (for example, for exchange-traded options), including recent market transactions, and valuation techniques (for example for swaps and currency transactions), including discounted cash flow models and options pricing models, as appropriate. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The Group mitigates the credit risk of derivatives by holding collateral in the form of cash.

(iv) Pledged assets

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets carried at fair value through profit or loss or investment securities to assets pledged as collateral, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of assets pledged as collateral is at fair value, whilst subsequent measurement is based on the classification of the financial asset. Assets pledged as collateral are either classified as fair value through profit or loss, Fair value through other comprehensive income or Amortized cost. Where the assets pledged as collateral are classified as fair value through profit or loss, subsequent measurement is at fair value through profit and loss, whilst assets pledged as collateral classified as Fair value through other comprehensive income are measured at fair-value through equity. Assets pledged as collateral are measured at amortized cost.

[v] Investment under management

Investment under management are funds entrusted to Asset management firms who acts as agents to the Company for safe keeping and management for investment purpose with returns on the underlying investments accruable to the Company, who is the principal.

The investment decision made by the Asset management is within an agreed portfolio of high quality Nigerian fixed income and money market instruments which are usually short tenured.

The investments are carried at amortized cost.

3.9 Impairment of financial assets

Overview of the ECL principles

The Group assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Staging Assessment

The Group has established a policy to perform an assessment, at the end of each reporting year, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Group categorises its financial instruments into Stage 1, Stage 2, Stage 3, as described below. All POCI (Purchased or originated credit impaired) financial instruments are categorized under stage 3.

- Stage 1: When a financial instrument is first recognised, the Group recognises an allowance based on 12m Expected credit Loss. Stage 1 also includes financial instruments where the credit risk has improved (after review over a period of 90 days) and the financial instruments has been reclassified from Stage 2.
- Stage 2: When a financial instrument has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. Stage 2 financial instruments also include instances, where the credit risk has improved (after review over a period of 90 days) and the financial instrument has been reclassified from Stage 3.
- Stage 3: Financial instruments considered credit-impaired. The Group records an allowance for the Lifetime ECLs.

POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

| Change in cre | dit quality since | • |
|-----------------|-------------------|--------------------------|
| Stage 1 | Stage 2 | Stage 3 |
| Initial | (Initial | (Credit-impaired assets) |
| Recognition) | Recognition) | |
| 2-months | Lifetime | Lifetime expected credit |
| expected credit | expected credit | losses |
| osses | losses | |

Measuring the Expected Credit Loss

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or Lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per Definition of default and creditimpaired above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur
- Loss Given Default represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default (EAD). LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.
- For revolving products, the exposure at default is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on analysis of the Group's recent default data.

When estimating the ECLs, the Group considers three scenarios (optimistic, best-estimate and downturn) and each of these is associated with different PDs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure (i.e. be paid in full or no longer credit-impaired) and the value of collateral or the amount that might be received for selling the asset.

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type.

- For secured products, this is primarily based on collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.
- For unsecured products, LGDs are typically set at product level due to the limitation in recoveries achieved across different borrower. These LGDs are influenced by collection strategies, including contracted debt sales and price.

The group has applied IFRS 9 retrospectively, but has elected not to restate comparative information. As a result, the comparative information provided continues to be accounted for in accordance with the group's previous accounting policy.

The mechanics of the ECL method are summarised below:

- Stage 1: The 12 month ECL is calculated as the portion of Lifetime ECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Group calculates the 12 month ECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast 12 month EAD and multiplied by the expected 12 month LGD and discounted by an approximation to the original EIR. This calculation is made for each of the three scenarios, as explained above.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Group records an allowance for the Lifetime ECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- Stage 3: For loans considered credit-impaired, the Group recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- POCI: Purchase or Originated Credit Impaired (POCI) assets are financial assets that are credit impaired on initial recognition. The Group only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the three scenarios, discounted by the credit adjusted EIR.
- Loan commitments and letters of credit: When estimating Lifetime ECLs for undrawn loan commitments, the Group estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the three scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan.

For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within net impairment charge on financial assets

- Financial guarantee contracts: The Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Group estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the three scenarios. The ECLs related to financial guarantee contracts are recognised within net impairment charge on financial assets
- Sovereign Debt investments at amortised cost and FVOCI are considered to have low credit risk, and the loss allowance recognised during the year was therefore limited to 12 months' expected losses. Management considers 'low credit risk' for such instruemnts to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk where they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

Significant increase in credit risk (SICR)

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

Quantitative criteria:

The remaining Lifetime PD at the reporting date has increased, compared to the residual Lifetime PD expected at the reporting date when the exposure was first recognised.

Deterioration in the credit rating of an obligor either based on the Group's internal rating system or an international credit rating. However, the downgrade considers movement from a grade band to another e.g. Investment grade to Standard. The Group also considers accounts that meet the criteria to be put on the watchlist bucket in line with CBN prudential guidelines since they have significantly increased in credit risk.

Qualitative criteria:

For Retail loans, if the borrower meets one or more of the following criteria:

- In short-term forbearance
- · Direct debit cancellation
- · Extension to the terms granted
- Previous arrears within the last [12] months

For Corporate portfolio, if the borrower is on the watchlist and/or the instrument meets one or more of the following criteria:

- · Significant increase in credit spread
- Significant adverse changes in business, financial and/or economic conditions in which the borrower operates
- Actual or expected forbearance or restructuring
- Actual or expected significant adverse change in operating results of the borrower
- · Significant change in collateral value (secured facilities only) which is expected to increase risk of default
- Early signs of cash flow/liquidity problems such as delay in servicing of trade creditors/loans

The assessment of SICR incorporates forward-looking information and is performed on a quarterly basis at a portfolio level for all Retail financial instruments held by the Group. In relation to Wholesale and Treasury financial instruments, where a Watchlist is used to monitor credit risk, this assessment is performed at the counterparty level and on a periodic basis. The criteria used to identify SICR are monitored and reviewed periodically for appropriateness by the independent Credit Risk team.

For modified financial assets the Group assesses whether there has been a significant increase in credit risk of the financial instrument by comparing the risk of default occurring at the reporting date (based on the modified contractual terms) and the risk of default occurring at initial recognition (based on the original unmodified contractual terms)

Backstop

A backstop indicator is applied and the financial instrument is considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due and 90 days past due on its contractual payments for both stage 2 and stage 3 respectively.

Definition of default and credit-impaired assets

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

Oualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is in long-term forbearance
- · The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenant(s)
- An active market for that financial asset has disappeared because of financial difficulties
- Concessions have been made by the lender relating to the borrower's financial difficulty
- It is becoming probable that the borrower will enter bankruptcy
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses.

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Group's expected loss calculations.

Incorporation of forward looking information and macroeconomic factors

In its ECL models, the Group relies on a broad range of forward looking information as economic inputs. The macroeconomic variables considered for the adjustment of the probabilities of default are listed below:

- Crude oil prices,
- Exchange rates (USD/NGN), and
- GDP growth rate

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

The ECLs include forward-looking information which translates into an allowance for changes in macro-economic conditions and forecasts when estimating lifetime ECLs. It is important to understand the effect of forecasted changes in the macro-economic environment on ECLs, so that an appropriate level of provisions can be raised.

A regression model was built to explain and predict the impact of macro-economic indicators on default rates. Such regression models are usually built on a history of default rates and macro-economic variables covering at least one economic cycle, but preferable more.

Historical data on macro-economic indicators from a host of reliable sources, including the International Monetary Fund was gathered. As a proxy for default rates, the Group provided their non-performing loans as a percentage of gross loans ("NPL%") metric. The time series data extended from the first quarter of 2012 to the second quarter of 2020. Quarterly data was used to increase granularity.

The macro-economic model regressed historical NPL% (the target variable) on a list of candidate macro-economic indicators. The Bank's Economic Intelligence currently monitors and forecasts certain macro-economic indicators. These indicators are GDP growth rate, crude oil prices and the foreign exchange rate. The most predictive variables that were selected in the regression model (the most predictive indicators) were determined. The logic of the relationships between the indicators and the target variable was considered and assessed to ensure indicators are not highly correlated with one another.

The model produced best-estimate, optimistic and downturn forecasts of the selected macro-economic indicators, based on trends in the indicators and macro-economic commentary. This was done through stressing the indicator GDP, which in turn stressed the other indicators based on their assumed historical correlation with GDP. The regression formula obtained was applied to the forecasted macro-economic indicators in order to predict the target variable.

The best-estimate, optimistic and downturn scalars of predicted target variables were determined. In order to remove the impact of any historical trends included in the data, the scalar denominator was adjusted based on the estimation year used to derive the PDs. The scalars calculated were applied to the lifetime PDs. This process results in forward-looking best-estimate, optimistic and downturn lifetime PD curves, which are used in the ECL calculations.

Collateral valuation

To mitigate its credit risks on financial assets, the Group seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Group's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a periodic basis.

To the extent possible, the Group uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as external valuers.

Collateral repossessed

The Group's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Group's policy.

Write-offs

Financial assets are written off either partially or in their entirety only when the Group has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Either the counterparty can no longer pay the obligation or proceeds from the collateral will not be sufficient to pay back the exposure. As directed by CBN guideline on write-off, board approval is required before any write-off can occur. For insider-related loans, CBN approval is required. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount to derecognize the asset. The recovery department continues with recovery efforts and any subsequent recoveries are credited to bad debt recovered under other operating income

Expected credit loss on loans and receivables

The Group considers all loans and advances, financial assets at FVOCI and amortized cost investments at specific level for expected credit loss assessment.

In assessing expected credit loss, the Group uses statistical modeling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current and forecasted economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modeling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate. The ECL on restricted deposits and other assets is calculated using the simplified model approach.

Impairment losses on assets carried at amortised cost are measured as the difference between the carrying amount of the financial assets and the present value of estimated cash flows discounted at the assets' original effective interest rate. Losses are recognised in the income statement and reflected in an allowance account against loans and advances. Interest on the impaired asset continues to be recognised through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss is reversed through profit or loss.

Expected credit loss on fair value through other comprehensive income securities

Impairment losses on fair value through other comprehensive income investment securities are recognised in profit or loss and the impairment provision is not used to reduce the carrying amount of the investment but recognised in other comprehensive income.

For debt securities, the group uses the criteria referred above to assess impairment.

The Group writes off previously impaired loans and advances (and investment securities) when they are determined not to be recoverable. The Group writes off loans or investment debt securities that are impaired (either partially or in full and any related allowance for impairment losses) when the Group credit team determines that there is no realistic prospect of recovery.

3.10 Investment properties

An investment property is an investment in land or buildings held primarily for generating income or capital appreciation and not occupied substantially for use in the operations of the Group. An occupation of more than 15% of the property is considered substantial. Investment properties is measured initially at cost including transaction cost and subsequently carried in the statement of financial position at their fair value and revalued yearly on a systematic basis. Investment properties are not subject to periodic charge for depreciation. Gains or losses arising from changes in the fair value of investment properties are included in the consolidated income statement in the year which it arises as: "Fair value gain/loss on investment property"

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised in income statement inside other operating income or other operating expenses dependent on whether a loss or gain is recognized after the measurement

When the use of a property changes such that it is reclassified as property and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting applicable to property and equipment

3.11 Property and equipment

(a) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditures that are directly attributable to the acquisition of the asset.

When significant parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

The gain or loss on disposal of an item of property and equipment is determined by comparing the proceeds from disposal with the carrying amount of property and equipment, and are recognised net within other operating income in the Income statement.

(b) Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Group and its cost can be measured reliably. The costs of the day-to-day repairs and maintenance of property and equipment are recognised in Income statement as incurred.

(c) Depreciation

Buildings

Depreciation is recognised in the income statement on a straight-line basis to write down the cost of items of property and equipment, to their residual values over the estimated useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for the current and comparative years of significant items of property and equipment are as follows:

Freehold Land Not depreciated

Leasehold improvements and building Over the shorter of the useful life of the item

or lease term 60 years 4.5 years

Computer hardware4.5 yearFurniture and fittings6 yearsMotor vehicles5 years

The asset's residual values and useful lives are reviewed, and adjusted if appropriate, at each date of the statement of financial position. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

Capital work in progress is not depreciated. Upon completion it is transferred to the relevant asset category. Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if appropriate.

(d) De-recognition

An item of property and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included within other operating income in the income statement in the year the asset is derecognised.

3.12 Leases

Group as the Lessee:

The Group leases several assets including buildings and land. Lease terms are negotiated on an individual basis and contain different terms and conditions, including extension options as described in the "extension and termination options header" below. The lease year ranges from 1 year to 40 years. The lease agreements do not impose any covenants, however, leased assets may not be used as security for borrowing purposes.

Contracts may contain both lease and non-lease components. The Group has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Assets and liabilities arising from a lease are initially measured on a present value basis.

Lease liabilities

At commencement date of a lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the Group under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The variable lease payments that do not depend on an index or a rate are recognised as expense in the year in which the event or condition that triggers the payment occurs.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, the Group's incremental borrowing rate is used, being the rate that the Group would have to pay to borrow the funds necessary to obtain an asset of similar value to the right of use asset in a similar economic environment with similar terms, security and conditions. The weighted average incremental borrowing rate applied to the lease liabilities as at 30 June 2022 was 15.31%

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease year so as to produce a constant periodic rate of interest on the remaining balance of the liability for each year. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Right of use assets

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Short-term leases and leases of low value

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered of low value (i.e. low value assets). Low-value assets are assets with lease amount of less than \$5,000 or its equivalent in Naira when new. Lease payments on short-term leases and leases of low-value assets are recognised as expense in profit or loss on a straight-line basis over the lease term.

Extension and termination options

Extension and termination options are included in a number of property leases. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group.

Amendments to IFRS 16: COVID-19-related rent concessions

The amendment is effective for annual reporting years beginning on or after 1 June 2020. Earlier application is permitted. The amendment is also available for interim reports. The changes in Covid-19-Related Rent Concessions (Amendment to IFRS 16) amend IFRS 16 to

- 1) provide lessees with an exemption from assessing whether a COVID-19-related rent concession is a lease modification;
- 2) require lessees that apply the exemption to account for COVID-19-related rent concessions as if they were not lease modifications;
- 3) require lessees that apply the exemption to disclose that fact; and require lessees to apply the exemption retrospectively in accordance with IAS 8, but not require them to restate prior year figures.

The main change from the proposal in the exposure draft is that the IASB had proposed that the practical expedient should only be available for lease payments originally due in 2020. However, after having considered the feedback to the exposure draft, the IASB decided to extend this year to June 2021 to also capture rent concessions granted now and lasting for 12 months.

However, the Group did not receive rent concessions in the 2022 financial year

· Critical judgements

Extension and termination options - Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or years after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee. During the current financial year, the financial effect of revising lease terms to reflect the effect of exercising extension and termination options was a decrease in recognised lease liabilities and right-of-use assets of N309.19 million.

A group company is the lessor;

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return.

3.13 Intangible assets

(a) Goodwill

Goodwill that arises upon the acquisition of subsidiaries is included in intangible assets. Subsequent to initial recognition, goodwill is measured at cost less accumulated impairment losses. Goodwill is tested annually for impairment.

Goodwill is allocated to cash-generating units or groups of cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose identified in accordance with IFRS 8.

Goodwill has an indefinite useful life and is tested annually as well as whenever a trigger event has been observed for impairment by comparing the present value of the expected future cash flows from a cash generating unit with the carrying value of its net assets, including attributable goodwill and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

(b) Software

Software acquired by the Group is stated at cost less accumulated amortisation and accumulated impairment losses. Expenditure on internally developed software is recognised as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred.

Amortisation is recognised in the income statement on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of future economic benefits embodied in the asset. Software has a finite useful life, the estimated useful life of software is four and half years (4.5). Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(c) Brand, Customer Relationships and Core Deposits

These are intangible assets related to acquisitions. At acquisition date, they are initially recorded at their fair value and subsequently at cost less accumulated amortization. Amortization expense is recorded in amortization of intangible assets in the Consolidated Statement of Profit or Loss. Intangible assets are amortized over the period during which the Group derives economic benefits from the assets, on a straight-line basis, over a period of 10 years.

The useful lives of the assets are reviewed annually for any changes in circumstances. The assets are tested annually for impairment or at such time where there is an impairment trigger, or changes in circumstances indicate that their carrying value may not be recoverable.

3.14 Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets other than goodwill and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each year at the same time.

The recoverable amount of goodwill is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of cash inflows of other assets or groups of assets (the "cash-generating unit" or CGU). Subject to an operating segment ceiling test, for the purposes of goodwill impairment testing, CGUs to which goodwill has been allocated are aggregated so that the level at which impairment is tested reflects the lowest level at which goodwill is monitored for internal reporting purposes. Goodwill acquired in a business combination is allocated to the groups of CGUs that are expected to benefit from the synergies of the combination.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior years are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.15 Discontinued operations

The Group presents discontinued operations in a separate line in the consolidated income statement if an entity or a component of an entity has been disposed of or is classified as held for sale and:

- (a) Represents a separate major line of business or geographical area of operations;
- (b) Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; or
- (c) Is a subsidiary acquired exclusively with a view to resale (for example, certain private equity investments).

Net profit from discontinued operations includes the net total of operating profit and loss before tax from operations, including net gain or loss on sale before tax or measurement to fair value less costs to sell and discontinued operations tax expense. A component of an entity comprises operations and cash flows that can be clearly distinguished, operationally and for financial reporting purposes, from the rest of the Group's operations and cash flows. If an entity or a component of an entity is classified as a discontinued operation, the Group restates prior years in the consolidated income statement.

Non-current assets, or disposal groups comprising assets and liabilities, that are expected to be recovered primarily through sale or distribution rather than through continuing use, are classified as held for sale or distribution. Immediately before classification as held for sale or distribution, the assets, or components of a disposal group, are remeasured in accordance with the Group's accounting policies. Thereafter generally the assets, or disposal group, are measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Group's accounting policies.

Impairment losses on initial classification as held for sale or distribution and subsequent gains and losses on remeasurement are recognised in the income statement. Gains are not recognised in excess of any cumulative impairment loss.

Once classified as held for sale or distribution, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

3.16 Non-current assets (or disposal groups) held for sale

Non-current assets (or disposal groups) are classified as assets held for sale when their carrying amount is to be recovered principally through a sale transaction and a sale is considered highly probable. They are stated at the lower of carrying amount and fair value less costs to sell.

Investment property classified as non-current asset held for sale are measured at fair value, gain or loss arising from a

3.17 Provisions

A provision is recognised if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. The increase in the provision due to passage of time is recognised as interest expenses.

(a) Restructuring

A provision for restructuring is recognised when the Group has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for

3.18 Financial guarantees

Financial guarantees which includes Letters of credit are contracts that require the Group to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument. Financial guarantee liabilities are initially recognised at their fair value, and the initial fair value is amortised over the life of the financial guarantee. The guarantee liability is subsequently carried at the higher of this amortised amount and the present value of any expected payment (when a payment under the guarantee has become probable).

Letters of credits which have been guaranteed by the Group but funded by the customer is included in other liabilities while those guaranteed and funded by the Group is included in deposit from financial institutions.

3.19 Employee benefits

(a) Defined contribution plans

A defined contribution plan is a post employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an expense in the income statement when they are due in respect of service rendered before the end of the reporting year.

Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that are due more than 12 months after the end of the reporting year in which the employees render the service are discounted to their present value at the reporting date.

Access Bank Nigeria operates a funded, defined contribution pension scheme for employees. Employees and the Bank contribute 8% and 10% respectively of the qualifying staff salary in line with the provisions of the Pension Reforms Act 2014.

(b) Termination benefits

Termination benefits are payable when employment is terminated by the group before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The group recognises termination benefits at the earlier of the following dates: (a) when the group can no longer withdraw the offer of those benefits; and (b) when the entity recognises costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting year are discounted to their present value.

(c) Post employment defined benefit plan

The Group has a non-contributory, un-funded lump sum defined benefit plan for top executive management of the Group from General Manager and above based on the number of years spent in these positions.

Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade. The Group's net obligation in respect of the long term incentive scheme is calculated by estimating the amount of future benefits that eligible employees have earned in return for service in the current and prior years. That benefit is discounted to determine its present value. The rate used to discount the post employment benefit obligation is determined by reference to the yield on Nigerian Government Bonds, that have maturity dates approximating the terms of the Group's obligations.

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is immediately recognized in the income statement. The Group recognizes all actuarial gains or losses and all expenses arising from defined benefit plan immediately in the balance sheet, with a charge or credit to other comprehensive income (OCI) in the years in which they occur. They are not recycled subsequently in the income statement.

(d) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit-sharing plans if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(e) Share-based payment remuneration scheme

The Group applies IFRS 2 Share Based Payments in accounting for employee remuneration in the form of shares. Employee incentives include awards in the form of shares. The cost of the employee services received in respect of the shares or share granted is recognised in the income statement over the year that employees provide services, generally the year between the date the award is granted or notified and the vesting date of the shares. The overall cost of the award is calculated using the number of shares and options expected to vest and the fair value of the shares or options at the date of grant.

The number of shares expected to vest takes into account the likelihood that performance and service conditions included in the terms of the awards will be met. Failure to meet the non-vesting condition is treated as a forfeiture, resulting in an acceleration of recognition of the cost of the employee services.

The fair value of shares is the market price ruling on the grant date, in some cases adjusted to reflect restrictions on transferability. The cost recognised as a result of shares granted in the year has been expensed within Personnel expenses, with a corresponding increase in the Share scheme reserve

3.20 Share capital and reserves

(a) Share issue costs

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

(b) Additional Tier 1 Capital

This relates to the Group's issued U.S.\$500,000,000 Perpetual Fixed Rate Resettable Non-Callable prior to 5.25 years Additional Tier 1 Subordinated Notes. See note 38(c) for more details

(c) Dividend on the Company's ordinary shares

Dividends on ordinary shares are recognised in equity in the year when approved by the Group's shareholders. Dividends for the year that are declared after the end of the reporting year are dealt with in the subsequent events note.

(d) Treasury shares

Where the Company or any member of the Group purchases the Company's share capital, the consideration paid is deducted from the shareholders' equity as treasury shares until they are cancelled or disposed. Where such shares are subsequently sold or reissued, any consideration received is included in shareholders' equity.

(e) Earnings per share

The Group presents basic and diluted earnings per share (EPS) for its ordinary shares. Basic EPS is calculated by dividing the profit and loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

(f) Regulatory risk reserve

In compliance with the Prudential Guidelines for Licensed Banks, the Group assesses qualifying financial assets using the guidance under the Prudential Guidelines. The guidelines apply objective and subjective criteria towards providing losses in risk assets. Assets are classified as performing or non- performing. Non performing assets are further classed as substandard, doubtful or lost with attendant provisions. There are no restrictions to the distribution of these reserves

| Classification | Percentage | Basis |
|----------------|------------|--|
| Substandard | 10% | Interest and/or principal overdue by 90 days but less than 180 days |
| Doubtful | 50% | Interest and/or principal overdue by 180 days but less than 365 days |
| Lost | 100% | Interest and/or principal overdue by more than 365 days |

A more accelerated provision may be done using the subjective criteria. A 2% provision is taken on all risk assets that are not specifically provisioned.

The results of the application of Prudential Guidelines and the expected credit loss determined for these assets under IFRS 9 are compared. The IFRS 9 determined impairment charge is always included in the income statement.

Where the Prudential Guidelines provision is greater, the difference is appropriated from retained earnings and included in a non - distributable 'Statutory credit reserve'. Where the IFRS 9 exected credit loss is greater, no appropriation is made and the amount of IFRS 9 expected credit loss is recognised in the income statement.

Following an examination, the regulator may also require more amounts to be set aside on risk and other assets. Such additional amounts are recognised as an appropriation from retained earnings to regulatory risk reserve.

(g) Capital reserve

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the Bank in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

(h) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

(i) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency.

(j) Retained earnings

Retained earnings are the carried forward recognised income net of expenses plus current year profit attributable to shareholders.

3.21 Levies

The Group recognizes liability to pay levies progressively if the obligating event occurs over a year. However, if the obligation is triggered on reaching a minimum threshold, the liability is recognised when that minimum threshold is reached. The Group recognizes an asset if it has paid a levy before the obligating event but does not yet have a present obligation to pay that levy. The obligating event that gives rise to a liability to pay a levy is the event identified by the legislation that triggers the obligation to pay the levy.

3.22 Derivatives and hedging activities

Access Holdings Plc applies hedge accounting to manage its foreign exchange risk

Derivatives are initially recognised at fair value on the date a derivative contract is entered into, and they are subsequently remeasured to their fair value at the end of each reporting year. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised liabilities (fair value hedges).

At inception of the hedge relationship, the Group documents the economic relationship between hedging instruments and hedged items, including whether changes in the fairvalue of the hedging instruments are expected to offset changes in the fair value of hedged items. The Group documents its risk management objective and strategy for undertaking its hedge transactions. The Group uses the actual ratio between the hedged item and hedging instruments to determine its hedge ratio.

The fair values of derivative financial instruments designated in hedge relationships are disclosed in notes to the financial statements. The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity is more than 12 months; it is classified as a current asset or liability when the remaining maturity is less than 12 months. Trading derivatives are classified as a current asset or liability.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in profit or loss, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group uses forward contracts to hedge the fair value changes attributable to foreign exchange risk on the hedged item. The Group generally designates only the change in fair value of the forward contract related to the spot component as the hedging instrument. The change in the forward element of the forward contract is not part of the hedging relationship and is recognised separately in the statement of profit or loss within Net gain on financial instruments at fair value through profit or loss. Gains or losses relating to the effective portion of the change in the spot component of the forward contracts are recognised in the profit or loss within Net Foreign Exchange Gain/(Loss) together with the changes in the fair value of the hedged liabilities attributable to foreign exchange risk while the gains or losses relating to the ineffective portion are recognised within Net loss on fair value hedge (Hedging ineffectiveness) in the profit or loss.

Hedge effectiveness

The Group determines hedge effectiveness is at the inception of the hedge relationship, and through periodic prospective effectiveness assessments, to ensure that an economic relationship exists between the hedged item and hedging instrument

Derivatives that do not qualify for hedge accounting

3.23

Associates

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method of accounting, the investments are initially recognised at cost and adjusted thereafter to recognise the group's share of the post-acquisition profits or losses of the investee in profit or loss, and the group's share of movements in other comprehensive income of the investee in other comprehensive income. The group's investment in associates includes goodwill identified on acquisition. In the separate financial statements, investments in associates are carried at cost less impairment.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to the income statement where appropriate.

The Group's share of post-acquisition profit or loss is recognised in the income statement and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses unless it has incurred legal or constructive obligations or made payments on behalf of the associate. Associates are carried at cost.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/(loss)' of associates in the income statement.

Profits and losses resulting from transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the group.

The cost of an associate acquired in stages is measured as the sum of the fair value of the interest previously held plus the cost of any additional consideration transferred as of the date when the investment became an associate. Changes in fair value of previously held interest are recognized in profit or loss.

4.0 Use of estimates and judgements

These disclosures supplement the commentary on financial risk management (see note 5). Estimates where management has applied

- i) Allowance for credit losses
- ii) Assessment of impairment on goodwill on acquired subsidiaries
- iii) Defined benefit plan
- iv) Valuation of unquoted equities
- v) Valuation of derivatives
- vi) Depreciation of property and equipment
- vii) Amortisation of intangible assets
- viii) Impairment of property and equipment
- ix) Impairment of intangible assets
- x) Litigations claims provisions
- xi) Equity settled share-based payment
- xii) Determination of intangible assets arising on business combination

Management has assessed the first four estimates as having the key sources of estimation certainty, and are explained in further detail below. The other estimates have been assessed in their individual accounting policies.

Key sources of estimation uncertainty

(i) Allowances for credit losses

Loans and advances to banks and customers are accounted for at amortised cost and are evaluated for impairment on a basis described in accounting policy (see note 3.9)

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- The Group's internal credit grading model, which assigns PDs to the individual grades
- The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- · Development of ECL models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels, exchange rates, crude oil prices, GDP and collateral values, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

It has been the Group's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

The standard requires recognition of an impairment allowance on financial instruments, based on 12 months or lifetime expected credit losses. The ECL calculations are based on the components discussed in the previous sections.

IFRS 9 requires the calculation of probability-weighted ECL impairments. Three ECL figures were therefore calculated for each scenario (optimistic, best-estimate and downturn ECLs) and probability-weighted to arrive at a single ECL impairment for each account. The likelihood of the best-estimate, downturn and optimistic scenarios were assumed to be 34.67%, 30.00% and 35.33% respectively.

The EIR, as provided by the Group, is used to discount all ECLs to the reporting date. The method followed for accounts classified as Stage 1, Stage 2 or Stage 3 are set out below; For accounts with no EIR information, the contractual rate is used as a proxy

Stage 1

Account-level ECL figures are calculated projecting monthly expected losses for the next 12-months of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and EAD or the collateral adjusted EAD (if secured) at the start of each month.

Stage 2

Account-level ECL figures are calculated projecting monthly expected losses for the remaining lifetime of each account. The forward, macro-adjusted monthly PDs are applied to the applicable LGD estimate and the EAD or collateral adjusted EAD (if secured) at the start of each month.

Stage 3

For the purposes of this model, account-level ECL figures are calculated by applying the applicable LGD estimate to the balance as at the reporting date

The final ECL impairment is calculated as the probability-weighted average of the ECLs produced for the three macro-economic scenarios.

The Group reviews its loan portfolios to assess impairment at least on a half yearly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating a significant increase in credit risk followed by measurable decrease in the estimated future cash flows from a portfolio of loans before the decrease can be identified with that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a bank, or national or local economic conditions that correlate with defaults on assets in the Group.

The Group makes use of estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling future cash flows. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

The specific component of the total allowances for impairment applies to financial assets evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about a debtor's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are independently reviewed by the Credit Risk Management Department (CRMD).

A collective component of the total allowance is established for:

- · Groups of homogeneous loans that are not considered individually significant and
- · Groups of assets that are individually significant but were not found to be individually impaired

Collective allowance for groups of homogeneous loans is established using statistical modelling of historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Collective allowance for group of assets that are individually significant but that were not found to be individually impaired cover credit losses inherent in portfolios of loans and advances and held to maturity investment securities with similar credit characteristics when there is objective evidence to suggest that they contain impaired loans and advances and held to maturity investment securities, but the individual impaired items cannot yet be identified. In assessing the need for collective loan loss allowances, management considers factors such as credit quality, portfolio size, concentrations, and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on estimates of future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances are estimated.

(ia) Sensitivity of Exposure at default - Probability of Default (PD) & Loss Given Default (LGD)

Loans and Advances To Customers

In establishing sensitivity to ECL estimates for corporate loans, four variables (GDP growth rate, Crude Oil Price, inflation and US exchange rate were considered). Of this variables, the Group's corporate loans reflects greater responsiveness to GDP growth rate and crude oil price

On balance Sheet Exposure

GDP growth rate: Given the significant impact on companies performance and collateral valuations Oil price: Given it impacts on purchasing power, demand as well as overall health of the economy

The table below outlines the total ECL for wholesale portfolios as at 31 March 2022, if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs. An increase in Oil Price by 10% resulting in GDP increase and decrease in both inflation rate and exchange rate will lead to an improvement in asset quality by 0.13% and a reduction in impairment by 2.81%. While a drop in Oil Price by 10% leads to a drop in GDP and an increase in inflation and Exchange rate, this will result in a deterioration in asset quality by 0.29% and an increase in impairment by 2.76%.

| | -10% | +10% |
|---|---------|-------|
| P & L Impact of change in Macroeconomic variables | (6,802) | 6,680 |

Off balance Sheet Exposure

GDP growth rate: Given the signficant impact on companies performance and collateral valuations Oil price: Given it impacts on purchasing power, demand as well as overall health of the economy

The table below outlines the total ECL for wholesale off balance sheet exposures as at 31 March 2022, if the assumptions used to measure ECL remain as expected (amount as presented in the statement of financial position), as well as if each of the key assumptions used change by plus or minus 10%. The responsiveness of the ECL estimates to variation in macroeconomic variables have been presented below while putting in perspective, interdependencies between the various economic inputs.

| | -10% | +10% |
|---|-------|------|
| P & L Impact of change in Macroeconomic variables | (397) | 400 |

If the PDs and LGDs were increased by 2%, impairment charge would have further increased by N2.1BN but if the PDs and LGDs were decreased by 2%, there would have been a write back of impairment of N2.2BN.

| | Group June 2022 | Group December 2021 | Company June 2022 | Company December 2021 |
|--|--------------------|------------------------|----------------------|--------------------------|
| Impact on Profit before tax | | | | |
| Increase in LGD and PD by 2% Decrease in LGDs and PD by 2% | (1,218) (1,218) | (2,134) 2,199 | - | - |
| Increase in LGDs and PD by 10% Decrease in LGDs and PD by 10% | (6,089) 6,089 | (10,914) 10,734 | - | - |

Statement of prudential adjustments

Provisions under prudential guidelines are determined using the time based provisioning regime prescribed by the Revised Central Bank of Nigeria (CBN) Prudential Guidelines. This is at variance with the expected credit loss model required by IFRS 9. As a result of the differences in the methodology/provision regime, there will be variances in the impairments allowances required under the two methodologies.

Paragraph 12.4 of the revised Prudential Guidelines for Deposit Money Banks in Nigeria stipulates that Banks would be required to make provisions for loans as prescribed in the relevant IFRS Standards when IFRS is adopted. However, Banks would be required to comply with the following:

- a) Provisions for loans recognised in the profit or loss account should be determined based on the requirements of IFRS. However, the IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in general reserves should be treated as follows:
 - Prudential Provisions is greater than IFRS provisions; the excess provision resulting should be transferred from the retained earnings account to a "regulatory risk reserve".
 - Prudential Provisions is less than IFRS provisions; IFRS determined provision is charged to the statement of comprehensive income. The cumulative balance in the regulatory risk reserve is thereafter reversed to the retained earnings account
- b) The non-distributable reserve should be classified under Tier 1 as part of the core capital. Access Bank Nigeria has complied with the requirements of the prudential guidelines as follows:

| Statement of prudential adjustments In millions of Naira | | June 2022 | December 2021 |
|--|-------|-----------|---------------|
| Company | Note | | |
| Loans & advances: Expected credit loss (ECL) on loans to customers and banks | | | |
| - Loans to banks | 22 | - | - |
| - Loans to individuals | 23(b) | - | - |
| - Loans to corporate | 23(b) | - | - |
| Total impairment allowances on loans per IFRS | • | - | - |
| Total regulatory impairment based on prudential guidelines | | - | <u> </u> |
| Balance, beginning of the period | | - | - |
| Additional transfers to/(from) regulatory risk reserve | | - | - |
| Balance, end of the period | | - | |

The Central Bank of Nigeria (CBN) via its circular BSD/DIR/GEN/LAB/08/052 issued on 11 November 2015, directed banks in Nigeria to increase the general provision on performing loans from 1 percent to 2 percent for prudential review of credit portfolios in order to ensure adequate buffer against unexpected loan losses.

Assessment of impairment of goodwill on acquired subsidiaries

Goodwill on acquired subsidiaries were tested for impairment by comparing the value-in-use for the cash generating unit to the carrying amount of the goodwill based on cash flow projections. Projected cash flows for Kenya were discounted to present value using a discount rate of 23.77% and a cash flow terminal growth rate of 5.47% while Projected cash flows for Rwanda was discounted using a discount rate of 22.63% and terminal growth rate of 6.21%. The Group determined the appropriate discount rate at the end of the year using the Capital Asset Pricing Model. See note 29b for further details.

(iii) Defined benefit plan

(ii)

The present value of the long term incentive plan depends on a number of factors that are determined in an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of obligations. The assumptions used in determining the net cost (income) for pensions include the discount rate. The Group determines the appropriate discount rate at the end of the year. In determining the appropriate discount rate, reference is made to the yield on Nigerian Government Bonds that have maturity dates approximating the terms of the related pension liability. Other key assumptions for pension obligations are based in part on current market conditions. See note 37 for the sensitivity analysis.

(iv) Valuation technique unquoted equity:

The investment valuation policy (IVP) of the Group provides the framework for accounting for the Group's investment in unquoted equity securities while also providing a broad valuation guideline to be adopted in valuing them. Furthermore, the IVP details how the group decides its valuation policies and procedures and analysis of changes in fair value measurements from year to year.

In accordance with IFRS 13 fair value measurement, which outlines three approaches for valuing unquoted equity instruments; market approach, the income approach and the cost approach. The Group estimated the fair value of its investment in each of the unquoted equity securities at the end of the financial year using the market approach.

The adjusted fair value comparison approach of EV/EBITDA, P/E ratios and P/Bv ratios was adopted in valuing each of these equity investments taken into cognizance the suitability of the model to each equity investment and the availability of financial information while minimizing the use of unobservable data.

Description of valuation methodology and inputs:

The fair value of the other unquoted equity securities were derived using the Adjusted fair value comparison technique. Adjusted fair value comparison approach of EV/EBITDA, P/E ratios and P/B ratios are used as input data.

The steps involved in estimating the fair value of the Group's investment in each of the investees (i.e. unquoted equity securities) are as follows:

Step 1:Identify quoted companies with similar line of business ,structure and size

Step 2: Obtain the EV/EBITDA or the P/B or P/E ratios of these quoted companies identified from Bloomberg, Reuters or Nigeria Stock Exchange

Step 3: Derive the average or median of EV/EBITDA or the P/B or P/E ratios of these identified quoted companies

Step 4: Apply the lower of average (mean) or median of the identified quoted companies ratios on the Book Value or Earnings of the investment company to get the value of the investment company

Step 5: Discount the derived value of the investment company by applying an Illiquidity discount and size adjustment/haircut to obtain the Adjusted Equity Value

Step 6: Multiply the adjusted equity value by the present exchange rate for foreign currency investment

Step 7: Compare the Adjusted Equity value with the carrying value of the investment company to arrive at a net gain or loss

a. Enterprise Value (EV):

Enterprise value measures the value of the ongoing operations of a company. It is calculated as the market capitalization plus debt, minority interest and preferred shares, minus total cash and cash equivalents of the company.

b. Earnings Before Interest ,Tax Depreciation and Amortization (EBITDA):

EBITDA is earnings before interest, taxes, depreciation and amortization. EBITDA is one of the indicator's of a company's financial performance and is used as a proxy for the earning potential of a business.

EBITDA = Operating Profit + Depreciation Expense + Amortization Expense

c. Price to Book (P/B Ratio):

The price-to-book ratio (P/B Ratio) is used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest company book value per share or by dividing the company's market capitalization by the company's total book value from its balance sheet.

b. Price to Earning (P/E Ratio):

The price-earnings ratio (P/E Ratio) values a company using the current share price relative to its per-share earnings.

The sources of the observable inputs used for comparable technique were gotten from Reuters, Bloomberg and the Nigeria Stock Exchange

Valuation Assumptions:

- i. Illiquidity discount of 25% is used to discount the value of the investments that are not tradable
- ii. EPS Hair cut "emerging market" discount of 40% to take care of inflation and exchange rate impact being that the comparable companies are in foreign countries

Basis of valuation:

The assets is being valued on a fair open market value approach. This implies that the value is based on the conservative estimates of the reasonable price that can be obtained if and when the subject asset is offered for sale under the present market conditions.

Method of Valuation

The comparative method of valuation is used in the valuation of the asset. This method involves the analysis of recent transaction in such asset within the same asset type and the size of the subject asset after due allowance have been made for peculiar attributes of the various asset concerned.

The key elements of the control framework for the valuation of financial instruments include model validation and independent price verification. These functions are carried out by an appropriately skilled Finance team, independent of the business area responsible for the products. The result of the valuation are reviewed quarterly by senior management.

4.1 Valuation of financial instruments

The table below analyses financial and non-financial instruments measured at fair value at the end of the financial year, by the level in the fair value hierarchy into which the fair value measurement is categorised:

4.1.1 Recurring fair value measurements

In millions of Naira

Group June 2022

Financial instrument measured at fair value

(a) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily of government bonds, corporate bonds, treasury bills and equity investments classified as trading securities or fair value through other comprehensive income investments.

(b) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market are determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3. Specific valuation techniques used to value financial instruments include:

- (i) Quoted market prices or dealer quotes for similar instruments;
- (ii) The fair value of forward foreign exchange contracts is determined using forward exchange rates at the balance sheet date, with the resulting value discounted back to present value;
- (iii) Other techniques, such as discounted cash flow analysis, are used to determine fair value for the remaining financial instruments.

(c) Financial instruments in level 3

The Group uses widely recognised valuation models for determining the fair value of its financial assets. Valuation techniques include net present value and discounted cash flow models, comparison with similar instruments for which market observable prices exist and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value measurement that reflects the price that would be received to sell the asset or paid to transfer the liability in an orderly transaction between market participants at the measurement date.

For more complex instruments, the Group uses proprietary valuation models, which are usually developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain Investment securities for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of the probability of counterparty default and prepayments and selection of appropriate discount rates. Fair value estimates obtained from models are adjusted for any other factors, such as liquidity risk or model uncertainties, to the extent that the Group believes that a third party market participant would take them into account in pricing a transaction. Fair values reflect the credit risk of the Group entity and the counterparty where appropriate.

For level 2 assets, fair value was obtained using a recent market transaction during the year under review. Fair values of unquoted debt securities were derived by interpolating prices of quoted debt securities with similar maturity profile and characteristics. Transfers between fair value hierarchy

The group's policy is to recognise transfers into and out of fair value hierarchy levels as at the end of the reporting period.

4.1. Valuation techniques used to derive Level 2 fair values

Level 2 fair values of investments have been generally derived using the market approach. Below is a table showing sensitivity analysis of material unquoted investments categorised as Level 2 fair values.

| Description | Fair value at 30 June 2022 | Valuation Technique | Observable Inputs | Fair value if inputs increased by 5% | Fair value if inputs decreased by 5% | Relationship of observable inputs to fair value |
|--|-------------------------------|--|---------------------------------|--------------------------------------|---|---|
| Derivative financial assets | 106,425 | Forward and swap: Fair value through market rate from a quoted market | Market rates from quoted market | 93,826 | 94,173 | The higher the market rate, the higher the fair value of the derivative |
| Derivative financial liabilities | 12,425 | Futures: Fair value through reference market rate | | | | financial instrument |
| Investment in CSCS | 5,400 | The market value is obtained from the National Assosciation Of Securities Dealers (NASD) as at the reporting year | Share price from NASD | 5,670 | 5,130 | The higher the share price, the higher the fair value |
| Nigerian Mortgage Refinance Company | 291 | The market value is obtained from the National Assosciation Of Securities Dealers (NASD) as at the reporting year | Share price from NASD | 306 | 277 | The higher the share price, the higher the fair value |

4.1 Valuation techniques used to derive Level 3 fair values

Level 3 fair values of investments have been generally derived using the adjusted fair value comparison approach. Quoted price per earning or price per book value, enterprise value to EBITDA ratios of comparable entities in a similar industry were obtained and adjusted for key factors to reflect estimated ratios of the investment being valued. Adjusting factors used are the Illiquidity Discount which assumes a reduced earning on a private entity in comparison to a publicly quoted entity and the Haircut adjustment which assumes a reduced earning for an entity located in Nigeria contributed by lower transaction levels in comparison to an entity in a developed or emerging market.

| Description | Fair value at 30 June 2022 | Valuation Technique | Observable Inputs | Fair value if inputs increased by 5% | Fair value if inputs decreased by 5% | Fair value if unobservable inputs increased by 5% | Fair value if unobservable inputs decreased by 5% | Relationship of unobservable inputs to fair value |
|--|-------------------------------|---|--|--|--|--|---|--|
| Investment in Africa Finance Corporation | 126,729 | Adjusted fair value comparison approach | Median P/B multiples of comparable companies | 133,065 | 120,392 | 126,346 | 127,112 | The higher the illiquidity ratio, the control premium and the size adjustment/haircut, the higher the fair value |
| Investment in Unified Payment System Limited | 5,445 | Adjusted fair value comparison approach | Median PE ratios of comparable companies | 5,211 | 4,715 | 5,373 | 5,517 | The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value |
| Investment in NIBSS | 12,741 | Adjusted fair value comparison approach | Median P/B multiples of comparable companies | 13,378 | 12,104 | 12,573 | 12,910 | The higher the illiquidity ratio and the size adjustment/haircut, the lower the fair value |

| Balance, period end | 17,00 | 2 13,045 | | - |

(b) Fair value of financial assets and liabilities not carried at fair value

The fair value for financial assets and liabilities that are not carried at fair value were determined respectively as follows:

(i) Cash

The carrying amount of cash and balances with banks is a reasonable approximation of fair value.

(ii) Loans and advances to banks and customers

Loans and advances are net of charges for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

(iii) Investment securities and pledged assets

The fair values are based on market prices from financial market dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

The fair value comprises equity securities and debt instruments. The fair value for these assets are based on estimations using market prices and earning multiples of quoted securities with similar characteristics.

(iv) Other assets

The bulk of these financial assets have short maturities and the amounts is a reasonable approximation of fair value.

(v) Deposits from banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

(vi) Other liabilities

The carrying amount of financial liabilities in other liabilities is a reasonable approximation of fair value. They comprise of short term liabilities which are available on demand to creditors with no contractual rates attached to them.

(vii) Interest bearing borrowings

The estimated fair value of fixed interest-bearing borrowings not quoted in an active market is based on the market rates for similar instruments for these debts over their remaining maturity.

(viii) Debt securities issued

The estimated fair value of floating interest rate debt securities quoted in an active market is based on the quoted market rates as listed on the irish stock exchange for these debts over their remaining maturity.

4.3 Financial assets and liabilities

(a) Fair value measurement
Accounting classification measurement basis and fair values

The table below sets out the classification of each class of financial assets and liabilities, and their fair values.

| | Financial assets designated as FVPL | Financial assets mandatorily measured through FVPL | Financial assets measured at amortized cost | Financial assets measured at FVOCI | Financial liabilities mandatorily measured through FVPL | Financial liabilities measured at amortised cost | Fair value | Total carrying amount |

Credit Risk Management

In Access Holding Plc everyone is involved in Risk Management with ultimate responsibility residing with the Board. We operate the three (3) line of defense model which enhances the understanding of risk management and control by clarifying roles and responsibilities. The risk management process of the Group is well fortified to mitigate and/or eliminate any risk events on the Group's business.

The Risk Management Division has continued to take advantage of advancement and innovation in the technology space to automate the management of risk. Credit and analytics tools are in use to enhance the credit decision making and monitoring process in the Group. The Risk Dashboard has been enhanced to present the Group's measurable risk metrics for ease of decision-making.

Principal Credit Policies

The following are some of the principal credit policies of the Group:

Credit Risk Management Policy: The core objective is to enable maximisation of returns on a risk adjusted basis from banking book credit risk exposures that are brought under the ambit of Credit Risk Management Policy. This is done by putting in place robust credit risk management systems consisting of risk identification, risk measurement, setting of exposure and risk limits, risk monitoring and control as well as reporting of credit risk in the books.

Credit Risk Rating Policy: The objective of this policy is to ensure reliable and consistent Obligor Risk Ratings (ORRs) and Facility Risk Ratings (FRRs) and to provide guidelines for risk rating for retail and non-retail exposures in the banking book covering credit and investment books of the Group.

Responsibilities of Business Units and Independent Credit Risk Management

In Access Holdings Plc, Business Units and independent credit risk management have a joint responsibility for the overall accuracy of risk ratings assigned to obligors and facilities. Business Relationship Managers are responsible for deriving the Obligor Risk Rating ('ORR') and Facility Risk Rating ('FRR') using approved methodologies. However, independent credit risk management officers validates such ratings.

Notwithstanding who derives the risk rating, Credit Risk Management is responsible for reviewing and ensuring the correctness of the ORR and FRR assigned to borrowers and facilities. This review includes ensuring the ongoing consistency of the business' Risk Rating Process with the Group's Risk Rating Policy; ongoing appropriate application of the risk rating process and tools; review of judgmental and qualitative inputs into the risk rating process; ensuring the timeliness and thoroughness of risk rating reviews; and ensuring that the documentation of the risk rating process is complete and current.

Credit Risk Management has the final authority if there is a question about a specific rating.

Credit Process

The Group's credit process starts with portfolio planning and target market identification. Within identified target markets, credits are initiated by relationship managers. The proposed credits are subjected to review and approvals by relevant credit approval authorities. Further to appropriate approvals, loans are disbursed to beneficiaries.

Ongoing management of loans is undertaken by both relationship management teams and our Credit Risk Management Group. The process is applied across the Group and replicated in the subsidiaries.

A loan request is initiated by the relationship officer and reviewed by the relationship manager/Sector Head/Group Head of the respective business teams. Further detailed review is carried out by Credit Risk Management. The concurrence of Credit Risk Management must be obtained for any credit extension. If the loan application passes the detailed analysis, it is submitted to the appropriate approval authority based on the size and risk rating of the facility.

The standard credit evaluation process is based both on quantitative figures from the Financial Statements and on an array of qualitative factors such as the PESTLE analysis, SWOT analysis, Porter's five forces etc. Information on the borrower is collected as well as pertinent macroeconomic data, such as an outlook for the relevant sector. These factors are assessed by the analyst and all individuals involved in the credit approval process, relying not only on quantitative factors but also on extensive knowledge of the company in question, its management, industry, the country of operation and the impact of globalization.

Risk Rating Scale and external rating equivalence

Access Holding Plc operates a 12-grade numeric risk rating scale. The risk rating scale runs from 1 to 8. Rating 1 represents the bestobligors and facilities, while rating 8 represents the worst obligors and facilities. The risk rating scale incorporates sub-grades and full grades reflective of realistic credit migration patterns.

The risk rating scale and the external rating equivalent is detailed below:

| Access Bank risk Rating | External Rating Equivalent | Grade |
|-------------------------|----------------------------|----------------------|
| 1 | AAA | |
| 2+ | AA | Investment Grade |
| 2 | A | investment Grade |
| 2- | BBB | |
| 3+ | BB+ | |
| 3 | BB | Standard Grade |
| 3- | BB- | |
| 4 | В | |
| 5 | В- | |
| 6 | CCC | Non-Investment Grade |
| 7 | С | |
| 8 | D | |

Training / Certification

In line with the CBN's competency framework, members of the Group have consistently upgraded their competency level by passing necessary certification examinations like Certified Risk Manager (Risk Management Association of Nigeria), ACIB (CIBN), ICAN, ACCA, CFA and other relevant professional certifications.

The Group has also entered into partnerships with renowned international firms like Dun and Bradstreet, KPMG and Moody's Analytics for training in Credit Risk Analysis and Financial Risk Management for the first and second lines of defence. These are outside regular trainings conducted within the Group to enhance staff capacity in handling transactions in the dynamic business environment and everevolving banking industry.

Credit Officer Risk Rating

To reshape the understanding of risk, the Group developed a Credit Officer Risk Rating model which assigns rating to credit officers based on the quality and performance of risk asset portfolio managed by the individual officer. This puts the Group in a more disciplined position in the credit appraisal and approval processes.

Credit Risk Control and Mitigation

Authority Limits on Credit

The highest credit approval authority is the Board of Directors, supported by the Board Credit and Finance Committee and followed by the Management Credit Committee. Individuals are also assigned credit approval authorities in line with the Group's criteria for such delegation set out in its Credit Risk and Portfolio Management Plan. The principle of central management of risk and decision authority is maintained by the Group, subject to local regulatory and market requirements in each country.

The credit approval limits of the principal officers of the Group are shown in the table below:

In addition, approval and exposure limits based on internal Obligor Risk Ratings have been approved by the Board for the relevant approving authorities and credit committees as shown in the second table below:

| APPROVING AUTHORITY | APPROVED LIMIT (New Requests) | APPROVED LIMIT |
|--------------------------------|-------------------------------|--------------------------------|
| | (NgN) | (Renewals of Existing Credits) |
| | | (NgN) |
| Executive Director | 150 million | 200 million |
| Group Deputy Managing Director | 400 million | 500 million |
| Group Managing Director/CEO | 500 million | 600 million |

| 3- | o.8 billion | 0.5 billion | 2 billion | |
| 4 | | Above 0.1 billion | | |
| | | | | |

Collateral policies

It is the Group's policy that all credit exposures are adequately collateralised. Credit risk mitigation is an activity of reducing credit risk in an exposure or transferring it to counterparty, at facility level, by a safety net of tangible and realisable securities including approved third-party guarantees/ insurance.

However, the primary consideration for approving credits is hinged largely on the obligor's financial strength and debt-servicing capacity. The guidelines relating to risk mitigants as incorporated in the guidance note of Basel Committee on Banking Supervision ('BCBS') on "Principles for the Management of Credit Risk" are to be taken into consideration while using a credit risk mitigant to control credit risk.

The Group utilizes transaction structure, collateral and guarantees to help mitigate risks (both identified and inherent) in individual credits but transactions should be entered into primarily on the strength of the borrower's repayment capacity. Collateral cannot be a substitute for a comprehensive assessment of the borrower or the counterparty, nor can it compensate for insufficient information. It is recognised that any credit enforcement actions (e.g. foreclosure proceedings) can eliminate the profit margin on the transaction. In addition, we are mindful that the value of collateral may well be impaired by the same factors that have led to the diminished recoverability of the credit.

The range of collaterals acceptable to the Group include:

- Mortgage on landed property (Legal Mortgage/Mortgage Debenture)
- Debenture/Charge on assets (Fixed and/or Floating)
- Cash/Money Market Investment (Letter of lien and Set-Off over fixed deposits/money market investments)
- Treasury bills and other government securities.
- Chattel/vessel Mortgage.
- Legal ownership of financed assets.

Operational Risk Management

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events. Our definition of operational risk excludes regulatory risks, strategic risks and potential losses related solely to judgments about taking credit, market, interest rate, liquidity, or insurance risks.

It also includes the reputation and franchise risk associated with business practices or market conduct in which the Group is involved. Operational risk is inherent in Access Holding's global business activities and, as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management.

This framework includes:

- Recognized ownership of the risk by the businesses.
- Oversight by independent risk management; and
- · Independent review by Internal Audit.

Access Holdings Plc has a Business Continuity Plan that defines how it manages incidents in the case of a disaster or other disruptive incidents, and how to recover its activities within set deadlines. The purpose of the plan is to:

- Predefine the resources and specify actions required to minimize losses that might otherwise result from a business interruption irrespective of cause.
- > Ensure a business-as-usual level of performance while in contingency mode; and
- Ensure the timely and orderly restoration of business activities.

We seek to minimize exposure to operational risk, subject to cost trade-offs. Operational risk exposures are managed through a consistent set of management processes that drive risk identification, assessment, control, and monitoring. Our operational risk strategy seeks to minimize the impact that operational risk can have on shareholders' value. The Group's strategy is to:

- Reduce the likelihood of occurrence of expected events and related cost by managing the risk factors and implementing loss
 prevention or reduction techniques to reduce variation to earnings.
- Minimize the impact of unexpected and catastrophic events and related costs through risk financing strategies that would support the Group's long-term growth, cash flow management and balance sheet protection.
- Eliminate inefficiencies, improve productivity, optimize capital requirements, and improve overall performance through the institution of well designed and implemented internal controls.

In order to create and promote a culture that emphasizes effective operational management and adherence to operating controls, there are three distinct levels of operational risk governance structure in Access Holdings Plc.

Level 1 refers to the oversight function carried out by the Board of Directors, Board Risk Management Committee, and the Executive Management. Responsibilities at this level include ensuring effective management of operational risk and adherence to the approved operational risk policies.

Level 2 refers to the management function carried out by the operational risk management group. It has direct responsibility for formulating and implementing the Group's operational risk management framework including methodologies, policies and procedures approved by the Board.

Level 3 refers to the operational function carried out by all business units and support functions in the Group. These units/functions are fully responsible and accountable for the management of operational risk in their units. They work in liaison with operational risk management to define and review controls to mitigate identified risks. Internal Audit provides independent assessment and evaluation of the Group's operational risk management framework. This periodic confirmation of the existence and utilization of controls in compliance with approved policies and procedures, provides assurance as to the effectiveness of the Group's operational risk management framework. Some of the tools being used to assess, measure, and monitor operational risks in the Group include: a loss database of operational risk events; an effective risk and control self-assessment process that helps to analyze business activities and identify operational risks that could affect the achievement of business objectives; and key risk indicators which are used to monitor operational risks on an ongoing basis.

Allocating Capital to Business Units

An allocation methodology is applied for allocating capital to business units. For each business unit, the allocation takes into consideration not only the size of the business unit, but also measures the business unit's control environment, namely, open audit findings, RCSA results, and loss experience. This translates to a risk-sensitive allocation with the opportunity afforded to business units to identify actions to positively impact on their respective allocated operational risk capital.

Insurance Mitigation

Insurance policies are used to mitigate operational risks. These policies are current and remain applicable at the Bank and Group Level. Insurance coverage is purchased at Group or cluster level to discharge statutory and regulatory duties, or to meet counterparty commitments and stakeholder expectations. The primary insurance policies managed by the Group are:

- Comprehensive crime and electronic crime;
- Directors' and officers' liability; and

o Professional indemnity.

Market Risk Management

The Group's capital and earnings are exposed to risk due to adverse changes in market prices. Consequently, a leading market risk management framework is in place to reduce exposure to adverse changes in interest rate, foreign exchange, equity prices and commodity prices.

The objective is not to completely avoid these risks but to ensure exposure to these risks through our trading and banking book positions are kept within the Group's defined risk appetite and tolerance.

Market Risk Policy Management and Control

Over the years, the Nigerian financial market has witnessed a dramatic expansion in the array of financial services and products. This tremendous growth in scale and scope has also generated new risks with global consequences, especially market risk, necessitating an assessment of exposures to the volatility of the underlying risk drivers. This has prompted the upgrading of the Market Risk Policy; Asset and Liability Management Policy; Liquidity Policy; Stress Testing Policy, and so on, to ensure the risks faced across business activities and on an aggregate basis are within the stipulated risk appetite of the Group. These policies have been benchmarked with industry leading practices and CBN regulations.

The Group runs an integrated and straight through processing treasury system for enabling efficient monitoring and management of interest rate and foreign exchange risks in the Group.

Liquidity, Exchange Rate, and Interest Rate risks are managed through various approaches, viz. Liquidity Gap Analysis, Dynamic Cash Flow Analysis, Liquidity Ratios, Earnings at Risk (EaR) and Sensitivity Analysis. The primary aim of these processes is risk forecasting and impact mitigation through management action and portfolio rebalancing.

The Group regularly conducts stress testing to monitor its vulnerability to unfavorable shocks. It monitors and controls its risk, using various internal and regulatory risk limits for trading book and banking book which are set according to several criteria including economic scenario, business strategy, management experience, peer analysis and the Group's risk appetite.

Banking Book

Market risk management actively manages the Banking book to optimise its income potential. This risk arises from the mismatch between the future yield on assets and their funding cost, due to interest rate changes. The Bank uses a variety of tools to track and manage this risk:

- Re-pricing gap analysis
- Liquidity gap analysis
- Earnings-at-Risk (EAR) using various interest rate forecasts
- Sensitivity Analysis

Interest Rate Risk

Interest rate risk is the exposure of the Group's financial condition to adverse movements in interest rates, yield curves and credit spreads. The Group is exposed to interest rate risk through the interest-bearing assets and liabilities in its trading and banking books.

i. Re-Pricing and Liquidity Gap Analysis

Access Holding's objective for management of interest rate risk in the banking book is to manage interest rate mismatch and lower interest rate risk over an interest rate cycle. This is achieved by hedging material exposures with the external market.

The Group's operations are subject to the risk of interest rate fluctuations to the extent that interest-earning assets and interest-bearing liabilities mature or re-price at different times or in differing amounts. In the case of floating rated assets and liabilities, the Group is exposed to basis risk, which is the difference in re-pricing characteristics of the various floating rate indices, such as the savings rate and 90-day NIBOR and different types of interest.

Non-traded interest rate risk arises in the banking book from the provision of retail and wholesale (non-traded) banking products and services, as well as from certain structural exposures within the Groups balance sheet, mainly due to re-pricing timing differences between assets, liabilities and equities. These risks impact both the earnings and the economic value of the Group. Overall, non-trading interest rate risk positions are managed by Treasury, which uses investment securities, advances to banks and deposits from banks to manage the overall position arising from the Group's non-trading activities.

ii. Earnings-at-Risk Approach

Earnings at risk is the potential change in net income due to adverse movements in interest rates over a defined period. It guides the Group to understand the impact that a change in interest rates can make on our position and projected cash flow.

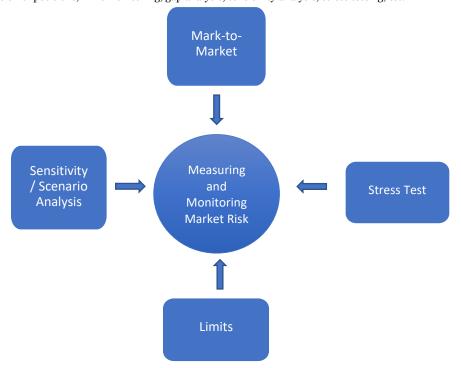

The Group has limits drawn for this risk measure. They are designed to monitor and control the risk to our projected earnings using various rate scenarios and assumptions. The limit is expressed as a change in projected earnings over a specified time horizon and rate scenario. Scenarios adopted by the Group include parallel and non-parallel shifts in yield.

iii. Sensitivity Analysis

The Group employs the use of scenario and sensitivity analysis in evaluating its exposures per time. Scenario analysis is the process of predicting the possible balance sheet impact to changes that may occur to existing variables whilst sensitivity analysis is the study of how the outcome of a decision changes due to variations in input.

Trading Portfolio

The measurement and control techniques used to measure, and control traded market risk (interest rate and foreign exchange risk) include daily valuation of positions, limit monitoring, gap analysis, sensitivity analysis, stress testing, etc.

Limits

The Group uses risk limits to restrict the size of investments that their traders can take for proprietary and non-proprietary purposes. Limiting the size of investments is one of the primary ways the Group controls risk and capital consumption. The following limits currently exist;

Fixed income and FX Open Position Limits (NOPL): The Group, in keeping with the prudence concept, sets its policy limit for Open Position at a level lower than the maximum NOPL approved by the regulatory authority. In setting the internal NOPL, the following considerations are imperative:

- The Regulatory NOPL;
- The Group's tolerance and appetite for FX risk;
- The size and depth of the FX market in Nigeria;
- · The degree of volatility of traded currencies; and
- The Group's desired positioning in the relevant FX market with requirements for international business support.

Inter-bank placement and takings Limit: In line with the Group's drive to be a top liquidity provider in the financial market, stringent controls have been set to ensure that any takings from interbank are preceded by proper authorization, to reduce the risks that come with huge interbank borrowing.

Management Action Trigger (MAT): This establishes decision points to confirm the Board of Directors' tolerance for accepting trading risk losses on a cumulative basis. MAT therefore, considers actual cumulative profit/loss as well as potential losses and the loss tolerance is defined as a percentage of Gross Earnings.

Stop Loss Limit: This limit sets a maximum tolerable unrealised profit/loss to date which will trigger the closing or reduction of a position to avoid any further loss based on existing exposures.

Dealer Limits: This limit sets a maximum transaction limit by a dealer. It is based on experience and knowledge of the dealer.

Duration Limit

The Group utilizes duration to measure the sensitivity of the price of assets in its portfolio to changes in interest rate. The Group has duration limits for the varying asset classes in its investment/trading portfolio.

Mark-to-Market (MTM)

The marking-to-market technique establishes the potential profit and loss by revaluing money market exposures to prevailing market prices. When no market prices are available for a specific contract period, mark-to-model is used to derive the relevant market prices. It is the Group's policy to revalue all exposures categorised under the securities trading portfolio daily. As a general guide, marking to market is performed independently of the trading unit i.e. prices/rates are obtained from external sources.

Stress Testing

A consistent stress testing methodology is applied to trading and non-trading books. The stress testing methodology assumes that the scope for management action would be limited during a stress event, reflecting the decrease in market liquidity that often occurs.

Stress testing is an integral part of the market risk management framework and considers both historical market events and forward-looking scenarios. Stress testing provides an indication of the potential size of losses that could arise in extreme conditions. It helps to identify risk concentrations across business lines and assist senior management in capital planning decisions.

Liquidity Risk Management

Liquidity risk is the potential that the Group may be unable to meet expected or unexpected current or future cash flows and collateral needs without affecting its daily operations or its financial condition. The Group is managed to preserve a high degree of liquidity so that it can meet the requirements of its customers always, including during periods of financial stress.

The Group has developed a liquidity management framework based on a statistical model underpinned by conservative assumptions about cash inflows and the liquidity of liabilities. In addition, liquidity stress tests assuming extreme withdrawal scenarios are performed. These stress tests specify additional liquidity requirements to be met by holdings of liquid assets.

The Group's liquidity has consistently been materially above the minimum liquidity ratio and the requirements of its stress tests. The Group ALCO, in conjunction with the Board and its committees, monitors our liquidity position and reviews the impact of strategic decisions on our liquidity. Liquidity positions are measured by calculating the Group's net liquidity gap and by comparing selected ratios with targets as specified in the Liquidity Risk Management Manual.

Contingency Funding Plan

Access Holdings has a contingency funding plan which incorporates early warning indicators to monitor market conditions. The Group monitors its liquidity position and funding strategies on an ongoing basis, but recognises that unexpected events, economic or market conditions, earnings problems or situations beyond its control could cause either a short or long-term liquidity crisis. It reviews its contingency funding plan annually.

The contingency funding plan covers: the available sources of contingent funding to supplement cash flow shortages; the lead times to obtain such funding; the roles and responsibilities of those involved in the contingency plans; and the communication and escalation requirements when early warning indicators signal deteriorating market conditions. Both short term and long-term funding crises are addressed in the contingency funding plan.

Capital Risk Management

Capital risk is the risk of possible erosion of the Group's capital base due to poor capital management.

Capital management objectives:

The Group has several capital management objectives:

- To meet the capital ratios required by its regulators and the Group's Board.
- To maintain an adequate level of available capital resources as cover for the economic capital (EC) requirements.
- To generate enough capital to support asset growth.

Capital Management Strategy:

The Group's capital management strategy is focused on maximizing shareholder value by optimising the level and mix of capital resources. Decisions on the allocation of capital resources are based on several factors including return on economic capital (EC) and on regulatory capital (RC), and are part of the internal capital adequacy assessment process (ICAAP).

Capital Management Process Annual Forecast Capital transactions Retained profit Assess capital supply alternatives given market demand Equity and other capital transactions issuance, including refinancing of existing capital transactions Stress and scenario testing Stress and scenario testing Stress capital supply given market stressed capital requirement demand and profit and loss Annual Forecast Medium Term Plans Regulatory capital Calculation of Pillar 1 capital requirements for Economic capital Calculation of Pillar 1 capital requirements for Economic capital Review and challenge of Pillar 1 requirements for Economic capital Capital supply demand for economic capital Capital requirement demand of Group economic capital Capital management Stress capital supply given market stressed capital requirement demand and profit and loss

Importance of Capital Management

Capital management is critical to the Group's survival. Hence, capital is managed as a Board level priority in the Group. The Board is responsible for assessing and approving the Group's capital management policy, capital target levels and capital strategy. A capital management framework provides effective capital planning, capital issuance, alignment to Basel accord, EC utilisation and economic profit (EP) performance measurement criteria. The diagram above illustrates the process the Group follows to ensure end-to-end integration of the Group's strategy, risk management and financial processes into the capital management process. The purpose is to ensure that capital consumption in the business divisions is planned for and reflected in their performance measurement, which in turn translates into management performance assessment, product pricing requirements and achievement of the overall strategy within the Group's risk appetite.

Enterprise-Wide Scenario and Stress Testing

Access Holdings uses robust and appropriate scenario stress testing to assess the potential impact on the Group's capital adequacy and strategic plans. Our stress testing and scenario analysis programme are central to the monitoring of strategic and potential risks. It highlights the vulnerabilities of our business and capital plans to the adverse effect of extreme but plausible events. As a part of our core risk management practices, the Group conducts enterprise-wide stress tests on a periodic basis to better understand earnings, capital and liquidity sensitivities to certain economic scenarios, including economic conditions that are more severe than anticipated. We leveraged the Group's ICAAP in the selection of our scenarios and improved on them to ensure they are representative of the recent macroeconomic developments. The outcome of the testing and analysis is also used to assess the potential impact of the relevant scenarios on the demand for regulatory capital compared with its supply. These enterprise-wide stress tests provide an understanding of the potential impacts on our risk profile, capital and liquidity. It generates and considers pertinent and plausible scenarios that have the potential to adversely affect our business. Stress testing and scenario analysis are used to assess the financial and management capability of Access Holdings to continue operating effectively under extreme but plausible trading conditions. Such conditions may arise from economic, legal, political, environmental and social factors. Scenarios are carefully selected by a group drawn from senior business development, risk and finance executives. Impacts on each line of business from each scenario are then analysed and determined, primarily leveraging the models and

processes utilised in everyday management routines. Impacts are assessed along with potential mitigating actions that may be taken in each scenario. Analyses from such stress scenarios are compiled and reviewed through our Group Asset and Liability Committee, and the Enterprise Risk Management Committee. These are then incorporated alongside other core business processes into decision making by management and the Board. These scenario and stress testing procedures were significantly enhanced during the recent pandemic and its macroeconomic fallouts, and the management actions that arose from them were pivotal in enabling the Group to mitigate and optimise risk outcomes and capital.

Compliance Risk Management

The Group's compliance function organizes and sets priorities for the management of its compliance risk in a way that is consistent with risk management strategy and structures.

The integrated compliance function working closely with Internal Audit and Risk Management to achieve risk convergence provided backbone for integrated assurance and higher visibility of risk management and control consciousness across the Group.

The compliance function has continued to redefine and fine-tune its approach and continued to improve on its advisory role with intense focus on regulatory intelligence gathering, compliance monitoring, compliance testing and closer cooperation with business units within the Group. The Group on the other hand acts as a contact point for compliance inquiries from staff members. The Business Unit Compliance Officers and Quality Assurance desk across the business units has further strengthened and deepened the cooperation with the first line of defense.

We enhanced the monitoring to online real time to catch up with the current digital banking environment. We receive alerts of transactions on a risk-based approach by focusing on the high-risk areas thereby spotting non-conformities on time and have also enhanced our Compliance management standard.

Measurement, Monitoring And Management Of Compliance Risk

In Access Holdings, compliance risk is continually:

- Measured by reference to identified metrics, incident assessments (whether affecting Access Holdings or the wider industry), regulatory feedback, Compliance Testing and the judgment of our external assessors as it relates to AML/CFT and other compliance vulnerabilities:
- Monitored against our compliance risk assessments and metrics, the results of the continuous monitoring and reporting activities of
 the compliance function and the results of internal and external audits and regulatory inspections; and
- Managed by establishing and communicating appropriate policies and procedures, training employees on them, and monitoring
 activity to assure their observance.

The Group continues to recognize its accountability to all its stakeholders under the legal and regulatory requirements applicable to its business. The Conduct and Compliance function, including all staff of Access Holdings Plc and its subsidiaries are committed to high standards of integrity and fair dealing in the conduct of business. The Group's compliance risk management philosophy is deepened by the effective convergence of risk management through the "Three Lines of Defence' model.

Effective Compliance Risk Management in Access Holdings and its subsidiaries will continuously be coordinated in the following manner:

• Where a business unit is subject to regulatory requirements, it will comply with those requirements. The business unit will further establish and maintain systems of internal control to monitor and report the extent of compliance with those requirements with the support of the Conduct and Compliance function.

In the absence of regulatory requirements for all or part of a business unit, certain minimum standards of conduct is established and maintained by that business unit to the extent required as determined by the management of that business unit and in line with global best compliance practice.

Information And Cybersecurity Risk Management

The global cybersecurity threat landscape has continued to evolve with increasing dynamism since the onset of the covid-19 pandemic and its impact on social interactions has led to both increased digital collaboration between malicious threat actors and commercialization of cybercrime. Our approach to this malaise is hinged on a proactive cyber strategy that combines a solid defensive foundation, deep threat intelligence and resilient capabilities.

Hence, as part of these strategic initiatives, the Group established a comprehensive cybersecurity framework and also implemented a defense-in-depth approach to protect our information assets (most especially our crown jewels), our human capital, and our business

across Access Nation. The Security function has been expanded to cover Cybersecurity Governance, 3rd Party Risk & API Management, Forensic Analysis, and Incident Response.

A key digital change in the bank's mode of operations reflecting a gradual approach to normalcy as part of the post covid-19 pandemic recovery phased activities is the physical resumption of most of our employees at the office after a long spell of remote work and the positivity it reflects. We understand that everyone still has to remain on their guard and follow proper public hygiene protocols. On the digital front, this reflected in our steady drive to improve incident detection and response capabilities to deliver more resiliency and prevent breaches across the enterprise.

Our position as the leading retail bank in Nigeria, coupled with our ongoing expansion drive with over 45 million customers means we cannot afford to rest on our oars nor drop our guard given the digital threat landscape and constant operational security challenges of our environments. Therefore, a particular initiative that our proactive and defensive measures deliver is a reduction of our attack surface to the barest minimum to ensure there is no financial loss to the bank. We are also constantly improving on our visibility into potential anomalous digital interactions across the enterprise through our World Class 24/7 Security Operations Center (SOC).

We have also implemented global best-practice security frameworks to ensure compliance with both regulatory requirements and international standards. This is followed up with a yearly compliance reassessment of our status as part of our cyber governance across Access Nation. Our human capital is a cardinal part of our strategy and their capability is constantly being honed through our bank-wide user awareness training. Through this, our technical controls are well complemented by an alert workforce, whose ability to recognize the tricks of hackers with their malicious appendages are highly developed, therefore, disrupting the cyber kill-chain and improving our collective resistance to social engineering attacks.

The constant improvement and breakthroughs in technology, as well as the never-ending desire to improve services, have made Digital Banking, Fintech Integration & Cloud Adoption Strategy a pathway that the Bank must pursue. Therefore, as we work towards realising these objectives, the implementation of proper risk mitigation measures will reduce the business risks, inherent in these opportunities, to the bank and deliver more optimal outcomes. We are committed to maintaining a "moderate overall cyber risk appetite" while driving compliance and resilience across Access Nation.

Environmental And Social Risk Management

The underpinning import of our environmental and social ("E&S") risk management strategy is to reduce the negative impacts of climate change and harnessing opportunities inherent in portfolio transition into near-zero economy on our business. We recognise that our customers' activities and operations can have an impact on the environment and communities around them. We have developed, implemented, and refined our approach to working with our customers to understand and manage these issues. Our robust governance framework, policies and procedures has ensured that we remain resilient in our E&S risk management commitments, particularly as the Bank has acquired new markets in the African continent and across the globe. We believe that the key to managing environmental risk is creating partnerships with our customers, assisting them on their transition path to more sustainable environmental practices. More importantly, our Environmental, Social and Governance (ESG) systems have evolved from environmental and social risks into environmental and social opportunities. This continuous evolution has ensured that we continually strive towards attaining a more refined ESG risk management structure.

Responding to Climate Change

We consider climate change to be one of the greatest challenges facing the world today. We are dedicated to achieving the commitments of the Paris Agreement on carbon emissions reductions, whilst ensuring that we stay focused on managing the potential environmental issues for Access Bank. With the increasing awareness around financed emissions and the impact of climate change potential within our portfolio, we have taken strategic steps towards understanding these potential exposures, their implications and incorporating requisite mitigating measures to forestall these risks. The Bank has therefore taken forward-looking measures by becoming a core participating member of internationally recognized climate risk initiative. These initiatives include:

UNEP FI's Taskforce on Climate related Financial Disclosures (TCFD) adopted by leading globally financial institutions, and aimed at identifying and managing the impact of climate risks in the portfolio of Financial Institutions. Access Bank became a member of the working group in 2019. We have been working on aligning the emissions from both our own operations and our financing activities to the Paris Goal of below two degrees of global warming.

Partnership for Carbon Accounting Financials (PCAF) is a global partnership aimed at harmonizing the approach in accessing and disclosing greenhouse gas (GHG) emissions associated with loans and investments. Access Bank became a member of the steering group in June 2020. We have commenced building capacity around data collection and incorporating the PCAF methodology to measure our financed emissions.

We have also further developed our climate risk strategy by expanding our portfolio of green assets. We have designed a system to identify, measure, track and report on the progress made in developing a diversified green loan portfolio. We recognize the critical role green product development plays in achieving this objective, and we are at an advanced stage in developing a bouquet of green products to catalyze more green loans into our loan portfolio. We recently bagged the Global Finance Sustainable Finance Awards under the category of Outstanding Leadership in Green Loans (Africa). This is a testament to our unwavering commitment to accelerating the global transition to net-zero. We have also set targets towards reducing the carbon emissions from our operations and have made a strong start towards achieving this goal.

Reputational Risk Management

Reputational risk arises when the Bank's reputation is damaged by one or more reputational events from negative publicity about the organisation's business practices, conduct or financial condition. The Bank's Reputational Risk Management is mandated to protect the Bank from potential threats to its reputation. The team continuously uses proactive means in minimizing the effects of reputational events, thereby averting the likelihood of major reputational crises with the view of ultimately ensuring the survival of the organisation. The Bank has put in place a framework to properly articulate, analyze and manage reputational risk factors.

Access Holdings takes the management of reputational risks seriously because of its far-reaching implications, which are buttressed by the fact that the Bank operates under:

- A highly regulated financial services industry with high visibility and vulnerability to regulatory actions that may adversely
 impact its reputation. (e.g. corporate governance crises);
- Keen competition and largely homogeneous products and services have led customers not to perceive significant differences between financial service providers; and
- Given the financing nature of products and services they provide, banks are not only exposed to their own reputation, but also
 to the reputation of their clients.

With the group operating and competing in a global environment, risks emerging from a host of different sources and locations are difficult to keep up with and to know how best to respond if they occur. The effects of the occurrence of a reputational risk event include but are not limited to the following:

- Loss of current or future customers;
- Loss of public confidence;
- Loss of employees leading to an increase in hiring costs, or staff downtime;
- Reduction in current or future business partners;
- Increased costs of capitalization via credit or equity markets;
- Regulatory sanctions;
- Increased costs due to government regulations, fines, or other penalties; and
- Loss of banking license.

The Group policy provides for the protection of the Group's reputation and should at all times take priority over all other activities, including revenue generation. Reputational risk will arise from the failure to effectively mitigate any or a combination of country, credit, liquidity, market, regulatory and operational risk. It may also arise from the failure to comply with social, environmental governance and ethical standards. All employees are responsible for day-to-day identification and management of reputational risk.

Compilation Of Trigger Events

To assist in the identification of key reputational risk events, triggers that would set off the risk drivers are compiled through workshops with participants from relevant business units. The following table illustrates some trigger events for relevant risk drivers.

| Risk Drivers | Trigger Events |
|-------------------------------------|--|
| Corporate governance and leadership | Corporate frauds and scandals; Association with dishonest and disreputable characters as directors, management Association with politically exposed persons Incidence of shareholders conflict and Board Instability. |
| Regulatory Compliance | • Non-Compliance with laws and regulation; |

| | Non-submission of Regulatory returns |
|--|--|
| Delivering customer promise | Security FailureShortfall in quality of service/fair treatment;Bad behavior by employees |
| Workplace talent and culture | Unfair employment practices Not addressing employee grievances Uncompetitive remuneration |
| Corporate social responsibility | • Lack of community development initiatives |
| Corporate Culture | Lack of appropriate culture to support the achievement of business objective. Ineffective risk management practices. Unethical behaviors on the part of staff and management. Lack of appropriate structure for employees to voice their concerns |
| Risk Management and Control Environment | Inadequate Risk Management and Control environment Continuous violations of existing policies and procedures |
| Financial Soundness and Business viability | Consistent poor financial performance Substantial losses from unsuccessful Investment |
| Crisis Management | Inadequate response to a crisis or even a minor incident |

Approach To Managing Reputation Risk Events

The Group's approach to managing reputation events, including any relevant strategy and policies, is approved by the Board or its delegated committee and subject to periodic review and update by senior management to ensure that it remains appropriate over time. In addition, the approach is well documented and communicated to all relevant personnel.

Post Reputation Event Reviews

After a reputation event, the post-event review is conducted by Internal Audit and Risk Management Division to identify any lessons learnt, or problems and weaknesses revealed, from the event. Such reviews are useful for providing feedback and recommendations for enhancing the Bank's reputation risk management process and should at least be conducted on any major event affecting Access Bank. The Board and senior management are informed of the results of any such review conducted in order to take appropriate actions to improve their capacity to manage reputational risk.

Strategic Risk Management

In Access Holdings, we define Strategic Risk Management as the process for identifying, assessing and managing risks and uncertainties affected by internal and external events or scenarios that could inhibit the Group's ability to achieve its strategy and strategic objectives with the ultimate goal of creating and protecting shareholder and stakeholder value. It is a primary component and necessary foundation of our Enterprise Risk Management.

Strategic risk management, therefore, is the current or prospective risk to earnings and capital arising from adverse business decisions, improper implementation of decisions or lack of responsiveness to changes in the business environment. It can also be defined as the risk associated with future business plans and strategies, including plans for entering new business lines, expanding existing services through mergers and acquisitions, and enhancing infrastructure.

The following principles govern the Group's strategic risk management:

The Board and Senior Management are responsible for Strategic Risk Management and oversee the effective functioning of the strategic risk management framework.

The functional units (i.e. the units which carry out business or operational functions) assist the Board and Senior management in formulating and implementing strategies, providing input to the strategic planning and management processes; and as well as implementing the strategic risk management framework.

The strategic risk management function supports the Board and senior management in managing strategic risks and other related processes in the Bank.

The measures and controls it has put in place include the following:

- Strategic plans are approved and monitored by the Board.
- Regular environmental scan, business strategy session and workshops are set up to discuss business decisions and
 exposure to strategic risk triggers.
- Close monitoring to ensure that strategic plans are properly aligned with the business model.
- · Regular performance review by Executive Management and business plans that are approved by the Board.

The Group also maintains a well-defined succession plan, proper monitoring and well-defined structures to align its activities to international best practices.

Economic Intelligence

Economic Intelligence (EI) is in the business of positioning economic, business and financial information as tools for helping the Group achieve its long-term strategic objectives. Its value propositions include supporting the Group in achieving its moderate risk appetite, price competitiveness, improvement to business intelligence and brand enhancement.

Some of the Unit's Roles and Responsibilities include:

- Monitoring and interpreting current economic developments/trends globally and wherever the Group has presence and preparing economic outlook to aid decision making.
- Proactively providing industry analysis, identifying investment trends and opportunities for the Group; monitoring, interpreting, and conducting policy-relevant research.
- Developing contact and collaborative economic/business and financial information with research institutes/ bodies within the country and outside.

5.1 Credit risk management

5.1.1 Maximum exposure to credit risk before collateral held or other credit enhancements Credit risk exposures relating to financial assets are as follows:

| Le collina de CN diam | Group | Group | Company | Company |
|--|------------------|---------------|------------------|---------------|
| In millions of Naira | <u>June 2022</u> | December 2021 | <u>June 2022</u> | December 2021 |
| Cash and balances with banks | | | | |

Collateral held and other credit enhancements, and their financial effect

The general creditworthiness of a customer tends to be the most relevant indicator of credit quality of a loan extended to it. However, collateral provides additional consideration in the credit process and the Group generally requests that corporate borrowers provide collateral. The Group may take collateral in the form of a first charge over real estate, floating charges over all corporate assets and other liens and guarantees. The Bank will sell or repossess a pledged collateral only in the event of a default and after exploring other means of repayment. In addition to the Group's focus on creditworthiness, the Group aligns with its Credit Policy Guide to periodically review the valuations of collaterals held against all loans to customers. This is done in line with the approved Framework for valuing various categories of collateral accepted by the Bank.

The fair values of collaterals are based upon last annual valuation undertaken by independent valuers on behalf of the bank. The valuation technique adopted for properties are based on fair values of similar properties in the neighborhood.

The fair values of non-property collaterals (such as equities, bond, treasury bills, etc.) are determined with reference to market quoted prices or market values of similar instruments.

There are no collaterals held against other financial assets. The Group obtained a property during the year by taking possession of collateral held as security against a loan. The Group's policy is to pursue timely realisation of the collateral in an orderly manner. The Group does not generally use the non-cash collateral for its own operations. Hence, the repossessed collateral has been included in assets classified as held for sale (Note 31).

5.1.5 (a) Credit concentration

The Group's risk profile is assessed through a 'bottom-up' analytical approach covering all of the Group's major businesses and products. The risk appetite is approved by the Board and forms the basis for establishing the risk parameters within which the businesses must operate, including policies, concentration limits and business mix.

The Group monitors concentrations of credit risk by sector and by geographic location. An analysis of concentrations of net credit risk at the reporting date is shown below:

5.1.5(a)i Concentration by location for loans and advances is measured based on the location of the Group entity holding the asset, which has a high correlation with the location of the borrower. Concentration by location for investment securities is measured based on the location of the issuer of the security.

Market risk management

5.2. Interest rate gap position

Repricing gap measures the difference between the Group's interest sensitive assets and liabilities within certain maturity ranges. Differences between these assets and liabilities pose as potential losses from unexpected changes in interest rate. Negative Gaps represent situations when assets are less than liabilities and the Group is exposed to an increase in interest rates. Where assets are more than liabilities this can be described as positive gap and the Group is exposed to decline in interest rates.

The results above shows a negative gap of N5.22billion (Bank: N385.6Mn) in the 'less than 3 months' time bucket, however this is as a result of the contractual nature of Non Maturity deposits. A significant portion of this gap is as a result of the contractual nature of Non Maturing Deposits.

A summary of the Group's interest rate gap position on financial instruments is as follows:

| Group | Re-pricing year | | | | | | |
|---|--------------------|--------------|---------------|-------------|-------------------|-------------------------|------------|
| In millions of Naira June 2022 | Less than 3 months | 4 - 6 months | 7 - 12 months | 1 - 5 years | More than 5 years | Non-Interest bearing | Total |

Market risk management

The Group trades on bonds, treasury bills and foreign currency. Market risk in trading portfolios is monitored and controlled using tools such as position limits, value at risk and present value of an assumed basis points change in yields or exchange rates coupled with concentration limits. The major measurement technique used to measure and control market risk is outlined below.

The table below sets out information on the exposure to fixed and variable interest instruments.

Derivative financial instruments include elements of interest rate differential between the applicable underlying currencies. Further details on the fair value of derivatives have been discussed in Note 21 of the financial statement.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. The Board sets limits on the level of mismatch of interest rate repricing (note 5.2.1) that may be undertaken, which is monitored daily by Group Treasury.

Cash flow and fair value interest rate risk

The group's interest rate risk arises from risk assets, long-term borrowings, deposits from banks and customers. Borrowings issued at variable rates expose the group to cash flow interest rate risk.

The management of interest rate risk against interest rate gap limits is supplemented with monitoring the sensitivity of the Group's financial assets and liabilities to various scenarios.

Interest rate movement have both cash flow and fair value effect depending on whether interest rate is fixed or floating. The impact resulting from adverse or favourable movement flows from either retained earnings or OCI and ultimately ends in equity in the following manner:

- (i) Retained earnings arising from increase or decrease in net interest income and the fair value changes reported in profit or loss.
- (ii) Fair value reserves arising from increases or decreases in fair value through other comprehensive income financial instruments report directly in other comprehensive income.

Cash flow interest rate risk

| Time Band | 100 basis points decline in rates | 100 basis points increase in rates |
|--------------------|-----------------------------------|------------------------------------|
| Less than 3 months | 25,716 | (25,716) |
| 6 months | 2,202 | (2,202) |
| 12 months | (3,649) | 3,649 |
| | 24,269 | (24,269) |

The table above sets out the impact on net interest income of a 100 basis points parallel fall or rise in all yields. A parallel increase in yields by 100 basis points would lead to an increase in net interest income while a parallel fall in yields by 100 basis points would lead to a decline in net interest income. The interest rate sensitivities are based on simplified scenarios and assumptions, including that all positions will be retained and rolled over upon maturity. The figures represent the effect of movements in net interest income based on the 100 basis point shift in interest rate and subject to the current interest rate exposures. However, the effect has not taken into account the possible risk management measures undertaken by the Bank to mitigate interest rate risk. In practice, the Assets and Liability Committee, ALCO seeks proactively to change the interest rate risk profile to minimize losses and optimise net revenues. The projections also assume that interest rates on various maturities will move within similar ranges, and therefore do not reflect any potential effect on net interest income in the event that some interest rates may change and others remain unchanged.

Price sensitivity analysis on bonds, promissory notes and treasury bills

The table below shows the impact of likely movement in yields on the value of bonds and treasury bills. This relates to the positions held for fair value through profit or loss and fair value through other comprehensive income. Since an increase in yields would lead to decline in market values of bonds and treasury bills, the analysis was carried out to show the likely impact of 50 and 100 basis points increase in market yields. The impact of fair value through profit or loss investments is on the income statement while the impact of fair value through other comprehensive income instruments is on the statement of other comprehensive income.

| Group June 2022 | Carrying Value | Impact of 50 basis points increase in yields | Impact of 100 basis points increase in yields | |

Foreign currency sensitivity analysis

The Group's principal foreign currency exposure is to US Dollars, as it constitutes a significant portion of the Group's foreign currency exposure as at 30 June 2022. The table below illustrates the hypothetical sensitivity of the Group and Bank's reported profit to a 5% increase in the US Dollar/Naira exchange rates at the year end, assuming all other variables remain unchanged. The sensitivity rate of 5% increase represents the directors' assessment of a reasonable possible change based on historic volatility.

The analysis assumes that exchange rate fluctuations on currency derivatives that form part of an effective fair value hedge affects the income statement and the fair value of the hedging derivatives. For foreign exchange derivatives which are not designated hedges, movements in exchange rates impact the income statement.

The NGN/USD exchange rate applied in the conversion of balances as at period end is N421.29/USD1 (2021: N424.11/USD1). The strengthening or weakening of Naira may not produce symmetrical results depending on the proportion and nature of balance sheet and the impact of derivatives.

| Deposits from other financial | (671,547) | (799,015) |
| institutions | | |

The Group uses foreign currency forwards to hedge its exposure to foreign currency risk on the US dollar denominated interest bearing loans and deposits for financial institutions. Under the Group's policy, the critical terms of the forward should align closely with the hedged items.

The Group only designates the spot component of foreign currency forwards in hedge relationships. The spot component is determined with reference to relevant spot market exchange rates. The differential between the contracted forward rate and the spot market exchange rate is defined as the forward points. The forward points are discounted and are recognised in the profit or loss.

5.2.3 The table below summarises the Group's financial instruments at carrying amount, categorised by currency: Financial instruments by currency

Liquidity risk management

The following table shows the undiscounted cash flows on the Group's financial assets and liabilities and on the basis of their earliest possible contractual maturity. The Gross nominal inflow / (outflow) disclosed in the table is the contractual, undiscounted cash flow on the financial liability or commitment.

The amounts in the table below have been compiled as follows:

| Type of financial instrument | Basis on which amounts are compiled |
|---|--|
| Non-derivative financial liabilities and financial assets | Undiscounted cash flows, which include estimated interest payments. |
| Issued financial guarantee contracts, and unrecognised loan commitments | Earliest possible contractual maturity. For issued financial guarantee contracts, the maximum amount of the guarantee is allocated to the earliest |
| | year in which the guarantee could be called. |
| Derivative financial liabilities and financial assets held for risk management | |
| purposes | Contractual undiscounted cash flows. The amounts shown are the gross nominal inflows and outflows for derivatives that have simultaneous gross |
| | settlement (e.g. forward exchange contracts and currency swaps) and the net amounts for derivatives that are net settled. |
| | Fair values at the date of the statement of financial position. This is because contractual maturities are not reflective of the liquidity risk exposure |
| proprietary trading operations that are expected to be closed out before | arising from these positions. These fair values are disclosed in the 'less than three month' column. |
| contractual maturity | |
| Trading derivative liabilities and assets that are entered into by the Group with its customers | Contractual undiscounted cash flows. This is because these instruments are not usually closed out before contractual maturity and so the Group believes that contractual maturities are essential for understanding the timing of cash flows associated with these derivative positions. |

The Group's expected cash flows on some financial assets and financial liabilities vary significantly from the contractual cash flows. For example, demand deposits from customers are expected to remain stable or increase and unrecognised loan commitments are not all expected to be drawn down immediately. As part of the management of liquidity risk arising from financial liabilities, the Group holds liquid assets comprising Cash and balances with banks and debt securities issued by federal government, which can be readily sold to meet liquidity requirements.

In addition, the Group maintains agreed lines of credit with other banks and holds unencumbered assets eligible for use as collateral.

5.3.1 Residual contractual maturities of financial assets and liabilities

(a) Regulatory capital

The regulatory capital requirement for entities within the group are as follows:

Name of Entity Primary Regulator Regulatory Requirement

Access Holdings Plc Central Bank of Nigeria 50billion Naira (see note (i)below)

Access Bank Plc Central Bank of Nigeria 50billion Naira

(i) The Capital Requirement of Access Holdings Plc represents the sum of the minimum paid up capital of all its subsidiaries.

The Central Bank of Nigeria (CBN) on 29th August 2014 issued Guidelines for Licensing and Regulation of Financial Holding Companies in Nigeria ("Guidelines"). According to the Guidelines, a financial holding company shall have a minimum paid up capital which shall exceed the sum of the minimum paid up capital of all its subsidiaries, as may be prescribed from time to time by the sector regulators. A review of the capital level as at 30 June 2022 shows that Access Holdings Plc complies with paragraphs 7.1 and 7.3 of the regulation, which stipulates that a financial holding company should maintain a minimum paid up capital which exceeds the aggregate of the minimum paid up capital of all its subsidiaries;

| Entity | Capital N'm | % Holding | Holdco Share N'm |
|--|------------------|-----------|---------------------|
| Access Bank Plc Aggregated minimum paid up Capital of Subsidiaries | 50,000 50,000 | 100 | 50,000 50,000 |
| Holdco Company (Share Capital and Reserves) | | | (2,433) |
| Surplus/(Deficit) | | | (52,433) |

(b) Capital adequacy ratio computation under Basel II guidelines

| Total tier 1 capital expressed as a percentage of risk- weighted assets | 18.11% | 18.96% | | |

Capital adequacy ratio computation under Basel III guidelines

According to the recent CBN circular on Basel III implementation guidelines for Banks in Nigeria, the recommendations contained therein will be implemented in a parallel run beginning November 2021 for a six-month period, which could be extended by another three months if supervisory expectations are achieved. According to the CBN, the Basel III Guidelines will run concurrently with the existing Basel II Guidelines during the parallel run, and the Basel III Guidelines will become completely effective after the parallel run is over.

7 Operating segments

The Group has four reportable segments, as described below, which are the Group's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Group's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on at least a quarterly basis. The Group presents segment information to its Executive Committee, which is the Group's Chief Operating Decision Maker, based on International Financial Reporting Standards.

Based on the market segment and extent of customer turnover, the group reformed the arrangement of segments from previous years into four operational segments as described below;

- Corporate and Investment Banking The division provides bespoke comprehensive banking products and a full range of services to multinationals, large domestic corporates and other institutional clients. The division focuses on customers in key industry sector with minimum annual turnover of N2oBillion. It also provides innovative finance solutions to meet the short, medium and long-term financing needs for the Bank's clients as well as relationship banking services to the Bank's financial institutions customers.
- Commercial banking The commercial banking division has presence in all major cities in the country. It provides commercial banking products and services to the
 non-institutional clients, medium and small corporate segments of the Nigerian market whose annual turnover is above N1bn. The division also provides financial
 services to public sector, commercial institutions and oriental corporates.
- Retail banking The retail banking division is the retail arm of the bank which provides financial products and services to individuals (personal and inclusive segments) and private banking segment. The name of this division was recently changed from 'personal banking' to Retail banking' during the year. The private banking segment focuses on offering bespoke services to High Net worth Individuals (HNI) and Ultra High Net worth Individuals (UHNI) by handling their wealth portfolio needs both locally and abroad.
- Business Banking The Business banking division is a hybrid of Commercial and retail Banking Divisions. It focuses on small and medium scale enterprises providing
 them with business solutions to support their growing business needs. The division delivers commercial banking products and services to SME customers with annual
 turnover of less than ibillion.

All of the Segments reported at the end of the period had its,

- Reported revenue, from both external customers and intersegment sales or transfers, 10 per cent or more of the combined revenue, internal and external, of all operating segments, or
- -the absolute measure of its reported profit or loss 10 per cent or more of the greater, in absolute amount, of
- (i) the combined reported profit of all operating segments that did not report a loss and
- (ii) the combined reported loss of all operating segments that reported a loss, or
- -its assets are 10% or more of the combined assets of all operating segments.

Unallocated Segments represents all other transactions than are outside the normal course of business and can not be directly related to a specific segment financial information.

Thus, in essence, unallocated segments reconcile segment balances to group balances. Material items comprising total assets and total liabilities of the unallocated segments have been outlined below;

Sales between segments are carried out at arm's length. The revenue from external parties reported to the executive committee is measured in a manner consistent with that in the income statement.

| Material total assets and liabilities | Group June 2022 | Group December 2021 |
|---------------------------------------|--------------------|------------------------|
| In millions of Naira | June 2022 | December 2021 |
| Other Assets | 2,122,736 | 1,707,290 |
| Deferred tax asset | 16,807 | 13,781 |
| Non Current Assets Held for Sale | 39,106 | 42,737 |
| Goodwill | 12,747 | 12,664 |
| | 2,191,396 | 1,776,473 |
| Other liabilities | 633,735 | 560,709 |
| Deferred tax liability | 2,340 | 11,652 |
| Retirement Benefit Obligation | 3,701 | 3,877 |
| Total liabilities | 639,775 | 576,238 |

 $Interest\ income\ for\ the\ period\ ended\ 3o\ June\ 2021\ includes\ interest\ accrued\ on\ impaired\ financial\ assets\ of\ Group:\ N1.06Bn\ (3o\ June\ 2021:\ N1.5333Bn)$

The Group experienced an increase in interest income on investment securities as a result of increase in the volume and improved yield on securities during the period.

The increase in interest income on loans is attributable to the increase in value of loans and advances to customers.

The Group's Interest expense experienced a growth due to increased growth in customer deposits during the period.

| E-banking expense | 21,656 | 12,568 | | |
| _ | 25,662 | 14,988 | | |

Fees and commissions expenses are fees charged for the provision of services to customers transacting on alternate channels platform of the Group and on the various debit and credit cards issued for the purpose of these payments. They are charged to the Group on services rendered on internet banking, mobile banking and online purchasing platforms. The corresponding income lines for these expenses include the income on cards (both foreign and local cards), online purchases and bill payments included in fees and commissions. Fees and commissions expense includes the cost incurred to the group for providing alternate platforms for the purposes of internet banking, mobile banking and online purchases. It also includes expenses incurred by the Group on the various debit and credit cards issued.

| | 106,245 | (15,309) | - | |
| Total | 64,135 | (23,255) | | |

Net gains/(loss) on financial instruments includes the gains and losses arising both on the purchase and sale of trading instruments and from changes in fair value.

Fair value gain on equity investments is from investments in which the Group has interests. Based on IFRS 9, the Group measures changes in fair value of equity investments through profit or loss.

Gain on derivative instruments are from transactions to which the Group is a party in the normal course of business and are held at fair value. Derivative financial instruments consist of forward, swap and future contracts.

12 (a) Net foreign exchange gain

12 (b)

| In millions of Naira | Group <u>June 2022</u> | Group <u>June 2021</u> | Bank <u>June 2022</u> | Bank <u>June 2021</u> |
|--|---------------------------|---------------------------|--------------------------|--------------------------|

| ran value neuge | | 17 111 | 17 111 | |] |
| Hedging reserve - Fair value changes in hedging instrument (forward element) | 90% | 4,980 | 11,282 | | |

The following table shows the year in which the hedging contract ends:

| Jun-22 | 3 months | 6 months | 12 months | 5 years | More than 5 years |
|--------------------|----------|----------|-----------|---------|-------------------|
| | | | | | |
| | | | | | |
| Fair value hedging | | | | | |
| Hedging assets | _ | 33,290 | 61,141 | - | - |

For hedges of foreign currency liabilities, the Group enters into hedge relationships where the critical terms of the hedging instrument are closely aligned with the terms of the hedged item. The Group therefore performs a qualitative assessment of effectiveness. Sources of ineffectiveness include timing differences between the settlement dates of the hedged item and hedging instruments, quantity or notional amount differences between the hedged item and hedging instrument and credit risk of the Group and its counterparty to the forward contract.

13 Other operating income

| In millions of Naira | Group <u>June 2022</u> | Group <u>June 2021</u> | Company <u>June 2022</u> | Company June 2021 |

| | Wages and salaries Increase in defined benefit obligation (see note 37 (a) (i)) | 50,911 5,008 | 41,215 376 | 663 | - |
| | Contributions to defined contribution plans Restricted share performance plan | 1,570 785 | 1,204 715 | | |
| | _ | 58,274 | 43,510 | 663 | |

(a) Under the Restricted Share Performance Plan (RSPP), shares of Access Bank Plc are awarded to employees based on their performance at no cost to them. Under the terms of the plan, the shares vest over a 3 year period from the date of award. The scheme applies to only employees of the Bank that meet the stipulated performance criteria irrespective of where they work within the Group. Some members of the Group also have a similar scheme, over the vesting period of 7 years. The RSPP is an equity-settled scheme, where the Bank recognizes an expense and a corresponding increase in equity. Initial estimates of the number of equity settled instruments that are expected to vest are adjusted to current estimates and ultimately to the actual number of equity settled instruments that vest unless differences are due to market conditions.

By the resolution of the Board and Shareholders, the Bank sets aside an amount not exceeding twenty (20) per cent of the aggregate emoluments of the Bank's employees in each financial year to purchase shares of the Bank from the floor of the Nigerian Stock Exchange for the purpose of the plan. The Bank has also established a Structured Entity (SE) to hold shares of the Bank purchased. Upon vesting, the SE transfers the shares to the employee whose interest has vested. The SE is consolidated in the Group's financial statements.

- (i) The shares allocated to staff has a contractual vesting period of three to seven years commencing from the year of purchase/allocation to the staff. The Group has no legal or constructive obligation to repurchase or settle on a cash basis.
- (ii) The number and weighted-average exercise prices of shares has been detailed in table below;

| | June 2 | 022 | June 2021 | |

17 Earnings per share

(a) Basic from continuing operations

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the company by the weighted average number of ordinary shares in issue during the period excluding ordinary shares purchased by the company and held as treasury shares.

| In millions of Naira | Group <u>June 2022</u> | Group <u>June 2021</u> | Company <u>June 2022</u> | Company June 2021 |
|---|---------------------------|---------------------------|-----------------------------|----------------------|
| Profit for the period from continuing operations | 87,290 | 85,984 | | |
| Weighted average number of ordinary shares in issue Weighted average number of treasury Shares | 35,545 (934) 34,611 | 35,545 (827) | 35,545 | <u>-</u> |
| In kobo per share Basic earnings per share from continuing operations | 252 | 34,719 248 | 35,545 | <u> </u> |

Diluted EPS

Diluted earnings per share is calculated by considering the impact of the treasury shares in weighted average number of ordinary shares outstanding

| Closing balance | 82 | 186 | - | - |

⁽ii) The balance of N338.19bn represents the nominal value of outstanding forward contracts entered by Access Bank Nigeria on behalf of customers, with the Central Bank of Nigeria.

19 Investment under management

| | Group | Group | Company | Company |
|--|-----------|---------------|-----------|---------------|
| Amortized cost In millions of Naira | June 2022 | December 2021 | June 2022 | December 2021 |
| Relating to unclaimed dividends: | | | | |
| Government bonds | 2,949 | 2,861 | - | - |
| Placements | 17,002 | 13,045 | - | - |
| Commercial paper | 3,836 | 5,153 | - | - |
| Corporate Bond | 2,296 | 2,021 | - | - |
| Nigerian treasury bills | 2,537 | 2,575 | - | - |
| Mutual funds | 3,955 | 5,403 | - | - |
| Eurobonds | 3,580 | 3,885 | | |
| | 36,155 | 34,942 | | |

The Group entrusted the sum transferred to it by the Registrars in respect of unclaimed dividends with select Asset Managers who will ensure safekeeping and manage the funds for the benefit of the Group. The investments by the Asset Managers are as listed above (the corresponding liability which is due to the Registrar is reported as "unclaimed dividend" in other liabilities. An impairment test was carried out on the assets under management and the resulting impairments were considered immaterial.

| Current (Non-Hedging Instruments) | (15,331) | - | (13,953) | - |
| Non- Current (Non-Hedging Instruments) | - | - | - | _ |

Derivative financial instruments consist of forward, swap and future contracts. These are held for day to day cash management rather than for trading purposes and are held at fair value. The contracts have intended settlement dates of between 30 days and a period. Derivative contracts are valued with reference to data obtained from sources such as Bloomberg and FMDQ.

The movement in fair value is as a result of a depreciation of the reporting currency of the Group (Naira) within the year and volume of transactions.

- (a) This represents the receivable from debtors to the Group that cuts across several services rendered in different capacities
- (b) E-banking receivables represent settlements due from other banks use of our electronic channels by their customers. The Group's payables to other banks is contained in Note 34
- Deposit for investment in AGSMEIS represents the Access Bank Nigeria's deposit as equity investment in Agri-business/Small and Medium Enterprises Investment (c) Scheme. As approved by the Bankers' Committee on 9th February 2017, all Deposit Money Banks are required to invest 5% of prior period's Profit After Tax as equity investment in the scheme.
- (d) Subscription for investment balance relates to deposits paid for the acquisition of equity investments for which shares have not been issued to the Group.
- Restricted deposits with central banks comprise the cash reserve requirements of the Central Bank of Nigeria and other central banks of jurisdictions that the Group operates in as well as the special intervention fund with the Central Bank of Nigeria of N89,58Bn introduced in January 2016 as a reduction in the cash reserve ratio with a view of channeling the reduction to financing the real sector. These balances are not available for day to day operations of the Group.
- Inventory consists of blank debit cards, cheque leaves, computer consumables and other stationery held by the Group. Increase in prepayments resulted from services that have been paid in advance for the period for which the amortization will be over the relevant year of service. These include rents and advertisements.

E-tranzact (ETRAN), a fully integrated fintech platform in Africa was founded in 2003 and is one of the leading independent players in Lagos, Nigeria with a diversified license and product capabilities. The company has enjoyed continuous and consistent growth in top line revenue and subscriber base and activity over the past 5 years and is positioned for continuous growth post Covid.

The Group holds an equity interest of 1,914,677,783 ordinary shares of 50k each in E-tranzact International Plc as at 30 June 2022, representing 28.86% equity participation in the company. No dividend income was received from ETRAN during the year. The group's effective ownership in ETRAN increased from 23.80% in 2021 to 28.86% in 2022 as the bank acquired more shares from the company. The proportion of the Bank's interest is the same as the proportion of voting rights. As at 30th June 2022, the fair value of the Bank's investment was N4.21Bn

There are published price quotations for the associate on the Nigerian Stock Exchange. There are no significant restrictions on the ability of the associates to transfer funds to the group in the form of cash dividends, or repayments of loans or advances. The associate was accounted for using the equity method at the Group level and cost at the Bank level.

The Group exercises significant influence in E-tranzact International Limited by virtue of its more than 20% shareholding in the entity and the representation of one director on the board of the company and significant participation in the company's operating and financial policies.

The exisiting investment the Bank had in Etranzact was initially recognized in the books under equity instruments measured at Fair value through profit or loss. At the point of increasing the stakes of the Bank in Etranzact by means of the Right issue, the existing shares were reclasified to investment in associates at their fair value.

27(b) Subsidiaries (with continuing operations)

(i) Group entities

Set out below are the group's subsidiaries as at 30 June 2022. Unless otherwise stated, the subsidiaries listed below have share capital consisting solely of ordinary shares, which are held directly by the group and the proportion of ownership interests held equals to the voting rights held by the group. The country of incorporation is also their principal place of business.

There are no significant restrictions on the Group's ability to access or use the assets and settle the liabilities of any member of the Group to the extent that regulation does not inhibit the group from having access, and in liquidation scenario, this restriction is limited to its level of investment in the entity.

There are no significant restrictions on the ability of subsidiaries to transfer funds to the Group in the form of cash dividends or repayment of loans and advances

^{*}Changes Arising from final assessment: This relates to the changes recognized in the goodwill acquired from former BancABC by Access Botswana post audit of the acquired net asset. The original goodwill recognized was provisional as the net assets was still being audited. The final net asset led to a change in the purchase consideration based on the share purchse agreement leading to the changes observed in the goodwill initially recognized from previous year.

29(b) Intangible assets

(i) Goodwill is attributable to the acquisition of Diamond Bank Plc and the following subsidiaries:

| | Group June 2022 | Group December 2021 | Company June 2022 | Company December 2021 |
|--------------------------------------|--------------------|------------------------|----------------------|--------------------------|
| In millions of Naira | | | | |
| Diamond Bank Plc (see (a) below) | 4,555 | 4,555 | - | _ |
| Access Bank Rwanda (see (b) below) | 681 | 681 | - | - |
| Access Bank Kenya (see (c) below) | 6,547 | 6,546 | - | - |
| Access Bank Botswana (see (d) below) | 966 | 882 | | |
| | 12,749 | 12,664 | - | - |

(a) Diamond bank:

The recoverable amount of Goodwill as at 30 June 2022 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N121.56bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the period and no losses on goodwill were recognized as at 30 June 2022 (31 December 2021: Nil)

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Retail (Personal) Banking.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 3.19%. A discount rate of 22.32% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the period. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)

Discount rate (ii)

3.15%
22.45%

- (i) Weighted average growth rate used to extrapolate cash flows beyond the budget year.
- (ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 22.32% was applied in determining the recoverable amounts for Diamond Bank Plc. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium of Access Bank.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Nigeria.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

| | 1070 | 10/0 |
|--|----------|----------|
| | increase | decrease |
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | 13,316 | (16,884) |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | (1,115) | 1,079 |

10%

10%

There were no write-downs of goodwill due to impairment during the period

(b) Access Bank Rwanda:

The recoverable amount of Goodwill as at 30 June 2022 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N11.64bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. Impairment assessment has been performed for the period and no losses on goodwill were recognized as at 30 June 2022 (31 December 2021: Nil)

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Rwanda.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. The approach is based on estimating the free cash flow to equity to determine the value in use. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of 6.21%. A discount rate of 22.63% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

 June 2022

 Terminal growth rate (i)
 6.21%

 Discount rate (ii)
 22.63%

- (i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
- (ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 22.63% was applied in determining the recoverable amounts for the goodwill of Access Bank Rwanda. This discount rate was estimated using beta, risk-free rate and the equity risk premium for Rwanda.

Terminal growth rate

Terminal growth rate applied was based on the long term growth rate in GDP of Rwanda.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the subsidiaries (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

| | 10% | 10% |
|--|----------|----------|
| | increase | decrease |
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | (309) | 313 |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | 549 | (544) |

400/

(c) Access bank Kenya:

The recoverable amount of Goodwill as at 30 June 2022 is greater than its carrying amount and is thus not impaired. The recoverable amount was determined using a value-in-use computation as N44.04bn.

Goodwill is reviewed annually for impairment, or more frequently when there are indications that impairment may have occurred. This is the first impairment assessment.

Goodwill is monitored by the Group on cash generating units (CGU) basis. For the purpose of impairment testing, the goodwill has been allocated to Access Bank Kenya.

Goodwill impairment test was done by comparing the value-in-use for the CGU to the carrying amount of the goodwill based on cash flow projections. Cash flows were projected for the first 5 years based on operating results, expected future financial performance and past experience. Beyond 5 years, cash flows were assumed to grow at terminal growth rate of of 5.47%. A discount rate of 23.77% was applied based on estimate of cost of capital. This was estimated using the Capital Asset Pricing Model. There were no write-downs of goodwill due to impairment during the year. All assumptions are subject to market and economic conditions. However, we do not see possible changes in these assumptions adversely causing the recoverable amounts of the CGU's declining below their carrying amounts.

The key assumption used in computing the value-in-use for goodwill in during the period are as follows:

Terminal growth rate (i)

5.47%
Discount rate (ii)

23.77%

- (i) Terminal growth rate used to extrapolate cash flows beyond the budget period.
- (ii) Pre-tax discount rate applied to the cash flow projections.

Cash Flow Forecast

Cash flows were projected based on past experience and actual operating results. These cashflows are based on the expected revenue growth for the entity over this 5-year period.

Discount Rate

Pre-tax discount rate of 23.77% was applied in determining the recoverable amounts for the goodwill of Access Bank Kenya. This discount rate was estimated using the Bank's beta, the risk-free rate and the equity risk premium of Access Bank.

Terminal growth rate

The terminal growth rate applied was based on the long term growth rate in GDP of Kenya.

The key assumptions described above may change as economic and market conditions change. The Group estimates that reasonably possible changes in these assumptions are not expected to cause the recoverable amount of the entity (from which the goodwill arose) to decline below their carrying amount.

Sensitivity analysis of key assumptions used

| In thousands of Naira | 10% increase | 10% decrease |
|--|-----------------|-----------------|
| Impact of change in discount rate on value-in-use computation (increase/(decrease) | 6,003 | (7,883) |
| Impact of change in growth rate on value-in-use computation (increase/(decrease) | (961) | 906 |

There were no write-downs of goodwill due to impairment during the period.

(d) Access bank Botswana:

Goodwill represents the value derived from a larger branch network and combined synergies of operations. Goodwill is not deductible for tax purposes.

The goodwill of N966Mn arose from the acquisition of BancABC (now Access Bank Botswana). The change in goodwill as against the initial recognition relates to the changes arising from the post audit of the acquired net asset upon final assessment. The initial goodwill recognized was provisional as the net assets was still being audited. The final net asset led to a change in the purchase consideration based on the share purchse agreement leading to the changes observed in the goodwill initially recognized from previous year.

30 Deferred tax assets and liabilities (a) Group

The following items gave rise to temporary differences during the period. Deferred tax assets and liabilities are attributable to the following items below:

| In millions of Naira | June 2022 | | | December 2021 | | |
|---|-----------|-------------|----------|---------------|-------------|----------|
| - | Assets | Liabilities | Net | Assets | Liabilities | Net |
| Property and equipment, and software | 18,103 | (2,065) | 16,037 | 28,125 | (3,810) | 24,314 |

Temporary difference relating to the Group's Investment in subsidiaries as at 30 June 2022 is N60.93billion (Dec 2021: N60.63billion). As the Group exercises control over the subsidiaries, it has the power to control the timing of the reversals of the temporary difference arising from its investments in them. The Group has determined that the subsidiaries' profits and reserves will not be distributed in the foreseeable future and that the subsidiaries will not be disposed of. Hence, the deferred tax arising from the temporary differences above will not be recognised.

Investment property of N217 million for the Group, represents the value of landed properties which are carried and measured at fair value. There was no rental income from such properties during the year and no restrictions on the realisability of the property.

Valuation technique used for fair valuation of investment properties

Investment properties are stated at fair value, which has been determined based on valuations performed by various Estate Surveyors and Valuers. The valuers are industry specialists in valuing these types of investment properties. The fair value is supported by market evidence and represents the amount that would be received to sell the properties in an orderly transaction between market participants at the measurement date in the principal market to which the Group has access at the date of valuation, in accordance with standard issued by the International Valuation Standards Committee. Valuations are performed on an annual basis and the fair value gains and losses are reported in valuation gain on investment properties under other operating income (see note 13). The profits or losses on disposal are also reported in the profit or loss as they occur.

The professional valuers engaged for the preparation of the valuation reports is Paul Osaji and Company (FRC/2013/0000000000001098)

All investment properties have been classified as non current with a carrying amount of N217 million for Group and Nil for Company

- (a) E-banking payables represent settlements due to other banks use of their electronic channels by the Group's customers. The Group's Receivables from other banks is contained in Note 26.
- (b) Collections are balances held in trust on behalf of customers for various transactions. These include escrows, collection for remittances, payments, etc.
- (c) Customer deposits for foreign exchange represents deposits that customers have made to fulfil foreign currency obligations. The Group's process requires that customers with foreign currency obligations deposit foreign currency to back the transactions. The corresponding balance is in Other deposits with central banks Cash and balances with banks.
- (d) Unclaimed dividend is the balance of dividend declared by the Company but yet to be claimed by shareholders. The amount relates to the portion that has been transferred to the Company by the Registrar in accordance with Securities and Exchange Commission guidelines on Return of Unclaimed Dividends (See Note 19) for the corresponding assets with Asset Managers. The amount is payable on demand to shareholders.

The contribution to the Industrial training fund scheme is being shown as a separate line under other liabilities. This has been stripped out of the accrual line where it was previously warehoused. The amount here represents 1% of the personnel cost of the employer according to the ITF amendment ACT 2011, Act No 19 section 6, subsection 1

- (o) The amount of N1,999,405,409 (USD 4,745,912) represents the outstanding balance on the on-lending facility granted to Access Bank Rwanda by the Central Bank of Rwanda in 2021 for a year. The principal amount will be bullet at maturity in 2022 while interest is paid at maturity at 8%. From this creditor, the bank has nil undrawn balance as at 30 June 2022
- (p) The amount of N6,173,062,300 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in collaboration with the Federal Government of Nigeria (FGN) in respect of Commercial Agriculture Credit Scheme (CACS) established by both CBN and the FGN for promoting commercial agricultural enterprises in Nigeria. The facility is for a maximum year of 7 years at a zero percent interest rate to the Bank. The Bank did not provide security for this facility. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (q) The amount of N1,866,198,591 represents an outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria, to facilitate the rapid rollout of agent networks across Nigeria supporting the expansion of a shared Agent Network to deepen financial inclusion in Nigeria. The total facility has a tenor of 10 years at a 5% interest rate and the facility is meant for CBN Licensed Mobile Money Operators and Super Agents. The principal amount will be repayable quarterly after the 1 year interest moratorium and the 2 years principal moratorium. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (r) The amount of N1,395,875,503 represents the outstanding balance on intervention credit granted to the Bank by the Bank of Industry (BOI), a company incorporated in Nigeria, to be applied to eligible power and airline projects. The total facility has a maximum tenor of 13.5 years. A management fee of 1% deductible at source is paid by the Bank under the onlending agreement and the Bank is under obligation to on-lend to customers at an all-in interest rate of 7% per annum. Though the facility is meant for on-lending to borrowers within the power and aviation sectors, the Bank remains the primary obligor to the BOI and therefore assumes the risk of default of customers. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (s) The amount of N1,941,410,318 represents the outstanding balance on intervention credit granted to the bank by the Bank of Industry (BOI) under the Special refinancing and Restructuring intervention fund, with a 10 year tenor which is due on the 31 August 2024. The bank has a 36 months moratorium on the facility after which principal repayment will be charged quarterly. Though the facility is meant for on-lending to borrowers in specified sectors, the Bank remains the primary obligor to the BOI and therefore assumes the risk of default of customers. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (t) The amount of N61,760,746,521 represents the outstanding balance on the state salary bailout facilities granted to the bank by the Central Bank of Nigeria for onward disbursements to state governments for payments of salary of workers of the states. The facility has a tenor of 20 years with a 2% interest payable to the CBN. The Bank is under obligation to onlend to the states at an all-in interest rate of 9% per annum. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (u) The amount of N111,431,814,315 represents the outstanding balance on the excess crude account loans granted to the bank by the Central Bank of Nigeria for onward disbursements to state governments. The facility has a tenor of 20 years with a 2% interest payable to the CBN. The Bank is under obligation to on-lend to the states at an all-in interest rate of 9% per annum. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (v) The amount of N13,134,898,586 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Real Sector Support Facility (RSSF) established by CBN. The facility tenor is for a range of 7 to 10 years inclusive of 24 months moratorium at a 3% interest rate to the Bank. An additional facility of NGN2bn was disbursed under the scheme for a period of 7 years inclusive of 1 year moratorium at a 3% interest rate to the Bank. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (w) The amount of N73,384,897,883 represents the outstanding balance on four on-lending facilities granted to the Bank by the Development Bank of Nigeria in two series in respect of the Micro, Small and Medium Scale Enterprises (MSMEs) and Small Corporates. The facilities are for a maximum of 3 years at a 9.6% interest rate to the Bank. A third series of about 1.68bn was disbursed for a period of 10 years. The fourth facility of about 70bn was disbursed for a period of 10 years at an interest rate of 10%. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (x) The amount of N343,966,444,832 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Real Sector Support Facility (RSSF) Differentiated Cash Reserve Requirement scheme (DCCR) established by CBN supporting Reddington Multi-specialist Hospital, Dana Motors, Lafarge Africa PLC. The facility is for a maximum period of 7 years inclusive of 12 months moratorium for Reddington and Dana and a 24 months moratorium for Lafarge at a 0% interest rate to the Bank. Additional amounts were disbursed between July 2019 and November 2019 in favor of 5 other beneficiaries amounting to 34.58bn for a period of 7 years with 2 years moratorium at 2% interest rate on a quarterly basis for the first 4 counterparties and 10 years with no moratorium at 1% interest rate on a quarterly basis for the last counterparty.
- (y) The amount of N5,466,462,327 represents the outstanding balance on the on-lending facility granted to the Bank by Nigeria Mortgage Refinance Company. The facility is for a maximum period of 15 years commencing from the date of execution of this agreement at a 14.5% interest rate to the Bank. From this creditor, the bank has nil undrawn balance as at 30 June 2022.

- (z) The amount of N15,319,636,364 (USD 36,363,636) represents the outstanding balance on the on-lending facility of USD 25mn granted to the Bank by Africa Export and Import Bank (AFREXIM) in May 2018 for a period of 3 years. The principal amount will be repayable semi-annually from November 2018 while interest is paid quaterly at 7% above 3 months LIBOR. In December 2019, AFREXIM disbursed a USD200mn for a period of 3 years to be paid quarterly with a 6 months moratorium with Interest also paid quarterly at 3.64% and LIBOR. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (aa) This on-lending facility granted to the Bank under the Group's issued dollar denominated loan participatory notes of \$50 million (N9.95 billion) through a structured entity, Diamond Finance BV, Netherlands, on 27 March 2014, which is due on 27 March 2021. The principal amount is payable at the end of the tenor while interest on the notes is payable semi-annually at 7% per annum. The net proceeds from the issue of the Loan Participatory Notes, was used by the Issuer (Diamond Finance BV) for the sole purpose of providing a loan to Diamond Bank, which was in turn used by the Bank to support its business expansion and development. Diamond Bank (now Access Bank Plc), unconditionally and irrevocably guaranteed the due payment of all sums by the Issuer (Diamond Finance BV) in respect of the Notes. The Group had no defaults of principal or interest with respect to its subordinated liabilities during the life of the facility. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ab) The amount of N8,838,321,592 represents the outstanding balance on intervention credit granted to the Bank by the Bank of Industry (BOI), a company incorporated in Nigeria. The total facility has a maximum tenor of 15 years. A management fee of 1% deductible at source is paid by the Bank under the on-lending agreement and the Bank is under obligation to on-lend to customers at an all-in interest rate of 7%. Though the facility is meant for on-lending to borrowers in specified sectors, the Bank remains the primary obligor to the BOI and therefore assumes the risk of default of customers. From this creditor, the bank has nil undrawn balance as at 30 June 2022
- (ac) The amount of N1,431,701,324 represents the outstanding balance on the on-lending facility granted to the Bank by the Central Bank of Nigeria under the Creative Industry Financing Initiative established by the CBN. The initiative is on a request by request basis. The tenor of the facilities granted ranges from 3 to 10 years inclusive of a maximum of 24 months moratorium. There are currently 14 beneficiaries under the initiative. The Bank is under obligation to on-lend to customers at an all-in interest rate of 9% with 2% remitted to CBN. The Bank remains the primary obligor to CBN and therefore assumes the risk of default of customers. From this creditor, the bank has nil undrawn balance as at 30 June 2022
- (ad) The amount of N2,830,132,666 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Accelerated Agricultural Development Scheme (AADS) on behalf of Bayelsa State Government. The facility is for a period of 3 years inclusive of 24 months moratorium at a 4% interest rate repayable on a monthly basis. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ae) The amount of N4,018,776,357 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria in respect of the Non-Oil Export Stimulation Facility (NESF) supporting Leaf Tobacco and Commodities Nigeria Limited in acquiring additional machinery for expansion of their facilities. The facility is for a period of 6 years inclusive of 12 months moratorium at a 1% interest rate repayable on a quarterly basis which will increase to 2% effective March 1, 2022. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (af) The amount of N20,017,037,303 represents the outstanding balance on the on-lending facility granted to the Bank by Central Bank of Nigeria through the Health Sector Intervention Facility (HSIF) window of the Real Sector Support Facility (RSSF) Differentiated Cash Reserve Requirement scheme (DCCR) supporting 8 beneficiaries (N7,6bn). The tenor of the facility ranges from 4 to 10 years inclusive of maximum moratorium of 12 months. The interest is set at 1% repayable on a quarterly basis which will increase to 2% effective March 2022. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ag) The amount of N1,026,027,397 represents the outstanding balance on the on-lending facility granted to the Bank by Lagos State Employment Trust Fund (LESTF) to support financial inclusion of women in Lagos state. The tenor of the facility is 2 years. The interest is set at 5% repayable on a monthly basis. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ah) The amount of N8,702,683,810 (USD 20,657,228) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Ghana by ECOWAS Bank for Investment and Development (EBID) for two different facilities which attracts an interest rate of 4,75% for 90 days and 2.75% for 63 days respectively disbursed on 29 June 2022 and 6 June 2022 all with principal and interest payable at maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ai) This on-lending facility granted to the Group's Subsidiary in Ghana by Standard Chartered Bank GH. Ltd. Two tranches were disbursed on 29 June 2021 atd 3 June 2021 at an interest rate of 2.97% for 9 months and 1 year respectively where principal and interest is payable at maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022
- (aj) The amount of N3,717,391,327 (USD 8,823,829) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Ghana by Bunge SA which attracts an interest rate of 5.24% for 175 days was disbursed on 1 June 2022. The principal and interest are payable at maturity. From this creditor, the bank has nil undrawn balance as at 20 June 2022.
- (ak) The amount of N3,387,910,409 (USD 8,041,753) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Ghana by Cargill, Inc. which attracts an interest rate of 3,16% for 357 days was disbursed on 15 October 2021. The principal and interest are payable semi-annually. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (al) The amount of N7,615,442,389 (USD 18,076,485) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Ghana by JP Morgan Chase Bank N.A. which attracts an interest rate of 3.18% for 374 days was disbursed on 26 November 2021. The principal and interest are payable at maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (am) The amount of N11,411,877,438 (USD 27,087,938) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Ghana by FCC Securities which attracts an interest rate of 3.18% for 371 days was disbursed on 29 November 2021. The principal and interest are payable at maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (an) The amount of N977,445,461 (USD 2,320,125) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in South Africa by Norsad Finance Limited disbursed 30 January 2020 which attracts an interest rate of 5.5% plus 3 months JIBAR for 3 years with interest and principal paid quarterly. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ao) The amount of N6,089,473,459 (USD 14,454,350) represents the outstanding balance on the on-lending facility granted to the Group's Subsidiary in Zambia by Bank of Zambia (TMTRF) which attracts an interest rate ranging from 7% to 10% with tenors ranging from 30 days to 7 years with eight different facilities disbursed on 31 July 2020, 10 March 2021, 3 December 2021 and 15 December 2021. Interest is payable quarterly after 12 months moratorium and principal is paid at maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022.
- (ap) This on-lending facility granted to the Group's Subsidiary in Mozambique by ABC Holdings Ltd for two facilities disbursed on 1 Dec 2017 and 31 Dec 2016 for a period of 5 and 10 years respectively which attracts an interest rate of 8.5% and 14.25% respectively with Semi- annual repayment of interest and Principal on maturity. From this creditor, the bank has nil undrawn balance as at 30 June 2022.

| Post employment benefit plan (see note (i) below) | 3,677 | 3,846 | | |
| Recognised liability | 3,677 | 3,846 | | |

(i) Post employment benefit plan

The Group operates a non-contributory, unfunded lump sum defined benefit post employment benefit plan for top executive management of the Group from General Manager and above based on the number of years spent in these positions. The scheme is also aimed at rewarding executive directors and other senior executives for the contributions to achieving the Group's long-term growth objectives.

There is no funding arrangement with a trustee for the Post employment benefit plan as the Group pays for all obligations from its current year profit as such obligations fall due. Depending on their grade, executive staff of the Group upon retirement are entitled to certain benefits based on their length of stay on that grade.

The amount recognised in the statement of financial position is as follows:

| | Group | Group | Company | Company |

All retired benefit obligations have been classified as non current with a closing amount of N3.68 billion for Group

The weighted average duration of the defined benefit obligation is 4 years. The information on the maturity profile of the defined benefit plan includes the maturity analysis and the distribution of the timing of payment.

Risk exposure

Through its defined benefit pension plan, the group is exposed to a number of risks, the most significant of which are detailed below:

- i) Changes in bond yields A decrease in government bond yields will increase plan liabilities, although this will be partially offset by an increase in the value of the plans' bond holdings.
- ii) Inflation risks Some of the group's pension obligations are linked to salary inflation, and higher inflation will lead to higher liabilities.
- iii) Life expectancy The majority of the plans' obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plans' liabilities

The sensitivities below relates to Group and Company.

Effect of changes in the assumption to the discount rate

Effect of changes in assumption to the salary growth

analysis did not change compared to the previous period.

| June 2022 | Impact o | Impact on defined benefit obligation | | | | |

Effect of changes in assumption to the mortality rate liability by 0.1% 3,850 (4)

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the year) has been applied as when calculating the pension liability recognised within the statement of financial position. The methods and types of assumptions used in preparing the sensitivity

| Withdrawal rate: 45 – 50 | 5.00% | 5.00% |
| Withdrawal rate: 51 – 59 (average rate) | 1.70% | 1.70% |

Assumptions regarding future mortality before retirement are based on A49/52 ultimate table published by the Institute of Actuaries of United Kingdom. The rate used to discount post employment benefit obligations has been determined by reference to the yield on Nigerian Government bonds of medium duration. This converts into an effective yield of 11.4% as at 30 June 2022. For members in active service as at the valuation date, the projected unit credit method of valuation as required under the IFRS has been adopted.

C Additional Tier 1 Capital

Access Bank Nigeria issued a U.S.\$500,000,000 Perpetual Fixed Rate Resettable Non callable prior to 5.25 years Additional Tier 1 (AT1) Subordinated Notes under its U.S.\$1,500,000,000 Global Medium Term Note Programme listed on the London Stock Exchange.

The principal terms of the issue are described below:

- 1) The AT1 security will rank in claim behind all present and future Senior Obligation; pari passu without any preference among themselves with all present and future parity obligations and in priority to all payments in respect of all present and future Junior Obligations
- 2) The AT1 security is undated and are redeemable, at the option of the company in whole at (i)any time from 7 October 2026 up to and including the First Reset Date of January 7, 2027 and (ii)every Interest Payment Date thereafter (Issuer Call Date). In addition, the AT1 security is redeemable, at the option of the Bank, in whole in the event of certain changes in the tax or regulatory treatment of the securities
- 3) AT1 security will bear a fixed rate of interest of 9.125 percent until the initial call date or the initial reset date, as the case may be. After the initial call date or the initial reset date, as the case may be, in the event that they are not redeemed, the AT1 security will bear interest at a rate per annum equal to the aggregate of (i) the Reset Margin of 8.07 per cent. per annum and (ii) the then prevailing U.S. Treasury Rate
- 4) Interest on the AT1 security will be due and payable only at the sole discretion of the company, and it has sole and absolute discretion at all times and for any reason to cancel (in whole or in part) any interest payment that would otherwise be payable on any interest payment date. Interest on the Notes will be payable semi-annually in arrears commencing on 7 July 2022

(i) Other reserves

Other regulatory reserves

Statutory reserves

Nigerian banking regulations require Access Bank Nigeria to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institution Act of Nigeria, an appropriation of 30% of profit after tax is made if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

SMEEIS Reserves

The Small and Medium Enterprises Equity Investment Scheme (SMEEIS) reserve is maintained to comply with the Central Bank of Nigeria (CBN)/Banker's committee's requirement that all licensed deposit money banks in Nigeria set aside a portion of the profit after tax in a fund to be sued to finance equity investment in qualifying small and medium scale enterprises. Under the terms of the guideline (amended by a CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contribution shall thereafter reduce to 5% of profit after tax

However, this is no longer mandatory. Therefore, no additional appropriation has been done during the period.

The small and medium scale industries equity investment scheme reserves are non-distributable.

| i(a) | | Statutory | reserves | SMEEL | S Reserves | 7 | Total . |
|------|-----------------------------|-----------|---------------|-----------|---------------|-----------|---------------|

| | Closing | 145,642 | 136,728 | | | 145,642 | 136,728 |

(ii) Share scheme reserve

This represents the total expenses incurred in providing the Company's shares to its qualifying staff members under the RSPP scheme.

(iii) Treasury shares

This represents the shares held by the new RSPP scheme which have not yet been allocated to staff based on the pre-determined vesting conditions.

(iv) Capital reserve

This balance represents the surplus nominal value of the reconstructed shares of the Company which was transferred from the share capital account to the capital reserve account after the share capital reconstruction in October 2006. The Shareholders approved the reconstruction of 13,956,321,723 ordinary shares of 50 kobo each of the company in issue to 6,978,160,860 ordinary shares of 50 kobo each by the creation of 1 ordinary shares previously held.

(v) Fair value reserve

The fair value reserve comprises the net cumulative change in the fair value of investments measured through other comprehensive income until the investment is derecognised or impaired.

(vi) Foreign currency translation reserve

This balance appears only in the Group accounts and represents the foreign currency exchange difference arising from translating the results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency.

(vii) Regulatory risk reserve

The regulatory risk reserves warehouses the difference between the allowance for impairment losses on balance on loans and advances based on Central Bank of Nigeria prudential guidelines and Central Bank of the foreign subsidiaries regulations, compared with the loss incurred model used in calculating the impairment under IFRS.

Group

Group

(viii) Retained earnings

G

Retained earnings are the carried forward recognised income net of expenses plus current year profit attributable to shareholders.

F Non-controlling interest

This represents the Non-controlling interest's (NCI) portion of the net assets of the Group

The Directors proposed an interim dividend of 20k for the period ended 30 June 2022

^{*}Interim Dividend paid: Upstreamed dividend from Access Bank Plc's 2021 full year dividend

39 Contingencies

Claims and litiaation

The Group is a party to numerous legal actions arising out of its normal business operations. The Directors believe that, based on currently available information and advice of counsel, none of the outcomes that result from such proceedings will have a material adverse effect on the financial position of the Group, either individually or in the aggregate. N2.84Bn provision has been made as at 30 June 2022.

Contingent liability and commitments

In common with other banks, Group conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. Contingent liabilities and commitments comprise acceptances, endorsements, guarantees and letters of credit.

Nature of instruments

An acceptance is undertaken by a Group to pay a bill of exchange drawn on a customer. The Group expects most acceptances to be presented, but reimbursement by the customer is normally immediate. Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

Guarantees and letters of credit are given as security to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amounts.

Other contingent liabilities include transaction related custom and performance bonds and are generally short term commitments to third parties which are not directly dependent on the customer's credit worthiness. Commitments to lend are agreements to lend to a customer in the future, subject to certain conditions. Such commitments are either made for a fixed year, or have no specific maturity dates but are cancellable by the lender subject to notice requirements. Documentary credits commit the Group to make payments to third parties, on production of documents, which are usually reimbursed immediately by customers.

The table below summarises the fair value amount of contingent liabilities and commitments off-financial position risk: Acceptances, bonds, guarantees and other obligations for the account of customers:

a. These comprise:

| In millions of Naira | Group <u>June 2022</u> | Group <u>December 2021</u> | Company June 2022 | Company December 2021 |
|--|---------------------------|-------------------------------|----------------------|--------------------------|
| Contingent liabilities: Transaction related bonds and guarantees | 558,586 | 518,560 | - | - |
| Commitments: Clean line facilities for letters of credit, unconfirmed letters of credit and other commitments | 811,769 | 618,809 | - | - |
| | 1,370,355 | 1,137,369 | | |

The Group granted clean line facilities for letters of credit during the year to guarantee the performance of customers to third parties. Contractual capital commitments undertaken by Access Bank Nigeria during the period amounted to N10.3Bn (31 Dec 2021: N694.35 Mn)

The financial assets held by Access pension fund custodian in trust for customers for the period is listed below

| (I) | *CBN-NEMSF | Sum of N2m in respect of breach of accounts administration agreement | 11 Mar 2022 |

^{*}CBN-NEMSF: This is a joint initiative between the Central Bank of Nigeria and the Nigerian Elecricity market stabilization facility

42 Events after reporting date

Subsequent to the end of the financial period, the Board of Directors proposed an interim dividend of 40k each payable to shareholders on register of shareholding at the closure date. The Bank also disposed of its holdings in Access Pension funds custodian limited by selling of its entire stakes in the entity. The CBN approved of this disposal on the 7th July, 2022.

The Holding company acquired a pension business during the period (First Guarantee Pension limited (FGPL)). The company purchased all of the stakes of FGPL after obtaining the requisite appprovals from the Central Bank of Nigeria (CBN) and National Pension commission (PENCOM).

43 Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise influence over the other party in making financial and operational decisions, or one other party controls both. The definition includes subsidiaries, associates, joint ventures and the Group's pension schemes, as well as key management personnel.

Transactions with key management personnel

The Group's key management personnel, and persons connected with them, are also considered to be related parties. The definition of key management includes the close members of family of key personnel and any entity over which key management exercise control. The key management personnel have been identified as the executive and non-executive directors of the Group. Close members of family are those family members who may be expected to influence, or be influenced by that individual in their dealings with Access Holdings PLC and its subsidiaries.

The parent company, which is also the ultimate parent company, is Access Holdings Plc.

Loans and advances to related parties

The bank granted various credit facilities to its subsidiary companies and key management personnel. Key Management Personnel is defined as members of the Board of Directors of the bank, including their close members of family and any entity over which they exercise control. Close member of family are those who may be expected to influence or be influenced by that individual in

The rates and terms agreed are comparable to other facilities being held in the bank's portfolio. Details of these are described below:

| period ended 30 June 2022 | Directors and other key management personnel (and close family members) | Subsidiaries | Associate | Total |
|--|--|---------------------|------------------|---------------------|
| In millions of Naira | | | | |
| Balance, beginning of period Net movement during the period | 1,180 131 | 321,918 (88,695) | 2,362 (1,237) | 325,460 (89,802) |
| Balance, end of period | 1,049 | 233,223 | 1,125 | 235,397 |

44 Business Combination

(a) Business Combination with Transnational Bank Kenya

Access Bank Plc acquired Transnational Bank in Kenya with effect from 20 July 2020. The acquisition involved the Bank acquiring the 99.98% issued share capital of Transnational Bank in exchange for cash consideration of N5,517,428,970 (Five billion, five hundred and seventeen thousand, four hundred and twenty eight thousand, nine hundred and seventy naira)

In fulfilment of the consideration for the acquisition, Transnational Bank's shareholders received a total cash consideration offer of $N_{5,634,410,000}$ comprising of (i) a cash consideration payment of $N_{4,225,807,500}$ (Four billion, two hundred and twenty five million, eight hundred and seven thousand, five hundred Naira) (ii) a deferred payment of $N_{1,408,602,500}$ (one billion, four hundred and eight million six hundred and two thousand, five hundred naira) to be made to shareholders at the expiration of 2 years. For the purpose of the goodwill computation, this deferred consideration has been carried at its present value of $N_{1,291,620,470}$ using a discount rate of 4.24%. This discount rate was estimated using a financial instrument close to cash in liquidity and the country risk premium for Kenya.

(a) Business Combination with Grobank South Africa

The Bank recently acquired Grobank in South Africa with effect from 4th May 2021. As part of the acquisition, Grobank issued additional units of shares to the Bank. The acquisition involved the Bank acquiring 90.35% of the net assets in exchange for cash of N11,411,682,891 (Eleven billion, four hundred and eleven thousand, six hundred and eighty two thousand, eight hundred and ninety one Naira). The cash consideration is considered as the fair value of the shares acquired. The bargain purchase has been computed by comparing the fair value of the net asset of former Grobank to the present value of the cash consideration paid for the acquisition.

(e) Business Combination with ABC Mozambique

Access Bank Mozambique recently acquired BancABC Bank in Mozambique with effect from 14th May 2021. The acquisition involved the Bank acquiring 99.997% issued share capital of BancABC in exchange for cash of N9,259,068,053 (Nine billion, two hundred and fifty nine million, sixty eight thousand and fifty three naira) used to pay off the shareholders of former BancABC.

The consideration for the acquisition comprises of (i) a cash consideration payment of N5,171,476,925 (Five billion, one hundred and seventy one million, four hundred and seventy six thousand, nine hundred and twenty five Naira) (ii) a deferred payment of N5,164,813,558 (Five billion one hundred and sixty-four million, eight hundred and thirteen thousand, five hundred and fifty-eight naira) to be made to shareholders at the expiration of 2 years. For the purpose of the goodwill computation, this deferred consideration has been carried at its present value of N4,087,591,127 using a discount rate of 12.4%. This discount rate was estimated using a financial instrument close to cash in liquidity and the country risk premium for Mozambique. The bargain purchase has been computed by comparing the fair value of the net asset of former BancABC to the present value of the cash consideration paid for the acquisition.

45 Director-related exposures

Access Bank Nigeria Plc has some exposures that are related to its Directors. It however follows a strict process before granting such credits to its Directors. The requirements for creating and managing this category of risk assets include the following amongst others:

- a. Complete adherence to the requirements for granting insider-related exposure as stated in the Bank's Credit Policy Guidelines, the Insider-related Policy as well as the Bank's duly approved Standard Operating Procedure for managing insider-related exposures.

- b. Full compliance with the relevant CBN policies on insider-related lending.
 c. All affected Directors are precluded from taking part in the approval process of credit request wherein they have interest.
 d. The related Director is required to execute a document authorizing the Group to use their accruable dividends to defray any related-obligor's delinquent exposures.
- e. The Directors are required to execute documents for the transfer of their shares to the Group's nominated broker to ensure effective control as required by the CBN policy to enhance the bank's Corporate Governance structure.
- f. Section 89 of the Bank's Article of Association also reiterated that "a related Director shall vacate office or cease to be a Director, if the Director directly or indirectly enjoys a facility from the Bank that remains non-performing for a period of more than 12months.

The Bank's principal exposure to all its directors as at 30 June 2022 is N735Mn. However, the relevant obligors under this category also have credit balances and deposits maintained in their bank accounts which mitigate the risks to the bank.

Below is a schedule showing the details of the Bank's director-related lending:

| S/N | Name of borrower | Relationship to reporting institution | Name of related Directors | Facility type | Outstanding Principal | Status | Nature of security |
